change and innovation *Introduction to Conflict Resolution* Sara Cobb, Sarah Federman, Alison Castel, 2019-07-02 The field of conflict resolution has evolved dramatically during the relatively short duration of the discipline's existence. Each generation of scholars has struggled with the major puzzles of their era, providing theories and solutions that meet the needs of the time, only to be pushed forward by new insights and at times totally upended by a changing world. This introductory course text explores the genealogy of the field of conflict resolution by examining three different epochs of the field, each one tied to the historical context and events of the day. In each of these epochs, scholars and practitioners worked to understand and address the conflicts that the world was facing at that time. This book provides a framework that students will carry with them far into their careers, enriching their contributions and strengthening their voices. Rather than a didactic approach to the field, students will develop their critical analytical skills through an inductive inquiry. Students will broaden their vocabulary, grapple with argumentation, and develop critical reading skills.

Choosing Change Peter Coutts, 2013-08-05 Humans have been choice makers since the days when hunter-gatherers had to decide when to hunt and what to gather. Making choices is what humans do. But individuals feel more personal autonomy and power to choose today than ever before in human history. In *Choosing Change*, author Peter Coutts acknowledges that clergy today recognize the impact our individualistic culture of choice is having on congregations. But Coutts also points out that many leaders do not think about motivation. For them, encouraging change is about selling their congregation on a new idea governed by the assumption that a better idea should win the day. Wide experience in the church demonstrates that this approach often doesn't work and leaves many congregational leaders demoralized. Leaders see the need for change in their congregation and they earnestly want to help their congregation to change. But the approach to leadership they learned, which perhaps worked better in days gone by, is no longer working. Leaders are in the motivation business, argues Coutts. *Choosing Change* provides an overview of current thinking from the field of motivation psychology. In the first half of the book, Coutts explores theories, ideas, and terms that are most pertinent for leaders who desire to encourage congregational change. The second half of the book offers detailed guidance for congregational leaders who want to be motivational leaders.

Community Peter Block,2009-09-01 Most of our communities are fragmented and at odds within themselves Businesses social services education and health care each live within their own worlds The same is true of individual citizens who long for connection but end up marginalized their gifts overlooked their potential contributions lost What keeps this from changing is that we are trapped in an old and tired conversation about who we are If this narrative does not shift we will never truly create a common future and work toward it together What Peter Block provides in this inspiring new book is an exploration of the exact way community can emerge from fragmentation How is community built How does the transformation occur What fundamental shifts are involved What can individuals and formal leaders do to create a place they want to inhabit We know what healthy communities look like there are many success stories out there The challenge is how to create one in our own place Block helps us see how we can change the existing context of community from one of deficiencies interests and entitlement to one of possibility generosity and gifts Questions are more important than answers in this effort which means leadership is not a matter of style or vision but is about getting the right people together in the right

way convening is a more critical skill than commanding As he explores the nature of community and the dynamics of transformation Block outlines six kinds of conversation that will create communal accountability and commitment and describes how we can design physical spaces and structures that will themselves foster a sense of belonging In Community Peter Block explores a way of thinking about our places that creates an opening for authentic communities to exist and details what each of us can do to make that happen
