Writing Systems of the World Florian Coulmas, 1991-01-08 This book is an account of the writing systems of the world from earliest times to the present Its aim is to explore the complex ways in which writing systems relate to the language they depict Writing Coulmas contends is not only the guide or garment of spoken language but has a deep and lasting effect on the development of language itself His study takes in Egyptian hieroglyphics and the cuneiform system of the ancient Near East he describes Chinese writing discussing why an apparently cumbersome system has been used continuously for more than 3 000 years he ranges across the writing systems of western Asia and the Middle East the Indian families and the various alphabetic traditions which had its origins in the multifarious world of Semitic writing and came to full bloom in pre Classical Greece

Writing Systems of the World Akira Nakanishi, 1980. *An Atlas of Endangered Alphabets* Tim Brookes, 2024-08-29. A global exploration of the many writing systems that are on the verge of vanishing and the stories and cultures they carry with them. If something is important, we write it down. Yet 85% of the world's writing systems are on the verge of vanishing: not granted official status, not taught in schools, discouraged and dismissed. When a culture is forced to abandon its traditional script, everything it has written for hundreds of years—sacred texts, poems, personal correspondence, legal documents—the collective experience, wisdom, and identity of a people is lost. This Atlas is about those writing systems and the people who are trying to save them. From the ancient holy alphabets of the Middle East, now used only by tiny sects, to newly created African alphabets designed to keep cultural traditions alive in the twenty-first century, from a Sudanese script based on the ownership marks traditionally branded into camels to a secret system used in

one corner of China exclusively by women to record the songs and stories of their inner selves this unique book profiles dozens of scripts and the cultures they encapsulate offering glimpses of worlds unknown to us and ways of saving them from vanishing entirely

The World Atlas of Language Structures Martin Haspelmath, 2005-07-21 The World Atlas of Language Structures is a book and CD combination displaying the structural properties of the world's languages 142 world maps and numerous regional maps all in colour display the geographical distribution of features of pronunciation and grammar such as number of vowels tone systems gender plurals tense word order and body part terminology Each world map shows an average of 400 languages and is accompanied by a fully referenced description of the structural feature in question The CD provides an interactive electronic version of the database which allows the reader to zoom in on or customize the maps to display bibliographical sources and to establish correlations between features The book and the CD together provide an indispensable source of information for linguists and others seeking to understand human languages The Atlas will be especially valuable for linguistic typologists grammatical theorists historical and comparative linguists and for those studying a region such as Africa Southeast Asia North America Australia and Europe It will also interest anthropologists and geographers More than fifty authors from many different countries have collaborated to produce a work that sets new standards in comparative linguistics No institution involved in language research can afford to be without it

Exploring Writing Systems and Practices in the Bronze Age Aegean Philippa M. Steele, 2023-11-23 Establishes an innovative interdisciplinary theoretical framework that enables a new outlook for writing studies and the development of more convincing explanations for a number of unusual features of the early Aegean scripts Writing does not begin and end with the encoding of an idea into a group of symbols It is practiced by people who have learnt its principles and acquired the tools and skills for doing it in a particular context that affects what they do and how they do it Nor are these practices static as those involved exploit opportunities to adapt old features and develop new ones The act of writing then has tangible and visible consequences not only for the writers but also for those encountering what has been produced whether they can read its content or not with potential for a wider social visibility that can in turn affect the success and longevity of the writing system itself With a focus on the syllabic systems of the Bronze Age Aegean this book attempts to bring together different perspectives to create an innovative interdisciplinary outlook on what is involved in writing from structuralist views of writing as systems of signs with their linguistic values to archaeological and anthropological approaches to writing as a socially grounded practice The main chapters focus on the concepts of script adoption and adaptation different methods of logographic writing and the vitality of writing traditions with repercussions for the modern world Contexts of and Relations between Early Writing Systems CREWS is a project funded by the European Research Council under the European Union's Horizon 2020 research and innovation program grant agreement No 677758

and based in the Faculty of Classics University of Cambridge An Exploration of Writing Peter T. Daniels, 2017 An Exploration of Writing is a book about our alphabets our syllabaries and all the other kinds of writing that people use and have used for 5000 years It introduces the general public to a topic that hardly anyone has heard about so it clarifies basic linguistic terms as they occur For linguists exploring the growing field of graphonomy the study of writing systems in which the author has long been a pioneer it weaves together the many threads of theory into a tapestry showing a fuller picture of what all our scripts are seen to share An Exploration of Writing begins with more familiar kinds of writing considered in unfamiliar ways starting with English viewed syllabically and leads the reader across the Old World and the New to less familiar kinds of writing showing how all writings share a fundamental essence however diverse they appear to be because all writing represents language The more familiar Hebrew Chinese Korean leads on to the less familiar Udi Pahlavi Javanese Featured are some of the world's most recently elucidated scripts and some that are long known but long neglected such as those for Central Asian languages and some of the most recent interpretations of long mysterious scripts such as Sumerian and Mesoamerican An Exploration of Writing is in the tradition of and in part a response to A Study of Writing 1952 1963 by I J Gelb It encapsulates more than thirty years of the author's work and his dozens of articles on writing systems ranging from investigating the physical process of writing to bringing to light the achievements of those who had deciphered forgotten scripts to developing a theoretical approach to the origins of writing which leads to insights into the nature of writing itself
