Connors,2019-08-30 Edward Davoll was a respected New Bedford whaling captain in an industry at its peak in the 1850s But mid career disillusioned with whaling desperately lonely at sea and experiencing financial problems he turned to the slave trade with disastrous results Why would a man of good reputation in a city known for its racial tolerance and Quaker inspired abolitionism risk engagement with this morally repugnant industry In this riveting biography Anthony J Connors explores this question by detailing not only the troubled adventurous life of this man but also the turbulent times in which he lived Set in an era of social and political fragmentation and impending civil war when changes in maritime law and the economics of whaling emboldened slaving agents to target captains and their vessels for the illicit trade Davoll s story reveals the deadly combination of greed and racial antipathy that encouraged otherwise principled Americans to participate in the African slave trade **The Yankee Whaler ... The Cultural Lives of Whales and Dolphins Hal Whitehead, Luke Rendell, 2022-12-22 An astonishing unconstrained exploration of the nature and practice of cetacean culture a revolutionary book Philip Hoare author of *The Whale* In the songs and bubble feeding of humpback whales in young killer whales learning to knock a seal from an ice floe in the same way their mother does and in the use of sea sponges by the dolphins of Shark Bay Australia to protect their beaks while foraging for fish we find clear examples of the transmission of information among cetaceans Just as human cultures pass on languages and turns of phrase tastes in food and in how it is acquired and modes of dress could whales and dolphins have developed a culture of their very own

Unequivocally yes In *The Cultural Lives of Whales and Dolphins* cetacean biologists Hal Whitehead who has spent much of his life on the ocean trying to understand whales and Luke Rendell whose research focuses on the evolution of social learning open an astounding porthole onto the fascinating culture beneath the waves As Whitehead and Rendell show cetacean culture and its transmission are shaped by a blend of adaptations innate sociality and the unique environment in which whales and dolphins live Drawing on their own research as well as a scientific literature as immense as the sea including evolutionary biology animal behavior ecology anthropology psychology and neuroscience Whitehead and Rendell dive into realms both humbling and enlightening as they seek to define what cetacean culture is why it exists and what it means for the future of whales and dolphins And ultimately what it means for our future as well
