Governing the World Economy Willem Molle, 2013-09-05 The major problems the world faces have increased since the turn of the millennium Recurrent storms on the financial markets have ravaged many countries poverty is still widespread notwithstanding decades of massive development aid the environment remains in acute jeopardy and the major world institutions have often reached an impasse in attempting to combat these difficulties The issues ask for rapid and consistent action by policy makers but the interests of international organizations such as the WTO World Bank and Kyoto protocol have become too diversified to come to multilateral agreements setting uniform rules and asking for strict compliance with these rules Alternative solutions are sought and development in the future is likely to be characterized by fuzzy and complex interactions between flexible groups of actors seeking agreements on the solutions for the most pressing new problems Progress will become rather unpredictable and will depend on time place and subject specific cases as well as convergence of interests This need not be only negative Flexible solutions have the advantage that they can be easily adapted in case the conditions change In this new book the follow up to his *Global Economic Institutions* Willem Molle maps out the unfolding of this process

Globalization and the Poor Periphery before 1950 Jeffrey G. Williamson, 2009-08-21 A leading authority on economic globalization argues that industrialization in the core countries of northwest Europe and its overseas settlements combined with a worldwide revolution in transportation to produce deindustrialization and an antiglobal backlash in industrially lagging poorer countries In *Globalization and the Poor Periphery before 1950* Jeffrey Williamson examines globalization through the lens of both the economist and the historian analyzing its economic impact on industrially lagging poor countries in the nineteenth and early twentieth centuries Williamson argues that industrialization in the core countries of northwest Europe and their overseas settlements combined

with a worldwide revolution in transportation created an antiglobal backlash in the periphery the poorer countries of eastern and southern Europe the Middle East Africa Asia and Latin America During the first global century from about 1820 to 1913 and the antiglobal autarkic interwar period from 1914 to 1940 new methods of transportation integrated world commodity markets and caused a boom in trade between the core and the periphery Rapid productivity growth which lowered the price of manufactured goods led to a soaring demand in the core countries for raw materials supplied by the periphery When the boom turned into bust after almost a century and a half the gap in living standards between the core and the periphery was even wider than it had been at the beginning of the cycle The periphery argues Williamson obeyed the laws of motion of the international economy Synthesizing and summarizing fifteen years of Williamson s pioneering work on globalization the book documents these laws of motion in the periphery assesses their distribution and growth consequences and examines the response of trade policy in these regions *The Economic History of Latin America Since Independence* V.
