God and Time Gregory E. Ganssle, David M. Woodruff, 2002 This is a collection of previously unpublished essays written by leading philosophers about God's relation to time The essays have been selected to represent current debates between those who believe God to be atemporal and those who do not
The Kalam Cosmological Argument, Volume 1 Paul Copan, William Lane Craig, 2017-11-16 Did the universe begin to exist If so did it have a cause Or could it have come into existence uncaused from nothing These questions are taken up by the medieval though recently revived kalam cosmological argument which has arguably been the most discussed philosophical argument for God's existence in recent decades The kalam's line of reasoning maintains that the series of past events cannot be infinite but rather is finite Since the universe could not have come into being uncaused there must be a transcendent cause of the universe's beginning a conclusion supportive of theism This anthology on the philosophical arguments for the finitude of the past asks Is an infinite series of past events metaphysically possible Should actual infinities be restricted to theoretical mathematics or can an actual infinite exist in the concrete world These essays by kalam proponents and detractors engage in lively debate about the nature of infinity and its conundrums about frequently used kalam argument paradoxes of Tristram Shandy the Grim Reaper and Hilbert's Hotel and about the infinity of the future
What Caused the Big Bang? Rem B. Edwards, 2021-07-26 This book critically explores answers to the big question What produced our universe around fifteen billion years ago in a Big Bang It critiques contemporary atheistic cosmologies including Steady State Oscillationism Big Fizz Big Divide and Big Accident that affirm the eternity and self sufficiency of the universe without God This study defends and revises Process Theology and arguments for God's existence from the universe's life supporting order and contingent existence
Collected Works, Volume I Adolf Grünbaum, 2013-07-16 Adolf Grünbaum is one of the giants of 20th century philosophy of science This volume is the first of three collecting his most essential and highly influential work The essays collected in this first volume focus on three related areas They discuss scientific rationality the problem of what it takes for a theory to be called scientific and ask whether it is plausible to draw a clear distinction between science and non science as was famously proposed by Karl Popper They delve into the debate between determinism and indeterminism in both science and in the humanities Grünbaum defends the position of the Humane Determinist which then leads to a thorough criticism of the current theological approaches to ethics and morality where Grünbaum defends an explicit Secular Humanism as well as of prominent theistic interpretations of twentieth century physical cosmologies The second volume is devoted to Grünbaum's writings on the Philosophy of Physics

and Space Time and the third to his lectures on the Philosophy of Psychology and Psychoanalysis including his 1985 Gifford Lectures which are to be published for the first time Analytic Philosophy of Religion James Franklin Harris, 2013-03-14 When Gene Long editor of Kluwer's Handbook of Contemporary Philosophy of Religion Series first invited me to write the volume on Analytic Philosophy of Religion I accepted with great enthusiasm My only explanation for that enthusiasm now is that I was younger and more naive at the time Soon after starting work on the volume my enthusiasm was dampened by the daunting magnitude of the task I began as a sprinter and quickly settled into the pace of a long distance runner Although I considered myself well read in the subject I soon discovered that I had a great deal of research to do to be confident that I had considered all of the major contributions to the various discussions issues and of religion As I read more and more problems found within analytic philosophy books and articles I realized that I had rushed into a territory already well trodden by the angels I am greatly impressed by the sophistication and subtlety of philosophical argument that characterize the different debates in contemporary analytic philosophy of religion This volume covers a vast amount of material I have endeavored to provide the fairest possible reading of different authors and in cases where I include my own critical evaluations and develop my own positions I have endeavored to provide the strongest possible interpretations of the positions I criticize **Science & Christianity** Richard F. Carlson, 2000-08-31 Six contributors here debate the relative merits of four distinct conceptions of the relationship between Christianity and science today Views range from a strict creationist posture to full fledged partnership Edited by Richard F Carlson What Can We Really Know? David R. Andersen, Angus J.L. Menuge, 2023-06-13 Today it's not uncommon to get the impression that our claims to know are either doomed before they begin or that they have a status that approaches certainty The pendulum seems to swing from one end to the other with our educational institutions too often perpetuating both depending on the person being asked Yet the question of how and if our claims to know are really justified remains central Is knowledge a purely social construct without any objective basis as many claim Or if we do have some basis to believe some of our claims are we justified in holding those claims with an attitude of certainty as others in today's environment seem to imply And what role do our quick judgments play in those claims From the tenor of our public debates one could easily be left with the suspicion that either we can't know anything or that whatever the present state of knowledge is shouldn't be questioned What Can We Really Know The Strengths and Limits of Human Understanding aims to bring some balance to the topic and argues that while we do have reason to believe that a great many of our claims are justified it's also true that much of what passes for knowledge is a social product and therefore vulnerable to future revision Exploring how knowledge can be understood how far science can take us and what its limitations might be and the status of some of the most recent arguments for God's existence it will be suggested that a healthy dose of humility should be reincorporated in our public and private debates **God and the Nature of Time** Garrett J. DeWeese, 2017-03-02 Is God temporal in time or atemporal outside of time Garrett DeWeese begins with contemporary

metaphysics and physics developing a causal account of dynamic time Drawing on biblical material as well as discussions of divine temporality in medieval and contemporary philosophical theology DeWeese concludes that God is temporal but not in physical time as we measure it Interacting with issues in the history of philosophy contemporary philosophy of science and philosophy of religion this book offers students a thorough introduction to the key issues and key figures in historical and contemporary work on the philosophy of time and time in theology

The Truly Infinite Universe David James Stewart, 2019-06-14 The discoveries of general relativity and quantum mechanics in the 20th century provide the perfect opportunity for Hegel's thought to become more topical than it has ever been By bringing speculative philosophy into conversation with quantum cosmology this book develops Hegel's metaphysics of true infinitude and Hawking's theory on the origins of spacetime in tandem providing a compelling rationale for the idea that the universe is a self-generating self-organizing self-enclosed whole Ever sensitive to the complex relationship of scientific philosophical and theological issues in theoretical cosmology the study brings a fresh perspective to the unique brand of metaphysical theology underlying speculative philosophy and offers a new way of conducting transdisciplinary work involving Hegelian thought This is essential reading for Hegel scholars Hawking scholars those interested in philosophical cosmology the ontology of the quantum void the realism vs idealism debate infinitude imaginary time and dialectical materialism and those compelled by post-classical approaches to theology

The Frontiers of Science & Faith John Jefferson Davis, 2002-01-01 What happens when new scientific research meets traditional Christian doctrines How does the big bang theory fit with Genesis 1:1 What does quantum mechanics have to do with the doctrines of predestination and the omniscience of God How does the anthropic principle square with a biblical notion of a designed and purposeful universe What are the implications of the doctrine of redemption in Jesus Christ for the search for extraterrestrial intelligence Addressing these and other questions John Jefferson Davis brings together a well-informed understanding of current scientific issues with Christian teaching He demonstrates that the meeting of the frontiers of science with the frontiers of faith calls for a proper relationship with the God of the universe and a humility that acknowledges the fundamental limits of human knowledge

Light from the East Alexei V. Nesteruk, In this unique volume a new and distinctive perspective on hotly debated issues in science and religion emerges from the unlikely ancient Eastern Orthodox Christian tradition Alexei Nesteruk reveals how the Orthodox tradition deeply rooted in Greek Patristic thought can contribute importantly in a way that the usual Western sources do not Orthodox thought he holds profoundly and helpfully relates the experience of God to our knowledge of the world His masterful historical introduction to the Orthodox traditions not only surveys key features of its theology but highlights its ontology of participation and communion From this Nesteruk derives Orthodoxy's unique approach to theological and scientific attribution Theology identifies the underlying principles *logoi* in scientific affirmations Nesteruk then applies this methodology to key issues in cosmology the presence of

the divine in creation the theological meaning of models of creation the problem of time and the validity of the anthropic principle especially as it relates to the emergence of humans and the Incarnation Nesteruk's unique synthesis is not a valorization of Eastern Orthodox thought so much as an influx of startlingly fresh ideas about the character of science itself and an affirmation of the ultimate religious and theological value of the whole scientific enterprise *The Faithful Creator* Ron Highfield,2015-09-03 As Paul says in Romans creation groans for redemption But can we trust God to make all things new In this scholarly yet accessible text Ron Highfield presents an overview of creation providence and the problem of evil addressing the question of human anxiety in the face of suffering Our faithful Creator promises a glorious future for all creation

The Universe in the Image of Imago Dei Alexei V. Nesteruk,2022-03-24 Cosmology anthropology and Christology are deeply interrelated This implies that one cannot talk about the structure of the world without human presence in it as well as it is impossible to produce any reasonable understanding of humanity without positioning it in the universe In the same fashion in order to comprehend where the human capacity of predicating the universe comes from one needs to appeal to humanity's Divine Image that is to its archetype in the incarnate Christ Whereas Christians traditionally believe that the human phenomenon is unique as created in the Divine Image such scientific disciplines as evolutionary biology palaeoanthropology the sciences of artificial intelligence psychology and others challenge the vision of humanity as a unique formation thus challenging the doctrine of Imago Dei All these disciplines place humans in a mediocre position in the world accompanied by the feeling of anxiety insecurity and non attunement to the universe Theology needs to respond to these challenges by incorporating into its scope the data from the sciences in order to neutralize such anxieties The resulting dialogue of theology with science provides a hermeneutics of the human condition with no objective to change the latter Then the sense of the universe is disclosed from within the Divine Image reflecting the predicaments of the human created condition

New Proofs for the Existence of God Robert J. Spitzer,2010-07-27 With the incredible popularity of recent books championing agnosticism or atheism many people might never know that such books almost completely ignore the considerable evidence for theism uncovered in both physics and philosophy over the past four decades New Proofs for the Existence of God responds to these glaring omissions From universal space time asymmetry to cosmic coincidences to the intelligibility of reality Robert Spitzer tackles a wealth of evidence He considers string theory quantum cosmology mathematical thoughts on infinity and much more This fascinating and stunning collection of evidence provides solid grounding for reasonable and responsible belief in a super intelligent transcendent creative power standing at the origins of our universe

Scientific Approaches to the Philosophy of Religion Y. Nagasawa,2012-07-25 Tackling central problems in philosophy of religion by referring to relevant theories and findings in cognitive science anthropology developmental psychology decision theory biology physics cosmology the contributors address a range of topics including divine attributes God creation and evolution God and the universe religious beliefs

The Quotable Atheist Jack Huberman,2008-03-03

Surprisingly no book of quotations on God and religion by atheists and agnostics exists. Luckily for the millions of American nonbelievers who have quietly stewed for years as the religious right made gains in politics and culture the wait is over. Bestselling author Jack Huberman's zeitgeist sense has honed into the backlash building against religious fundamentalism and collected a veritable treasure trove of quotes by philosophers, scientists, poets, writers, artists, entertainers, and political figures. His colorful cast of atheists includes Karen Armstrong, Lance Armstrong, Jules Feiffer, Federico Fellini, H. L. Mencken, Ian McKellen, Isaac Singer, Jonathan Swift, Ludwig Wittgenstein, Virginia Woolf, and the Marquis de Sade. **Building Belief** Chad V. Meister, 2009-06-01. Take a journey from doubt to belief. It can be hard to share your faith with others, especially when people can't agree on whether there is even any actual truth. With that in mind, Chad Meister has developed a simple logical way for you to help others move past relativism to a place where Christian belief makes sense: the Apologetics Pyramid. In *Building Belief*, Meister leads you up each step of the pyramid, beginning where many find themselves today, doubting if anything is really true. From there, he powerfully builds a case for absolute truth, the existence of God, universal morals, and values, the reliability and divine inspiration of the Bible, the resurrection of Christ, and ultimately the good news that Jesus is the Son of God who offers salvation to the world. Join Chad Meister in this concise, clear, and compelling book as he builds a persuasive case for the truth of Christianity. Lee Strobel, author *The Case for Christ* and *The Case for Faith*. An excellent book to lead earnest enquirers from doubt to conviction about the basic truths of the Christian faith. Norman L. Geisler, dean, Southern Evangelical Seminary and Bible College. Chad Meister is a force to be reckoned with, and this delightful little book is a timely resource to be studied by Christians and given to non-Christians. J. P. Moreland, distinguished professor of philosophy, Talbot School of Theology, author *Love Your God with All Your Mind*. *Building Belief* is thoughtful, fresh, and full of personal and practical illustrations. Meister strikes just the right balance, providing a model for how apologetics ought to be done. Paul Copan, Pledger Family Chair of Philosophy and Ethics, Palm Beach Atlantic University. Meister offers both the tools and the method for making discussions with skeptics more fruitful. Jay W. Richards, research fellow, Acton Institute, coauthor *The Privileged Planet*. **Law, Darwinism, and Public Education** Francis J. Beckwith, 2002-12-24. In 1987, in *Edwards v. Aguillard*, the United States Supreme Court declared as unconstitutional a Louisiana statute requiring the state's public schools to teach creationism if evolution is taught, and to teach evolution if creationism is taught. It was a serious blow to creationism in public schools, but a new movement since then has kept the debate alive. That new movement is Intelligent Design. Should Intelligent Design be taught in schools? In *Law, Darwinism, Public Education*, Francis J. Beckwith asks whether teaching ID in public schools would be constitutional in light of the Supreme Court's decision in *Edwards v. Aguillard*. At that time, the Court ruled that teaching creationism violates the Establishment Clause of the First Amendment of the U.S. Constitution. Beckwith examines the Intelligent Design theory and the *Edwards* case to find out whether teaching ID would suffer the same fate if brought before the court.
