Theoretical Anxiety And Design Strategies In The Work Of Eight Contemporary Architects:

Theoretical Anxiety and Design Strategies in the Work of Eight Contemporary Architects José Rafael Moneo, 2004 This book is a compilation of lectures given to students at the Harvard Graduate School of Design on the work of contemporary architects *Architectural Possibilities in the Work of Eisenman* Michael Jasper, 2022-11-11 This book examines the central decades of Peter Eisenman's work through a formal and thematic analysis of key architectural projects and writings revealing underlying characteristics and arguing for their productive continuity and transformative role The book explores Eisenman's approach to architectural form generation and thinking It does this through a thematic and formal analysis of projects and writings from the mid 1970s to the mid 1990s Following an introductory chapter addressing the theme of potentialities the book is organised in two parts The first part focuses on key period writings of Eisenman framing the close reading around a practice of resistance the architect's approach to history as analysis and the transformative conceptualisation of time In the second part the book undertakes an analysis of select projects from the 1980s and 1990s Three formal preoccupations and conceptual orientations ground manipulations figuration and spatial events organise this part of the book Previously unpublished material from the Peter Eisenman fonds Canadian Centre for Architecture Montréal provides primary source material A concluding chapter addresses Eisenman's teaching its relation to his larger project and possible legacies for educators practitioners scholars and theorists **Mathematical Thinking and Properties in Architecture** Ju Hyun Lee, Michael J. Dawes, Michael J. Ostwald, 2025-06-30 This monograph explores the profound connections between architecture and mathematics through the works of Andrea Palladio Le Corbusier and Peter Eisenman Combining historical insights with computational analyses it examines the social spatial and aesthetic properties of twenty six iconic designs Advanced methods such as Space Syntax isovists fractal analysis image segmentation and semantic linguistic analysis reveal the mathematical principles underlying architectural thinking and properties Richly illustrated with over 100 visuals this volume is an essential resource for senior undergraduates postgraduates practicing architects and historians seeking a deeper understanding of mathematical thinking in architectural design and analysis **The Global Architect** Donald McNeill, 2009-06-02 The Global Architect explores the increasing significance of globalization processes on urban change architectural practice and the built environment In what is primarily a critical sociological overview of the current global architectural industry Donald McNeill covers the star system of international architects who combine celebrity and hypermobility the top firms whose offices are currently undergoing a major global expansion and the role of advanced information technology in expanding the geographical scope of the industry *Architecture of the Early Twenty-first Century: A Global Need for Sustainability* Shirley Montgomery, 2013-01-30 This book is about the global need for sustainable building The number of people on earth and their use of the resources of the planet for energy make it necessary to build differently The planet is showing serious signs of stress According to Dr David Grissmer my sister's husband as we all rode

together recently through the melting Columbia ice field in Alberta Canada The consequences of global warming are potentially catastrophic and since the preventative strategies are likely to take decades to work even if the chances are small that humans are the cause we need to begin to address the issue I knew this was a guarded statement from a physicist about what had possibly caused the changed ecosystems in our world *Approaching Architecture* Miguel Guitart,2022-09-30 The study of the architectural discipline suffers from an increasing disconnect between its teaching and its professional practice In this edited collection 18 architectural voices address this disconnect by reflecting on the ways in which they exercise the architectural discipline in three ways research teaching and practice This book argues that the totality of activities encompassed by the architectural profession can be best fulfilled when reconsidering the critical interactions between these three fields in the everyday exercise of the profession Split into three parts Architecture as Research Architecture as Pedagogy and Architecture as Practice each section focuses on one of these three dimensions while establishing continuity with the other two In doing so the book not only favors a more fulfilling interaction between academia and the profession but also reinforces the implementation of design theory and research in everyday teaching and practice The contributions come from 18 teams of architects operating from geographically diverse locations including Pezo von Ellrichshausen in Chile Kengo Kuma Associates in Japan Barclay Crousse in Peru Shift in Iran Heinrich Wolff in South Africa and People s Architecture Office in China opening the design conversation to larger contexts and framing continuity and inclusion in time Written for students instructors and practitioners alike the inspiring reflections in this volume encourage readers to grow as architects and play an instrumental role in transforming the built environment **Ai Weiwei, Spatial Matters** Weiwei Ai,Anthony Pins,2014 This book draws on the full breadth of Ai Weiwei s architectural installation and activist work including drawings and plans from huge range of international projects with particular emphasis on his use of space Throughout the book a wide selection of essays by leading critics and art historians as well as interviews with the artist draw out his central concerns Jacket **James Stirling** Joachim Declerck,2009 *Architectural Record* ,2005 □□□□□ ,2008 **Journal of the Society of Architectural Historians** Society of Architectural Historians,2004 Includes special issues **New Directions in Contemporary Architecture** Luigi Prestinenza Puglisi,2008-05-05 Rem Koolhaas has defined architecture as a chaotic adventure Nothing could be more true than that of the last two decades Never has architecture been so unbridled and so extraordinary the architectural cast has never been so wide and their works so diverse What though if you are new to the subject How is it possible to make sense of this seemingly unruly architectural landscape There are so many different types of architecture so many designers with such varying and even contradictory approaches This book is a much needed navigation guide for anyone interested in modern architecture Organised chronologically it enables you to find your way through one of the most prolific periods of building design It looks at buildings in often contrasting styles that have been built almost simultaneously across the world with their roots in very different tendencies and schools of thought A loose but

effective framework is provided which pulls all these multiple threads together while key buildings are described individually with a unique clarity and precision Aaron Betsky Director of Cincinnati Art Museum Comprehensive coherent and cogent Puglisi's book sorts out the messy history of the last quarter century of the world's best architecture Professor Iain Borden Head Bartlett School of Architecture UCL Illuminating and insightful a must have read for students Hans Ibelings Editor of A10 new European architecture Lucid and concise Charles Jencks Architecture Critic and Author A compelling comprehensive overview of the avant garde since 1988 as it oscillates in and out of the global star system Bill Menking Editor of The Architect's Newspaper This is the first clear and systematic study of the culture of architecture from the reds of deconstruction to the sustainable greens The Architecture Reader Krista Sykes, 2007 The Architecture Reader brings together for the first time texts written by architects of international esteem *The Architect's Newspaper*, 2005 The Publishers Weekly, 2004 Forthcoming Books Rose Arny, 2004 **Choreographing Congestion** Quentin David Stanton, 2008 Choice, 2004 *Rationalist Traces* Andrew Peckham, Torsten Schmiedeknecht, Charles Rattray, 2007-10-22 Modern European architecture has been characterised by a strong undercurrent of rationalist thought Rationalist Traces aims to examine this legacy by establishing a cross section of contemporary European architecture placed in selected national contexts by critics including Kos Moravnszky and Josep Maria Montaner Subsequent interviews discuss the theoretical contributions of Giorgio Grassi and OM Ungers and a survey of Max Dudler and De Architekten Cie's work sets out a consistency at one remove from avant garde spectacle or everyday expediency In Germany Rationalism offers a considered representation of state institutions while elsewhere outstanding work reveals different approaches to rationality in architecture often recalling canonical Modernism or the Rational Architecture of the later postwar period Whether evident in patterns of thinking a particular formal repertoire a prevailing consistency or exemplified in individual buildings this relationship informs the mature work of Patrick Berger Claus en Kaan Architecten Carlos Ferrater Cino Zucchi or Hans Kollhoff The buildings and projects of a younger generation Javier Garc a Solera GWJ Architekten AG biq Andrea Bassi or Beniamino Servino present a Rationalism less conditioned by a concern to promote a unifying aesthetic While often sharing a deliberate economy of means or a sensual sobriety they present a more oblique or distanced relationship with the defining work of the 20th century **Volume**, 2005
