

Review of New Directions for Evaluation, Volume 106: Theorists' Models in Action

Chris L. S. Coryn

Western Michigan University—The Evaluation Center

The summer 2005 issue of *New Directions for Evaluation*, "Theorists' Models in Action", edited by Marvin C. Alkin and Christina A. Christie is, in part, inspired by the "Radnor Middle School" case study conducted in the early 1980s (Brandt, 1981). In the Radnor case study notable theorists including Scriven, Stake, Eisner, and Popham were asked to explain how they would evaluate Radnor's humanities curriculum.

In this issue Alkin and Christie asked four contemporary theorists—Jennifer C. Greene, Gary T. Henry, Stewart I. Donaldson, and Jean A. King—to describe how they would evaluate the case of the "Bunche-Da Vinci Learning Partnership Academy." The Bunche-Da Vinci Learning Partnership Academy is essentially a "unique partnership between the [school] district and a nonprofit educational company specializing in innovative school interventions for low-performing students" (Eisenberg, Winters, & Alkin, 2005, p. 5).

Jennifer Greene (2005) is the first theorist to tackle the Bunche-Da Vinci evaluation. Greene, as anticipated, takes a value-oriented (engaged) approach.

Theorists Models In Action New Directions For Evaluation:

Theorists' Models in Action Marvin Alkin, 2005-08-11 This volume analyzes how evaluation theorists apply their approach in practice A scenario of a situation at an elementary school is presented to four prominent theorists who describe how they would design and conduct an evaluation of the school's program The editors consider the theorists proposed evaluations as well as their subsequent comments to develop themes related to the influence of theory and context on practice They also provide a comparative analysis of the theorists evaluation approaches in relation to the context of evaluation case presented Evaluation theorists seem to be quite good at propounding on how they think the evaluation world ought to work Yet do we really know that what theorists say they would do in practice is indeed what they would actually do Evaluation after all is situational Each context offers its own constituency set of values programmatic elements bureaucratic hurdles and other variables This volume demonstrates why evaluators need to adapt their point of view to a particular situation and provides much needed study and analysis on the way in which they make those adaptations This is the 106th volume of the Jossey Bass quarterly report series New Directions for Evaluation

Theory-Driven Evaluations Huey T. Chen, 1990-01-01 With the publication of Theory Driven Evaluations Huey Tsyh Chen has given us an ambitious volume Indeed it is the aspiration of this book to provide a conceptual framework that integrates the diverse approaches and paradigms of evaluation For those of us accustomed to the rhetoric of the paradigm wars that have been raging in recent years it is refreshing to find a text that works so assiduously at reconciliation There is much that is useful in Chen s analysis He gives us a full and thoughtful book that attempts no less than the construction of a conceptual framework for all of program evaluation It provides an impressive compendium of source material and references spanning not only evaluation but related work in economics and public policy this alone is worth the price of the book Chen s Theory Driven Evaluations provides a stimulating even heroic attempt to bring some conceptual integration to a field that has been too long dominated by methodological paradigms and procedural particulars a prepublication review for Evaluation and Program Planning Generous use of examples which are well selected and lucidly summarized Contemporary Sociology Chen introduces a new comprehensive framework for program evaluation that is designed to bridge the gap between method and theory oriented perspectives For program planners decision makers scholars and students this volume clarifies illuminates and provides unique insights into the conception construction and implementation of a wide range of programs The research examples used in the discussion draw upon various areas such as education welfare health criminal justice job training and family construction to attract a wider audience Journal of Applied Rehabilitation Counseling Program evaluation has traditionally

emphasized the application of social science research methods in evaluation activities. However, there is a growing awareness that program theory is vital for broadening the scope and enhancing the usefulness of program evaluation. In *Theory Driven Evaluations*, Huey Tsyh Chen introduces a new comprehensive framework for program evaluation that is designed to bridge the gap between the method and theory oriented perspectives. He provides an intensive discussion of the nature and functions of program theory approaches to constructing program theories and the integration of program theory with evaluation processes. Specific types of theory driven evaluations as well as principles and guidelines for application are developed for meeting different policy purposes. Application of systematic strategies is illustrated by concrete examples from a variety of evaluation studies in different fields. The presentation of this new perspective directly addresses the needs and concerns in both the professional and applied areas of program evaluation. For program planners, decisionmakers, scholars, and students, this volume will clarify, illuminate, and provide unique insights into the conception, construction, and implementation of a wide range of programs.

Mind the Gap Phillip Allman, Jos Vaessen, 2017-07-28

Over the past twenty to thirty years, evaluation has become increasingly important to the field of public policy. The number of people involved and specializing in evaluation has also increased markedly. Evidence of this trend can be found in the *International Atlas of Evaluation*, the establishment of new journals and evaluation societies, and the increase in systems of evaluation. Increasingly, the main reference point has become an assessment of the merit and value of interventions as such, rather than the evaluator's disciplinary background. This growing importance of evaluation as an activity has also led to an increasing demand for the type of competencies evaluators should have. Evaluation began as a niche area within the social and behavioral sciences. It subsequently became linked to policy research and analysis and has more recently become transdisciplinary. This volume demonstrates an association between the evaluation tradition in a particular country or policy field and the nature of the relationship between social and behavioral science research and evaluative practice. This book seeks to offer comprehensive data which lead to conclusions about patterns that transcend the gap between evaluation and the social scientific disciplines. *Mind the Gap* has a twofold aim. The first is to highlight and characterize the gap between evaluation practices and debates and the substantive knowledge debates within the social and behavioral sciences. The second is to show why this gap is problematic for the practice of evaluation while, at the same time, illustrating possible ways to build bridges. The book is centered on the value of producing useful evaluations grounded in social science theory and research.
