Sexualities: Sexualities and their futures Kenneth Plummer, 2002 Volume 3 Difference and Diversity of Sexualities This section examines the politics power and critique of sexual categories including bisexuality sex addiction prostitution and sadomasochism **The Time of AIDS** Gilbert Herdt, Shirley Lindenbaum, 1992-01-29 The widespread tragedy of the AIDS epidemic is forcing social scientists to change the way they think about and study subgroups within the majority culture How is the concept of culture relevant to the study of AIDS How can social science methods be used to uncover the epidemiology of this deadly disease And how can social scientists deploy what they learn to help solve the problems posed by AIDS The Time of AIDS explores and provides provocative insights on these three critical issues By examining research conducted with various cultural groups and in different countries the authors offer insight on how to identify the distinct way different communities respond to the threat of this disease These studies demonstrate that a single theory and method will not capture the importance of the AIDS epidemic but a close look at the culture and psychology of a society can inspire more effective ways of education intervention and arrest of the transmission of the virus Researchers and practitioners in anthropology psychology sociology and nursing will benefit from this enlightening volume **Library Journal**, 2002

Cunningham,2020-01-01 Understanding Rhetoric A Guide to Critical Reading and Argumentation is a composition textbook that outlines three essential skills rhetoric argument and source based writing geared towards newcomers and advanced students alike Though comprehensive in its coverage the book s focus is a simple one how to move beyond a gut reaction while reading to an articulation of what is effective and what is not while explicitly answering the most important question of Why This text gets at this central concern in two fundamental ways First the text teaches composition as a cumulative process coaching you how to question challenge and expand on not just the readings you hold in your hands but also how to interrogate the internal processes of writing and thinking The book s blend of composition methods detail the cross point of product and process to turn reading and writing from a matter of coming up with answers to questions to learning what type of questions need to be asked in the first place The right questions the text argues are fundamentally rhetorical in nature Second the content of the practice based chapters is framed into a larger mesh of intellectual history to show how the writing and thinking you are doing today is continuous with a long history of writing instruction that goes back to the ancient world This book provides equal representation from

classical and contemporary theory with the recognition that theory cannot be fully grasped without practice and practice cannot be fully understood without its theoretical antecedent After all you can't write outside the box until you know where the box is and what it looks like
