Vietnam Some Basic Issues And Alternatives:

Acting Strategically Using Drama Theory James William Bryant, 2015-10-09 In today's confrontational and connected world communication is the key strategic act. This book uses drama theory, a radical extension of game theory, to show how best to communicate so as to manage the emotionally charged confrontations occurring in any worthwhile relationship. Alongside a toolset that provides a systematic framework for analysing *Dynamics and Conflict in Regional Structural Change* Manas Chatterji, Robert E. Keunne, 1990-06-18 The second in a two volume tribute to Walter Isard, the first being *New Frontiers in Regional Science*, this book looks at dynamics and conflict in regional structural change. Together they contain 50 papers by experts in this field and look at subjects such as location theory. **A Question of Values** Peter Lawler, 1995 Places the work of Johan Galtung in the context of past and current debates in international relations, political theory and more generally in the social sciences. This comprehensive and critical account scrutinises Galtung's conceptual icons such as positive peace and structural violence. *Special Bibliography Series* United States Air Force Academy Library, 1990 **Politics in Wired Nations** Ithiel de Sola Pool, 2018-04-17 Ithiel de Sola Pool was a pioneering social scientist, a distinguished scholar of the political process and one of the most original thinkers in the development of the social sciences. Passionately engaged in politics, he continued his role of leadership throughout his life, building the MIT Political Science Department into an outstanding group. He organized international teams of social scientists and collaborated widely to develop the understanding of social change. He was a frequent adviser to governments as consultant and in-house critic and a successful advocate of limits on government regulation. *Politics in Wired Nations* presents his writings on the social and political impact of different communication systems and new telecommunications technology. Included in this volume is the first study of trends in a global information society and the first study of social networks and the small world phenomenon that creates new relationships and routes of informal influence and political power, both domestic and international. Pool's essays on the politics of foreign trade, the influence of American businessmen on Congress, and changeable, unnatural institutions of the modern world, e.g. bureaucracies, mega-cities, and nation-states are herein contained. Pool describes a nonviolent revolution in freedom and political control that is possible as the world changes from the era of one-way mass communications targeted to national audiences to a new era of abundant, high capacity, low cost, interactive and user-controlled communications on a global scale. He discusses policy choices for freedom, the battlegrounds ahead, and the risks of government involvement in the regulation of new telecommunication technologies. **Vietnam** W. Isard, 1969 *New Frontiers in Regional Science* Manas Chatterji, Robert E. Keunne, 1990-06-18 The first in a two volume tribute to Walter Isard, the second being *Dynamics and Conflict in Regional Structural Change*, this book looks at new frontiers in regional science. Together they contain 50 papers by experts in this field and look at subjects such as location theory. **Special Bibliography Series**, 1957 *At War with Asia* Noam Chomsky, 2005 Indispensable look at American military involvement
