The World Court In Action Judging Among The Nations:

The World Court in Action Howard N. Meyer, 2002 Traces the World Court from the Hague Conference of 1899 and shows its development through World War I the League of Nations World War II and the cold war up to the contemporary challenges of East Timor and Kosovo Also distinguishes between the nation state oriented work of the World Court and the work of the International Criminal Court which was proposed in 1998 to prosecute individual war criminals like Milosevic and others coming out of the conflicts of the former Yugoslavia and Rwanda Discusses the common problem that World Court and the ICC have resistance in Washington to the international rule of law especially when it comes to authority surrounding the use of force The International Court of Justice and Self-Defence in International Law James A.

Green, 2009-07-30 The legal rules governing the use of force between States are one of the most fundamental and the most controversial aspects of international law An essential part of this subject is the question of when and to what extent a State may lawfully use force against another in self defence However the parameters of this inherent right remain obscure despite the best efforts of scholars and notably the International Court of Justice This book examines the burgeoning relationship between the ICJ and the right of self defence Since 2003 there have been three major decisions of the ICJ that have dealt directly with the law governing self defence actions in contrast to only two such cases in the preceding fifty years This then is an opportune moment to reconsider the jurisprudence of the Court on this issue This book is the first of its kind to comprehensively draw together and then assess the merits of this jurisprudence It argues that the contribution of the ICJ has been confused and unhelpful and compounds inadequacies in existing customary international law The ICJ's fundamental conception of a primary criterion of armed attack as constituting a qualitatively grave use of force is brought into question The book then goes on to examine the underlying causes of the problems that have emerged in the jurisprudence on this crucial issue Winner of the American Society of International Law's Lieber Society Book Prize 2009 Dr Green's monograph demonstrates a thorough understanding of the law of self defence coupled with an informed and evaluative discussion of the role and function of the International Court It is an impressive analysis of the International Court of Justice's jurisprudence on self defence Professor Iain Scobbie Judge of the American Society of International Law's Lieber Society Book Prize 2009 Sir Joseph Hotung Research Professor School of Oriental and African Studies London James Green's *The International Court of Justice and Self Defence in International Law* usefully draws together the jurisprudence of the International Court of Justice on the international law governing self defence The work could not be more timely in light of both contemporary State practice and the Court's recent controversial judgements on the topic Of particular note is his analysis of the very complex and as yet unsettled notion of armed attack Professor Michael Schmitt Chairman of the American Society of International Law's Lieber Society Book Prize Committee Chair of Public International Law Durham University Winner of the University of Reading Faculty of Social Sciences outputs prize for the best research output in 2010 The Politics of Constructing the

Neff, 2014-02-18 Justice among Nations tells the story of the rise of international law and how it has been formulated debated contested and put into practice from ancient times to the present Stephen Neff avoids technical jargon as he surveys doctrines from natural law to feminism and practice from the Warring States of China to the international criminal courts of today Ancient China produced the first rudimentary set of doctrines But the cornerstone of international law was laid by the Romans in the form of universal natural law However as medieval European states encountered non Christian peoples from East Asia to the New World new legal quandaries arose and by the seventeenth century the first modern theories of international law were devised New challenges in the nineteenth century encompassed nationalism free trade imperialism international organizations and arbitration Innovative doctrines included liberalism the nationality school and solidarism The twentieth century witnessed the League of Nations and a World Court but also the rise of socialist and fascist states and the advent of the Cold War Yet the collapse of the Soviet Union brought little respite As Neff makes clear further threats to the rule of law today come from environmental pressures
