Environmental Change and Sustainable Social Development Sven Hessel, 2016-05-06 How does climate change

affect social work and social development What actions are needed to integrate the three pillars of economic development environmental development and social protection With global warming and the increase in natural disasters due to the emission of greenhouse gases an alternative approach to the natural environment is vital The main focus of this volume is to emphasize the person in environment concept and to find measures for its implementation For social work the environment has traditionally been viewed as a world of human relationships as opposed to the interaction between man and environment This informative and incisively written edited collection brings together experts from around the world to analyze the person in environment concept and to find measures for its implementation Through the presentation of theoretical and practical platforms for environmental social work or green social work we hope to bring about a new paradigmatic shift in our attitude to the concept of person in environment

Natural Hazards in Australasia James Goff, C. R. de Freitas, 2016-07-11 A textbook designed for students taking a course in natural hazards with an Australasian focus and context In full colour and richly supported by photographs illustrations and maps

Climate Risk and Resilience in China Rebecca Nadin, Sarah Opitz-Stapleton, Xu Yinlong, 2015-10-14 China has been subject to floods droughts and heat waves for millennia these hazards are not new What is new is how rapidly climate risks are changing for different groups of people and sectors This is due to the unprecedented rates of socio economic development migration land use change pollution and urbanisation all occurring alongside increasingly more intense and frequent weather hazards and shifting seasons China's leadership is facing a significant challenge from conducting and integrating biophysical and social vulnerability and risk assessments and connecting the information from these to policy priorities and time frames to developing and implementing policies and actions at a variety of scales It is within this challenging context that China's policy makers businesses and citizens must manage climate risk and build resilience This book provides a detailed study of how China has been working to understand and respond to climatic risk such as droughts and desertification in the grasslands of Inner Mongolia to deadly typhoons in the mega cities of the Pearl River Delta Using research and data from a wide range of Chinese sources and the Adapting to Climate Change in China ACCC project a research to policy project this book provides a fascinating glimpse into how China is developing policies and approaches to manage the risks and opportunities presented by climate change This book will be of interest to those studying global and Chinese climate change policy regional food water and climate risk and to policy advisors

Adaptation to Climate Change through Water Resources Management Dominic Stucker, Elena Lopez-Gunn, 2014-08-27 The impacts of human induced climate change are largely mediated by water such as alterations in precipitation and glacial melt patterns variations in river flow increased occurrence of droughts and floods and sea level rise in densely populated coastal areas Such phenomena impact both urban and rural communities in developed emerging and developing countries Taking a systems approach this book analyzes evidence from 26 countries and identifies common barriers and bridges for local adaptation to climate change through water resources management It includes a global set of

case studies from places experiencing increased environmental and social pressure due to population growth development and migration including in Africa Asia Australia Europe North and South America All chapters consider the crosscutting themes of adaptive capacity equity and sustainability These point to resilient water allocation policies and practices that are capable of protecting social and environmental interests whilst ensuring the efficient use of an often scarce resource The Environment-Conflict Nexus Francis Galgano,2018-07-15 The aim of this book is to demonstrate how environmental factors have caused an evolution in the landscape of national security since the end of the Cold War Through relevant case studies the scope of the problem on the national security landscape due to environmental stressors is illuminated examined and synthesized with climate related data Human variables such as governance GDP and vulnerability are taken into account and are compared against environmental factors to more accurately determine the causative agents of regional conflicts which threaten national security These case studies comprise the majority of the text and they show how individual conflicts are uniquely influenced by environmental stress with variations from situation to situation This book will be of interest to government and military professionals and may serve as a resource for college courses in the areas of military geography international affairs and sustainability studies **Embodying Transformation** Maryrose Casey,2015-06-01 The essays in this collection explore transcultural events to reveal deeper understandings of the dynamic nature power and affect of performance as it is created and witnessed across national and cultural boundaries Focusing on historical and contemporary public events in multiple contexts contributors offer readings of transcultural exchanges between Europe Asia and the Middle East between colonisers and the colonised and back again In the process the authors explore questions of aesthetics cultural anxiety cultural control and how to realise intentions in performance practice World Ocean Assessment Alan Simcock,2017-04-17 This United Nations report examines the current state of knowledge of the world s oceans for policymakers and provides a reference for marine science courses **International Water Law and the Quest for Common Security** Bjorn-Oliver Magsig,2015-03-24 The world s freshwater supplies are increasingly threatened by rapidly increasing demand and the impacts of global climate change but current approaches to transboundary water management are unsustainable and may threaten future global stability and international security The absence of law in attempts to address this issue highlights the necessity for further understanding from the legal perspective This book provides a fresh conceptualisation of water security developing an operational methodology for identifying the four core elements of water security which must be addressed by international law availability access adaptability and ambit The analysis of the legal framework of transboundary freshwater management based on this contemporary understanding of water security reveals the challenges and shortcomings of the current legal regime In order to address these shortcomings the present mindset of prevailing rigidity and state centrism is challenged by examining how international legal instruments could be crafted to advance a more flexible and common approach towards transboundary water interaction The concept of considering water

security as a matter of regional common concern is introduced to help international law play a more prominent role in addressing the challenges of global water insecurity Ways for implementing such an approach are proposed and analysed by looking at international hydrogeopolitics in Himalayan Asia The book analyses transboundary water interaction as a case study for advancing public international law in order to fulfil its responsibility of promoting international peace and security

Thirsty Planet Constance Elizabeth Hunt,2013-07-18 By the year 2025 nearly 2 billion people will live in regions experiencing absolute water scarcity In the face of this emerging crisis how should the planet's water be used and managed Current international policy sees nature competing with human uses of water Hunt takes issue with this perspective She suggests that nature is the source of water and only by making the conservation of nature an absolute priority will we have the water we need for human use in future It is essential therefore to manage water in ways that maintain the water cycle and the ecosystems that support it This book looks at the complexity of the problem It provides a wide array of ideas information case studies and ecological knowledge often from remote corners of the developing world that could provide an alternative vision for water use and management at this critical time Essential and compelling reading for students on courses related to water resource management and development water managers and decision makers and non specialists with an interest in global water issues

State of the World's Cities 2012/2013 Un Habitat, 2013-10-23 The city is the home of prosperity It is the place where human beings find satisfaction of basic needs and access to essential public goods The city is also where ambitions aspirations and other material and immaterial aspects of life are realized providing contentment and happiness It is a locus at which the prospects of prosperity and individual and collective well being can be increased However when prosperity is restricted to some groups when it is used to pursue specific interests or when it is a justification for financial gains for the few to the

detriment of the majority the city becomes the arena where the right to shared prosperity is claimed and fought for As people in the latter part of 2011 gathered in Cairo s Tahrir Square in Madrid s Puerta del Sol in front of London s St Paul s cathedral or in New York s Zuccotti Park they were not only demanding more equality and inclusion they were also expressing the need for prosperity to be shared across all segments of society What this new edition of State of the World s Cities shows is that prosperity for all has been compromised by a narrow focus on economic growth UN Habitat suggests a fresh approach to prosperity beyond the solely economic emphasis including other vital dimensions such as quality of life adequate infrastructures equity and environmental sustainability The Report proposes a new tool the City Prosperity Index together with a conceptual matrix the Wheel of Prosperity both of which are meant to assist decision makers to design clear policy interventions The Report advocates for the need of cities to enhance the public realm expand public goods and consolidate rights to the commons for all as a way to expand prosperity This comes in response to the observed trend of enclosing or restricting these goods and commons in enclaves of prosperity or depleting them through unsustainable use The Report maps out major policy steps to promote a new type of city the city of the twenty first century that is a good people centred city One that is capable of integrating the tangible and more intangible aspects of prosperity and in the process shedding off the inefficient unsustainable forms and functionalities of the city of the previous century By doing this UN Habitat plays a pivotal role in ensuring that urban planning legal regulatory and institutional frameworks become instruments of prosperity and well being
