Theoretical Methodological Developments Processability Acquisition:

Theoretical and Methodological Developments in Processability Theory Kristof Baten, Aafke Buyl, Katja Lochtman, Mieke Van Herreweghe, 2015-12-15 This edited volume is devoted to expanding the theoretical basis of Processability Theory a theory of second language development that combines insights in the way speakers generate language and store their language knowledge to predict describe and explain developmental sequences Pienemann 1998 2005 The aim of the book is to provide a forum for new perspectives focusing on three intersections 1 the interface between morpho syntax and discourse pragmatics semantics 2 constraints on processing and receptive processing and 3 developments in instructed second language learning Each part also includes a response paper in which the new perspectives in terms of the theoretical challenges and or the empirical results of the preceding chapters are discussed This collection of articles and response papers will be very relevant to students and researchers interested in theoretical aspects of second language acquisition and more specifically Processability Theory and clearly indicates that the field is lively and open Widening Contexts for Processability Theory Anke Lenzing, Howard Nicholas, Jana Roos, 2019-11-15 This book explores relationships between Processability Theory approaches and other approaches to SLA It is distinctive in two ways It offers PT insiders a way to see connections between their familiar traditions and theories with other ways of working Parallel to this it offers readers who work in other traditions ways of connecting with a research tradition that makes specific testable claims about second language acquisition processes These dual perspectives mean that both beginning and established SLA researchers as well as those seeking to connect their work with views of language learning will find something of interest Studies of multiple languages and multiple aspects of language are included Chapters cover areas as diverse as literacy language comprehension language attrition and language testing *Processability and Language Acquisition in the Asia-Pacific Region* Satomi Kawaguchi, Bruno Di Biase, Yumiko Yamaguchi, 2023-02-02 This PALART volume makes an original addition to the Series as it opens a stimulating window on the Asia Pacific region of the world by bringing together a great deal of empirical and theoretical new work in Second Language Acquisition within the Processability Theory PT framework Readers will be pleasantly surprised to be able to access within one publication so much novel and overview information on SLA while maintaining its focus on PT its theoretical developments including its 2005 Pienemann et al and 2015 Bettoni Di Biase extensions and how they relate to PT's foundation work Pienemann 1998 as well as its applications to language learning and teaching in Japanese Chinese Hindi Malay and English in countries of the Asia Pacific region including Australia This volume demonstrates the vitality and the dynamic nature of PT and its potential as a tool for understanding SLA both theory and practice **Theories in Second Language Acquisition** Bill VanPatten, Gregory D. Keating, Stefanie Wulff, 2025-07-03 This fourth edition of the best selling Theories in Second Language Acquisition surveys the major theories and frameworks currently used in second language acquisition SLA research serving as an ideal introductory text for graduate students in

SLA and language teaching Designed to provide a consistent and coherent presentation for those seeking a basic understanding of the theories and frameworks that underlie contemporary SLA research each chapter focuses on a single theory Chapters are written by leading scholars in the field and incorporate a basic foundational description of the theory relevant data or research models used with this theory common misunderstandings and a sample study from the field to show the theory in practice New to this fully revised edition is the incorporation of a new theoretical framework to replace several lesser used theories A key work in the study of second language acquisition this volume will be useful to students of linguistics language and language teaching and to researchers as a guide to theoretical work outside their respective domains

Language Processing and Second Language Development Manfred Pienemann, 1998-01-01 Aims to provide a systematic perspective on some central psychological mechanisms underlying the spontaneous production of interlanguage IL speech The text develops a framework that represents a theory of processability of grammatical structures referred to as Processability Theory

The Routledge Handbook of Second Language Acquisition Susan M. Gass, Alison Mackey, 2013-06-17 This handbook brings together 50 leading international figures in the field to produce a state of the art overview of second language acquisition

Teachability and Learnability across Languages Ragnar Arntzen, Gisela Håkansson, Arnstein Hjelde, Jörg-U. Keßler, 2019-06-15 Teachability and Learnability across Languages addresses key issues in second foreign and heritage language acquisition as well as in language teaching Focusing on a Processability Theory perspective it brings together empirical studies of language acquisition language teaching and language assessment For the first time a research timeline for the role of instruction in language learning is presented showing how the field of second language acquisition SLA research has developed over the last four decades since Pienemann's work on learnability and syllabus construction over the 1980s The book includes studies of child and adult second as well as foreign language acquisition research covering a wide range of target languages including English German Hungarian Japanese Norwegian Polish Spanish Swedish and Turkish In addition future extensions of PT are discussed This volume is designed for advanced students in international programs of SLA and Applied Linguistics as well as for SLA researchers and second and foreign language teachers

Research in Second Language Acquisition Dagmar Keatinge, Jörg-U. Keßler, 2009-05-05 Research in Second Language Acquisition Empirical Evidence Across Languages provides an overview of current research within the Processability Theory framework Pienemann 1998 2005 The articles in this volume combine a more theoretical approach in order to further extend the theory and studies utilizing PT to further investigate bilingual language acquisition and language development in natural and institutional settings Taking these different aspects into consideration this volume is organised in two parts Part 1 Second Language Processing Contributions to Theory Development contains a number of papers discussing the inclusion of further theoretical aspects into PT focusing on English as a second language In Part 2 Second Language Grammars across Languages PT is applied to a number of typologically different languages and contexts

Processability

Approaches to Second Language Development and Second Language Learning Jörg-U. Keßler, 2009-03-26 A

fundamental issue in second language acquisition research and in applied linguistics is the question of how learners acquire a second language Today it is general knowledge that any second language learning follows certain theoretically established and empirically supported developmental sequences Based on Processability Theory Pienemann 1998 and 2005 one can diagnose current states of individual learners second language development Knowing about the path of second language development provides important insights into what learners are ready to acquire in the second language at a given point in time This can support second language learning both in natural and instructional settings Pienemann's Processability Theory PT provides a well researched and empirically substantiated framework to explain the developmental sequences in second language learning across languages Taking Pienemann 1998 and 2005 as the point of departure the chapters of this book apply test and extend PT The book is organised in four parts I Introduction II Current Theoretical Issues within the PT Framework III Applying PT to the Second Language Classroom and IV Work in Progress within the PT Framework

Grammatical development in second languages. Exploring the boundaries of Processability Theory Camilla Bettoni, Bruno Di Biase, 2015-08-07 Processability Theory is Manfred Pienemann's highly cited psycholinguistic theory of Second Language Acquisition offering a transitional paradigm that accounts specifically for the development of grammar This volume expands on PT's explicit falsifiable and universal definition of developmental stages and proposes a fresh interpretation of earlier achievements b explicit treatment of the development of syntax and its interface with discourse pragmatic motivations and c numerous pointers for future studies Part I of the volume introduces the editors' new approach to the theory In part II it offers a finer grained staging of L2 development with reference to three typologically different languages English Italian and Japanese Part III explores languages Russian Serbian issues Spanish differential object marking German V2 in declaratives vs questions populations L2 in autistic learners and applications L2 teaching through CALL not previously treated in PT

The Production-Comprehension Interface in Second Language Acquisition Anke Lenzen, 2021-01-14 Examining a key issue in second language acquisition SLA research this book explores the relation between second language L2 production and comprehension at the level of processing The central question underlying this interface is the relationship between grammatical encoding and decoding namely are the two modalities of production and comprehension subserved by different types of processors or by the same syntactic processing module Proposing an Integrated Encoding Decoding Model of SLA Anke Lenzen presents the results of a comprehensive empirical study to demonstrate the extent to which the two modalities rely on shared representations and/or shared processes Through this detailed analysis The Production-Comprehension Interface in Second Language Acquisition sheds new light on the cognitive architecture of human language processing and offers a deeper understanding of the mechanisms at work in the L2 acquisition process

Second Language Learning Theories Rosamond Mitchell, Florence Myles, Emma Marsden, 2019-01-21

Written by a team of leading experts working in different SLA specialisms this fourth edition is a clear and concise introduction to the main theories of second language acquisition SLA from multiple perspectives comprehensively updated to reflect the very latest developments SLA research in recent years The book covers all the main theoretical perspectives currently active in SLA and sets each chapter within a broader framework Each chapter examines the claims and scope of each theory and how each views language the learner and the acquisition process supplemented by summaries of key studies and data examples from a variety of languages Chapters end with an evaluative summary of the theories discussed Key features to this fourth edition include updated accounts of developments in cognitive approaches to second language L2 learning the implications of advances in generative linguistics and the social turn in L2 research with re worked chapters on functional sociocultural and sociolinguistic perspectives and an entirely new chapter on theory integration in addition to updated examples using new studies Second Language Learning Theories continues to be an essential resource for graduate students in second language acquisition

Understanding Second Language Processing Bronwen Patricia Dyson, Gisela Håkansson, 2017-05-24 This book aims to help researchers and teachers interested in language processing and Processability Theory PT to understand this theory and its applications PT is an influential account of second language processing which hypothesizes that due to the architecture of language processing learners acquire second languages in developmental stages This book lays out PT's predictions and research on the development of diverse target languages particularly English and Scandinavian languages by learners of various categories It discusses the typological issues facing PT and its contribution to an understanding of variation and cognitive constraints on pedagogy However the book also raises a critical eye to the literature which after almost twenty years of evolution requires explanation clarification and in some cases extension Why do some phenomena belong to different stages in different languages Why are important types of variation under represented Is teaching as constrained as proposed in PT

Computer-Assisted Language Learning: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2019-01-04 In a diverse society the ability to cross communication barriers is critical to the success of any individual personally professionally and academically With the constant acceleration of course programs and technology educators are continually being challenged to develop and implement creative methods for engaging English speaking and non English speaking learners Computer Assisted Language Learning Concepts Methodologies Tools and Applications is a vital reference source that examines the relationship between language education and technology and the potential for curriculum enhancements through the use of mobile technologies flipped instruction and language learning software This multi volume book is geared toward educators researchers academics linguists and upper level students seeking relevant research on the improvement of language education through the use of technology

Cross-linguistic Aspects of Processability Theory Manfred Pienemann, 2005-01-01 Seven years ago Manfred Pienemann proposed a novel psycholinguistic theory of language development Processability Theory PT This

volume examines the typological plausibility of PT Focusing on the acquisition of Arabic Chinese and Japanese the authors demonstrate the capacity of PT to make detailed and verifiable predictions about the developmental schedule for each language This cross linguistic perspective is also applied to the study of L1 transfer by comparing the impact of processability and typological proximity The typological perspective is extended by including a comparison of different types of language acquisition The architecture of PT is expanded by the addition of a second set of principles that contributes to the formal modeling of levels of processability namely the mapping of argument structure onto functional structure in lexical mapping theory This step yields the inclusion of a range of additional phenomena in the processability hierarchy thus widening the scope of PT

Developing, Modelling and Assessing Second Languages Jörg-U. Keßler, Anke Lenzen, Mathias Liebn, 2016-06-29 This edited volume brings together the work of a number of researchers working in the framework of Processability Theory PT a psycholinguistic theory of second language acquisition SLA Pienemann 1998 2005 The aim of the volume is two fold It engages with current issues in both theory development and theory application and focuses on theoretical developments within the framework of PT as well as issues related to second language teaching and assessment In coordinating approaches to addressing both theoretical and applied aspects of SLA this volume aims at bridging the gap between theory and practice It also reflects the richness of debate within the field of PT based research The volume is intended for postgraduate students SLA researchers as well as language teachers As of January 2019 this e book is freely available thanks to the support of libraries working with Knowledge Unlatched

The Development of Language Processing Strategies Reiko Mazuka, 2014-05-12 Ever since the notion of explanatory adequacy was promoted by Chomsky in his 1965 Aspects linguists and psycholinguists have been in pursuit of a psychologically valid theory of grammar To be explanatorily adequate a theory of grammar can not only describe the general characteristics of a language but can also account for the underlying psychological processes of acquiring and processing that language To be considered psychologically valid a grammar must be learnable by ordinary children the problem of acquisition and must generate sentences that are parsable by ordinary people the problem of processing Ultimately the fields of language acquisition and processing are concerned with the same goal to build a theory that accounts for grammar as it is acquired by children accessed in comprehension and production of speech and represented within the human mind Unfortunately these two fields developed independently and have rarely been well informed about each other s concerns Both have experienced past difficulties as a result Recently new models have been developed with full consideration to cross linguistic diversity Gone are many of the basic assumptions of conventional models and in their place a variety of innovative and more flexible assumptions have emerged However in their attempt to address cross linguistic issues these processing models have yet to fully address the developmental challenge How can a child without a stable grammar process language and still manage to acquire new grammar This book attempts to develop a model of language processing that addresses both cross linguistic and developmental challenges It proposes to link

the setting of a basic configurational parameter during language acquisition to the different organization of processing strategies in left and right branching languages Based primarily on Mazuka's doctoral dissertation this volume incorporates various responses to the original proposal as well as the author's responses to the comments
