Smith, 2016-03-22 By the year 1900 most of physics seemed to be encompassed in the two great theories of Newtonian mechanics and Maxwell's theory of electromagnetism Unfortunately there were inconsistencies between the two theories that seemed irreconcilable Although many physicists struggled with the problem it took the genius of Einstein to see that the inconsistencies were concerned not merely with mechanics and electromagnetism but with our most elementary ideas of space and time In the special theory of relativity Einstein resolved these difficulties and profoundly altered our conception of the physical universe Readers looking for a concise well written explanation of one of the most important theories in modern physics need search no further than this lucid undergraduate level text Replete with examples that make it especially suitable for self study the book assumes only a knowledge of algebra Topics include classical relativity and the relativity postulate time dilation the twin paradox momentum and energy particles of zero mass electric and magnetic fields and forces and more **Elementary Principles in Statistical Mechanics** J. Willard Gibbs, 2014-09-22 First book to unite the works of Clausius Maxwell Boltzmann and the author himself Gibbs lucid advanced level text remains a valuable collection of fundamental equations and principles 1902 edition **The Analytical Foundations of Celestial Mechanics** Aurel Wintner, 2014-06-18 With this 1941 monograph Aurel Wintner joined Poincaré Birkhoff and others in placing celestial mechanics on a sound mathematical basis The product of many years of work by the author it remains an extremely valuable contribution to the literature of this field Starting with

a review of dynamical operations the treatment advances to local and non local questions dynamical systems the problem of two bodies and the problem of several bodies and an introduction to the restricted problem Suitable for advanced undergraduates and graduate students of physics the text is amply supplemented by a substantial section of notes and references in which a great deal of the historical literature from which it derives is discussed
