Disability & the Politics of Education Susan Lynn Gabel, Scot Danforth, 2008 Disability and the Politics of Education An International Reader is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education For nearly two decades global attention has been given to education as a human right through global initiatives such as Education for All EFA and the Salamanca Statement Yet according to UNESCO reaching the goals of EFA remains one of the most daunting challenges facing the global community Today millions of the world's disabled children cannot obtain a basic childhood education particularly in countries with limited resources Even in the wealthiest countries many disabled children and youth are educationally segregated from the nondisabled particularly if they are labeled with significant cognitive impairment International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness This McDonaldization of education reproduces the labeling resource allocation and social dynamics long criticized in disability studies The authors in this volume explore these subjects and other complexities of disability and the politics of education In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches

Rethinking Inclusive Education: The Philosophers of Difference in Practice Julie Allan, 2007-11-07 One of the important responsibilities that advocates of inclusion need to continually practise is that of self criticism This includes examining and re examining the assumptions informing our perspectives the concepts that we use including inclusive education and our intentions especially in relation to the question of change We need to beware of the danger of unexamined orthodoxies the possibilities of adopting inclusive language with little if any changes in our thinking and practice and a sterile and insensitive position with regard to the pursuit of new or alternative ideas In this very important book Allan powerfully reminds us of the necessity and centrality of these concerns and provides a direct perceptive and thoughtful examination and critique of the varied barriers to the task of how to make inclusion happen Allan challenges the reader to step back and re examine the rationale for inclusion through an alternative mindset She challenges the varied attacks upon inclusion including those in the education business to stop using economic it costs too much and pedagogical it is bad for the other children in the class and traumatic for the disabled children and social just too much for the teacher's workload reasons for closing the door and doing the right thing and those who argue that inclusion was an experiment that did not work
