studies **Construction, Coherence and Connotations** Pierre J. Jordaan, Nicholas P. L. Globalism in the Middle Ages and the Early Modern Age Albrecht Classen, 2023-09-05 Although it is fashionable among modernists to claim that globalism emerged only since ca 1800 the opposite can well be documented through careful comparative and transdisciplinary studies as this volume demonstrates offering a wide range of innovative perspectives on often neglected literary philosophical historical or medical documents Texts images ideas knowledge and objects migrated throughout the world already in the pre modern world even if the quantitative level compared to the modern world might have been different In fact by means of translations and trade for instance global connections were established and maintained over the centuries Archetypal motifs developed in many literatures indicate how much pre modern people actually shared But we also discover hard core facts of global economic exchange import of exotic medicine and on another level intensive intellectual debates on religious issues Literary evidence serves best to expose the extent to which contacts with people in foreign countries were imaginable often desirable and at times feared of course The pre modern world was much more on the move and reached out to distant lands out of curiosity economic interests and political and military concerns Diplomats crisscrossed the continents and artists poets and craftsmen traveled widely We can identify for instance both the Vikings and the Arabs as global players long before the rise of modern globalism so this volume promises to rewrite many of our traditional notions about pre modern worldviews economic conditions and the literary sharing on a global level as perhaps best expressed by the genre of the fable

Systematically Analysing Indirect Translations James Luke

Hadley, 2023-05-11 This volume applies digital humanities methodologies to indirect translations in testing the concatenation effect hypothesis The concatenation effect hypothesis suggests that indirect translations tend to omit or alter identifiably foreign elements and also tend not to identify themselves as translations The book begins by introducing the methodological framework to be applied in the chapters that follow and providing an overview of the hypothesis The various chapters focus on specific aspects of the hypothesis that relate to specific linguistic stylistic and visual features of indirect translations These features provide evidence that can be used to assess whether and to what extent the concatenation effect is in evidence in any given example The overarching aim of the book is not to demonstrate or falsify the veracity of the concatenation effect hypothesis or to give any definitive answers to the research questions posed Rather the aim is to pique

the curiosity and provoke the creativity of students and researchers in all areas of translation studies who may never have considered indirect translation as relevant to their work LXX-Isaiah as Translation and Interpretation Ronald L. Troxel, 2008 This book offers a fresh understanding of how Isaiah was translated into Greek arguing that the translator attempted a cohesive representation of Isaiah for his Greek speaking co religionists utilizing interpretative ploys applied to Homer by the Alexandrian grammatikoi *Translator Positioning in Characterisation* Minru Zhao, 2023-04-28 Applying Systemic Functional Linguistics SFL to Descriptive Translation Studies DTS to three translations of a classic Chinese text Zhao proposes a new model for linking translator positioning with translational norms in the target culture Zhao combines the Appraisal model from SFL with a characterisation model to describe the role of translator positioning in character construction Looking at three different translations of the classic Chinese novel Luotuo Xiangzi she uses corpus tools to compare the opening and ending chapters of each translation identifying textual patterns of translator positioning She then analyses and compares the cover designs of the translated novels and reconstructs the translational norms governing the translator's positioning in characterisation In doing so she contributes to DTS by developing a systematic and consistent framework to analyse verbal and visual elements in translated novels Her multimodal analysis also provides insights into the broader patterns of translated language An insightful read for scholars interested in both theoretical and empirical approaches to translation studies Song and Significance Dinda L. Gorrée, 2005 Vocal translation is an old art but the interpretive feeling skill and craft have expanded into a relatively new area in translation studies Vocal translation is the translation of the poetic discourse in the hybrid art of the musicopoetic or poeticomusical forms shapes and skills This symbiotic construct harmonizes together the conflicting roles of music and language in face to face singing performances In opera folksong hymn and art song as well as in operetta musical song and popular song we have musical genres allied to a libretto with lyrical text A libretto is a linguistic text which is a pre existing work of art but is subordinated to the musical text The essays in this volume provide interpretive models for the juxtaposition of different orders of the singing sign events in different languages extending the meaning and range of the musical and literary concepts and putting the mixed signs to a true and false test
