Transportation For Livable Cities:

Transportation for Livable Cities Vukan R. Vuchic, 1999 The twenty first century finds civilization heavily based in cities that have grown into large metropolitan areas Many of these focal points of human activity face problems of economic inefficiency environmental deterioration and an unsatisfactory quality of life problems that go far in determining whether a city is livable A large share of these problems stems from the inefficiencies and other impacts of urban transportation systems The era of projects aimed at maximizing vehicular travel is being replaced by the broader goal of achieving livable cities economically efficient socially sound and environmentally friendly This book explores the complex relationship between transportation and the character of cities and metropolitan regions Vukan Vuchic applies his experience in urban transportation systems and policies to present a systematic review of transportation modes and their characteristics Transportation for Livable Cities dispels the myths and emotional advocacies for or against freeways rail transit bicycles and other modes of transportation The author discusses the consequences of excessive automobile dependence and shows that the most livable cities worldwide have intermodal systems that balance highway and public transit modes while providing for pedestrians bicyclists and paratransit Vuchic defines the policies necessary for achieving livable cities the effective implementation of integrated intermodal transportation systems

Coyle,2011-05-12 Many of today s communities face an unprecedented struggle to adapt and maintain their environmental economic and social well being in an era beleaguered by fiscal constraints uncertainty about energy prices and supplies rapid demographic shifts and accelerated climate impacts This step by step guidebook for urban planners and urban designers explains how to create and implement an actionable plan for making neighborhoods communities and regions more environmentally healthy resource conserving and economically resilient *Sustainable and Resilient Communities* delineates measures for repairing retrofitting and transforming our built environments and supporting systems *Transportation and Sustainable Communities Initiative* ,1999 [Reauthorization of Surface Transportation Programs](#) United States. Congress. House. Committee on Public Works and Transportation. Subcommittee on Surface Transportation,1991 **Handbook of Public Transport Research** Graham Currie,2021-04-30 Providing a comprehensive overview and analysis of the latest research in the growing field of public transport studies this Handbook looks at the impact of urbanisation and the growth of mega cities on public transport Chapters examine the significant challenges facing the field that require new and original solutions including congestion and environmental relief and the social equity objectives that justify public transport in cities **Silicon Valley Rapid Transit Corridor** ,2010 *Connecting Transportation Decision*

Making with Responsible Land Use, 2008 Connecting Transportation Decision Making with Responsible Land Use State and Regional Policies Programs and Incentives highlights a growing number of state and regional initiatives aimed at curbing unsustainable land use patterns through the use of targeted transportation funding Just as a disconnect between transportation decision making and land use planning can develop and continue sprawling urban conditions the linkage between the two processes can in contrast foster responsible growth This report is intended to provide planning agencies at various levels of government with tools that can be used to strengthen the connection between transportation and land use planning This report showcases 17 jurisdictions in the United States that have developed policies programs and incentives to connect transportation funding with various smart growth efforts These jurisdictions are both state governments and regional planning agencies The programs reviewed have had varying levels of success and have implemented a range of approaches in order to meet program goals This variety of approaches shows that there is no single formula for achieving a strong linkage between transportation funding and responsible land use planning These various approaches show that success in linking transportation planning with land use decision making most likely depends on creating context specific strategies

Impact of Transportation Policy on the American Landscape United States. Congress. House. Committee on Interior and Insular Affairs. Subcommittee on Energy and the Environment, 1991

Urban Transport Environment and Equity Eduardo Alcantara Vasconcellos, 2014-05-01 Traditional transport planning has generated transport systems that propagate an unfair distribution of accessibility and have environmental and safety issues This book highlights the importance of social and political aspects of transport policy and provides a methodology to support this approach It emphasizes the importance of co ordinating urban transport and traffic planning and addresses the major challenge of modifying the building and use of roads The author makes suggestions for innovative and radical new measures towards an equitable and sustainable urban environment
