Valparaíso School Or Open City Group:

Valparaíso School Rodrigo Pérez de Arce, Fernando Pérez Oyarzún, 2003 The School of Architecture at the Catholic University of Valparaíso Chile underwent a transformation in 1952 when a group of young architects led by Alberto Cruz began teaching at the school The Valparaíso School as it became known acquired an international reputation for its radical stance and its commitment to dialogue between architects and other disciplines From 1970 onwards it began to focus much of its research and design activity on the Open City project which had been created by a group of architects artists and poets with a vision of a city with no master plan no imposed ordering devices and no hierarchical networks of infrastructure Originally set up as a laboratory type environment this alternative community has since become a place of residence and work for like minded people Valparaíso School Open City Group provides an insight into this radical experiment in urban development through a series of essays and photographs BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved Valparaíso School Raúl Rispa, Rodrigo Pérez de Arce, Fernando Pérez Oyarzún, 2003-09-02 The Valparaíso School as it became known acquired an international reputation for its radical stance and its commitment to dialogue between architects and other disciplines Since 1970 the Valparaíso School has focused much of its research and design activity on the Open City Ciudad Abierta project created by a group of architects artists poets and engineers with a vision of a city with no master plan no imposed ordering devices and no hierarchical networks of infrastructure Originally set up as a laboratory type environment this alternative community has since become the place of residence and work for many people Valparaíso School Open City Group provides insight into this radical experiment in urban development through a series of essays and photographs *Towards a New European Bauhaus—Challenges in Design Education* Manuel Blanco Lage, Oya Atalay Franck, Nicolas Marine, Manuel Rodrigo de la O Cabrera, 2024-01-29 This book gathers the latest advances and innovations in the field of architectural and design education as presented at the 2022 annual conference of the European Association for Architectural Education EAAE AC Towards a New European Bauhaus Challenges in Design Education hosted by ETSAM Madrid School of Architecture of the Universidad Politécnica de Madrid in Madrid Spain on August 31 September 2 2022 Chapter Towards a Future Past The New and the European in the Bauhaus is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com) Modern Architecture in Latin America Luis E. Carranza, Fernando Luiz Lara, 2015-01-05 Designed as a survey and focused on key examples and movements arranged chronologically from 1903 to 2003 this is the first comprehensive history of modern architecture in Latin America in any language Runner up University Co-op Robert W Hamilton Book Award 2015 Modern Architecture in Latin America Art Technology and Utopia is an introductory text on the issues polemics and works that represent the complex processes of political economic and cultural modernization in the twentieth century The number and types of projects varied greatly from country to country but as a whole the region produced a significant body of architecture

that has never before been presented in a single volume in any language Modern Architecture in Latin America is the first comprehensive history of this important production Designed as a survey and focused on key examples paradigms arranged chronologically from 1903 to 2003 this volume covers a myriad of countries historical social and political conditions and projects developments that range from small houses to urban plans to architectural movements The book is structured so that it can be read in a variety of ways as a historically developed narrative of modern architecture in Latin America as a country specific chronology or as a treatment of traditions centered on issues of art technology or utopia This structure allows readers to see the development of multiple and parallel branches historical strands of architecture and at times their interconnections across countries The authors provide a critical evaluation of the movements presented in relationship to their overall goals and architectural transformations

Modern Architecture and the Sacred Ross Anderson, Maximilian Sternberg, 2020-11-26 This edited volume Modern Architecture and the Sacred presents a timely reappraisal of the manifold engagements that modern architecture has had with the sacred It comprises fourteen individual chapters arranged in three thematic sections Beginnings and Transformations of the Modern Sacred Buildings for Modern Worship and Semi Sacred Settings in the Cultural Topography of Modernity The first interprets the intellectual and artistic roots of modern ideas of the sacred in the post Enlightenment period and tracks the transformation of these in architecture over time The second studies the ways in which organized religion responded to the challenges of the new modern self understanding and then the third investigates the ways that abstract modern notions of the sacred have been embodied in the ersatz sacred contexts of theatres galleries memorials and museums While centring on Western architecture during the decisive period of the first half of the 20th century a time that takes in the early musings on spirituality by some of the avant garde in defiance of Sachlichkeit and the machine aesthetic the volume also considers the many varied appropriations of sacrality that architects have made up to the present day and also in social and cultural contexts beyond the West

Chilean Modern Architecture Since 1950 Fernando Pérez Oyarzun, Rodrigo Pérez de Arce, Horacio Torrent, 2010 Chilean architecture along with that of Sao Paulo and Mexico City sets a benchmark for the intersection of modernism with vernacular influences in Latin America Culture landscape and the geology of this earthquake prone region have all served as important filters for the practice of post 1950s design in Chile This volume introduces the modern architecture of Chile to readers in the United States Looking primarily at domestic architecture as a lens for studying the larger movement Fernando Perez Oyarzun considers the relationship between theory and practice in Chile As he shows in his chapter during the early 1950s the School of Valparaíso offered the possibility of developing experimental projects accompanied by theoretical statements There visual artists considered poetry the starting point of modern architecture and contributed their radically modern views to the design process of the project Next Rodrigo Perez de Arce examines the material context of architecture in Chile the availability of materials and technologies the frequency of violent earthquakes and related seismic activity and the nation's

craft based labor intensive building practices He applies these considerations to a series of case studies to demonstrate how they interact with cultural historical economic and even political influences In the book s final chapter Horacio Torrent reviews the interplay between the architectonic culture and modern shapes that came into sharp focus in the 1950s in Chile In another series of case studies he highlights the formation of a system of concepts thought processes instruments and values that have given Chilean architecture a certain singularity during the last fifty years

Urban Transformations and the Architecture of Additions Rodrigo Perez de Arce,2014-08-07 Rodrigo Perez de Arce s essay Urban Transformations and Architectural Additions was published during the formative stages of Post Modernism at the point where theory was becoming seriously established Jencks first essays formalising the term Post Modernism in architecture and the revised Learning from Las Vegas were published the previous year In planning terms modernism had become associated with comprehensive redevelopment and forms of urban organisation that ignored context history and any sense of tradition De Arce considered the essential nature of buildings and the richness of historic urban form and explored how robust that essence was over time He looked at the value of essential remnants and rich complexities in maintaining a sense of continuity and relevance Having explored the adaptation process in history de Arce went on to see how such a process might be simulated in contemporary cities with modern buildings using additions and layers to change them from objects in infinite windswept space to being part of a rich urban fabric which described urban place To do this he used concrete examples housing schemes by James Stirling new government centres in Chandigarh and Dacca and more prosaic 60 s housing blocks The paper had a fundamental influence on the way that architects and planners thought about the nature of cities as dynamic organisms that were tangible to human beings completely opposite to the systems thinking of the time It contributed to ideas about the importance of street place and city block which influenced so much recent regeneration practice As we enter a phase of development where the reuse and adaptation of existing buildings is becoming paramount from both an economic and sustainable point of view Perez de Arce s paper gives important insights into how to think about the process positively

Spatial Theories for the Americas Fernando Luiz Lara,2024-11-19 To study the built environment of the Americas is to wrestle with an inherent contradiction While the disciplines of architecture urban design landscape and planning share the fundamental belief that space and place matter the overwhelming majority of canonical knowledge and the vernacular used to describe these disciplines comes from another very different continent With this book Fernando Luiz Lara discusses several theories of space drawing on cartography geography anthropology and mostly architecture and proposes counterweights to five centuries of Eurocentrism The first part of Spatial Theories for the Americas offers a critique of Eurocentrism in the discipline of architecture problematizing its theoretical foundation in relation to the inseparability of modernization and colonization The second part makes explicit the insufficiencies of a hegemonic Western tradition at the core of spatial theories by discussing a long list of authors who have thought about the Americas To overcome centuries of

Eurocentrism Lara concludes will require a tremendous effort but nonetheless we have the responsibility of looking at the built environment of the Americas through our own lenses Spatial Theories for the Americas proposes a fundamental step in that direction

Modern Architecture Graham Livesey, 2024-11-15 Modern Architecture The Basics examines technological stylistic socio political and cultural changes that have transformed the history of architecture since the late 18th century Broad definitions of modernity and postmodernity introduce the book which comprises 24 short thematic chapters looking at the concepts behind the development of modern and postmodern architecture These include major historical movements key figures and evolving building typologies There is also an emphasis on the changing city during the 19th and 20th centuries Approaches to representation and its impacts on architecture are studied along with the changing global role of architecture as cultural expression The book introduces new topics including gender race postcolonialism and indigeneity An undaunting contemporary and inclusive account of modern architectural history this is a must read for all students of architecture as well as those outside the discipline approaching the subject for the first time

Modern Architecture: A Critical History (Fifth) (World of Art) Kenneth Frampton, 2020-09-08 An extensively revised and updated edition of a bestselling classic on modern architecture and its origins by Kenneth Frampton Kenneth Frampton's highly acclaimed survey of modern architecture and its origins has been a classic since it first appeared in 1980 Starting with the cultural developments since 1750 that drove the modern movement moving through the creation of modern architecture and exploring the effects of globalization and the phenomenon of international celebrity architects this book is the definitive history of modern architecture For this extensively revised and updated fifth edition of Modern Architecture Frampton added new chapters exploring the ongoing modernist tradition in architecture while also examining the varied responses to the urgent need to build more sustainably and create structures that will withstand changing climates This new edition features completely redesigned interiors and an updated and expanded bibliography making this volume more indispensable than ever
