 1900 republished as *Wild Flowers An Aid to Knowledge of our Wild Flowers and their Insect Visitors* 1901 is a book written
 by nature writer Neltje Blanchan and published by Doubleday Page Company In order to aid the amateur botanist it used
 color to classify flowers noting that this made it easier for novices to identify specimens and that insects also used color to
 identify plants The book also explored the relationship between flowers and the insects that feed on their nectar using rather
 anthropomorphic language and discussed scientific questions of the time such as Sprengel's theory that orchids produce no
 nectar Her description of the flowers also referred to relevant poetry and folklore Unlike her book *Bird Neighbors* the
 photographs by Henry Troth and A R Dugmore were taken directly from nature The New York Times wrote that this kind of a
 popular flower book has long been wanting in America *Wild Flowers / Nature's Garden* Neltje Blanchan, 2015-12-17
