The Mongol Empire Timothy May,2016-11-07 Covering the rise and fall of the Mongol Empire this essential reference presents the figures places and events that led this once beleaguered region to rise up to become the largest contiguous empire in history In the 13th century Chinggis Khan rose to power leading an empire of

a million people and defeating surrounding regions with much larger populations This compendium follows the achievements and failures of the Mongol Empire from the birth of Chinggis Khan in 1162 to the formation of the successor states that came from the dissolution of the world power in the 16th century the Yuan Empire in East Asia the Chaghatai Khanate in Central Asia the Ilkhanate in the Middle East and the Jochid or Kipchak Khanate in the Pontic Caspian Steppes known as the Golden Horde Through some 180 entries this two volume set covers every aspect of Mongol civilization organizing content into eight sections government and politics organization and administration individuals groups and organizations key events military objects and artifacts and key places Each section is accompanied by an essay introducing the topic in the context of the Mongol Empire The work also includes a chronology a number of annotated primary documents and a bibliography

Power, Politics, and Tradition in the Mongol Empire and the Īlkhānate of Iran Michael Hope, 2016-09-22 This study provides a new interpretation of how political authority was conceived and transmitted in the Early Mongol Empire 1227-1259 and its successor state in the Middle East the Ilkhanate 1258-1335 Authority within the Mongol Empire was intimately tied to the character of its founder Chinggis Khan whose reign served as an idealized model for the exercise of legitimate authority amongst his political successors Yet Chinggis Khan's legacy was interpreted differently by the various factions within his army In the years after his death two distinct political traditions emerged within the Mongol Empire the collegial and the patrimonialist Each of these streams represented the economic and political interests of different groups within the Mongol Empire respectively the military aristocracy and the central government The supporters of both streams claimed to adhere to the ideal of Chinggisid rule but their different statuses within the Mongol community led them to hold divergent views of what constituted legitimate political authority Michael Hope's study details the origin of and the differences between these two streams of tradition analyzing the role that these streams played in the political development of the Mongol Empire and the Ilkhanate and assessing the role that ideological tension between the two streams played in the events leading up to the division of the Ilkhanate Hope demonstrates that the policy and identity of both the Early Mongol Empire and the Ilkhanate were defined by the conflict between these competing streams of Chinggisid authority Travel Fact and Travel Fiction Z. R. W. M. von Martels, 1994 Travel Fact and Travel Fiction contains 18 articles by different authors on important examples of travel writing from Classical Antiquity Herodotus until the first half of the nineteenth century Discussed are among others Herodotus Egeria Rubruck Marco Polo Columbus Joachim Du Bellay Busbequius Gryphius Goethe and Dickens Central themes are fiction literary tradition scholarly discovery and observation **The East and West in Late Medieval Travel Writings** Na Chang, 2024-10-07 This book traces the history of encounter between Eastern and Western cultures by closely examining a body of medieval travel writings penned or related by Europeans and by inhabitants of East Asia Whilst these texts are usually considered in the context of kindred European or Chinese literature this study will make a case for considering them as a common literature of medieval encounters with foreign people For the modern

historian writing in a world that so consciously thinks of itself as global these accounts offer a precious lens through which to enter into the world before globalization In particular the book shows that these narratives show the similarity in how Eastern and Western travellers thought and behaved in the face of difference and will show that individuals often held somewhat different views shaped by their particular experience or agendas than those of their government or of local cultural convention

East Meets West in the Middle Ages and Early Modern Times Albrecht Classen, 2013-09-03 This new volume explores the surprisingly intense and complex relationships between East and West during the Middle Ages and the early modern world combining a large number of critical studies representing such diverse fields as literary German French Italian English Spanish and Arabic and other subdisciplines of history religion anthropology and linguistics The differences between Islam and Christianity erected strong barriers separating two global cultures but as this volume indicates despite many attempts to Other the opposing side the premodern world experienced an astonishing degree of contacts meetings exchanges and influences Scientists travelers authors medical researchers chroniclers diplomats and merchants criss crossed the East and the West or studied the sources produced by the other culture for many different reasons As much as the theoretical concept of Orientalism has been useful in sensitizing us to the fundamental tensions and conflicts separating both worlds at least since the eighteenth century the premodern world did not quite yet operate in such an ideological framework Even though the Crusades had violently pitted Christians against Muslims there were countless contacts and a palpable curiosity on both sides both before during and after those religious wars
