There is one more thing to be noted about the above results. The results are based on the assumption that the data are stationary. However, the data are nonstationary. In order to test the stationarity of the data, we performed the Augmented Dickey-Fuller (ADF) test. The results of the ADF test are reported in Table 2. The results show that the data are nonstationary at the 1% level of significance. Therefore, the results of the ADF test are consistent with the results of the unit root test.
