**Transition: Protected Nature and Local People in Eastern and Central Europe** Saska Petrova, 2016-05-23 The role of local people in contemporary nature conservation practices is often poorly understood or neglected This book therefore examines questions of local participation at the nature society nexus within national parks in the transitional context of Central and Eastern Europe CEE The post 1990 reconfiguration of conservation paradigms in this part of the world has re opened various age old debates about the protection and administration of natural heritage Further complicating the situation has been the introduction of market based principles which has embedded the entire process in broader dynamics of neoliberalization and the capitalist space economy Providing an integrated perspective on why how and for whom nature conservation practices have been implemented in CEE this book sheds further light upon the mechanisms through which such practices both redefine and are affected by the everyday life of people living in national parks Offering a critical global review of the environmental motivations and power interests behind the creation of national parks as well as a typology of

the relations between local people and the dynamics of nature protection in them this work challenges the dichotomy between developed and developing countries that pervades much of the academic literature on nature protection Author Saska Petrova highlights the lessons that can be learnt by applying the experiences of local community participation in environmental management in CEE to other locations undergoing major systemic change in their environmental governance practices such as the low carbon transition that is currently unfolding at a global scale The Promise of Wilderness James Morton Turner, 2012-08-01 From Denali's majestic slopes to the Great Swamp of central New Jersey protected wilderness areas make up nearly twenty percent of the parks forests wildlife refuges and other public lands that cover a full fourth of the nation's territory But wilderness is not only a place It is also one of the most powerful and troublesome ideas in American environmental thought representing everything from sublime beauty and patriotic inspiration to a countercultural ideal and an overextension of government authority The Promise of Wilderness examines how the idea of wilderness has shaped the management of public lands since the passage of the Wilderness Act in 1964 Wilderness preservation has engaged diverse groups of citizens from hunters and ranchers to wildlife enthusiasts and hikers as political advocates who have leveraged the resources of local and national groups toward a common goal Turner demonstrates how these efforts have contributed to major shifts in modern American environmental politics which have emerged not just in reaction to a new generation of environmental concerns such as environmental justice and climate change but also in response to changed debates over old conservation issues such as public lands management He also shows how battles over wilderness protection have influenced American politics more broadly fueling disputes over the proper role of government individual rights and the interests of rural communities giving rise to radical environmentalism and playing an important role in the resurgence of the conservative movement especially in the American West Watch the book trailer <https://www.youtube.com/watch?v=Jsq6LAeYKk>

**Science and Stewardship to Protect and Sustain Wilderness Values**, 2003 The Seventh World Wilderness Congress met in Port Elizabeth South Africa in 2001 The symposium on science and stewardship to protect and sustain wilderness values was one of several symposia held in conjunction with the Congress The papers contained in this proceedings were presented at this symposium and cover seven topics state of knowledge on protected areas issues in South Africa traditional and ecological values of nature wilderness systems and approaches to protection protection of coastal marine and river lake wilderness spiritual benefits religious beliefs and new stories personal and societal values of wilderness and the role of science education and collaborative planning in wilderness protection and restoration *Walking Through Social Research* Charlotte Bates, Alex Rhys-Taylor, 2017-04-11 As an ethnographic method walking has a long history but it has only recently begun to attract focused attention By walking alongside participants researchers have been able to observe experience and make sense of a broad range of everyday practices At the same time the idea of talking and walking with participants has enabled research to be informed by the landscapes in which it takes place By sharing conversations in place and at the

participants pace sociologists are beginning to develop both a feel for and a theoretical understanding of the transient embodied and multisensual aspects of walking The result as this collection demonstrates is an understanding of the social world evermore congruent with people s lived experiences of it This interdisciplinary collection comprises a unique journey through a variety of walking methodologies The collection highlights a range of possibilities for enfolding sound smell emotion movement and memory into our accounts illustrating the sensuousness skill pitfalls and rewards of walking as a research practice Each chapter draws on original empirical research to present ways of walking and to discuss the conceptual practical and technical issues that walking entails Alongside feet on the ground the devices and technologies that make up hybrid research mobilities are brought to attention The collection is bookended by two short pedestrian essays that take the reader on illustrative urban walks suggesting routes through the city as well as ways in which the reader might make their own path through walking methods An innovative title Walking Through Social Research will be of interest to undergraduate and postgraduate students researchers and academics who are interested in Sociology Geography Cultural Studies Urban Studies and Qualitative Research Methods Wilderness Phillip Vannini, April Vannini, 2016-04-14 Wilderness provides a multidisciplinary introduction into the diverse ways in which we make sense of wilderness how we conceptualise it experience it interact with and imagine it Drawing upon key theorists philosophers and researchers who have contributed important knowledge to the topic this title argues for a relational and process based notion of the term and understands it as a keystone for the examination of issues from conservation to more than human relations The text is organized around themed chapters discussing the concept of wilderness and its place in the social imagination wilderness regulation and management access travel and tourism representation in media and arts and the use of wilderness for education exploration play and therapy as well as its parcelling out in parks reserves or remote wastelands The book maps out the historical transformation of the idea of wilderness highlighting its intersections with notions of nature and wildness and teasing out the implications of these links for theoretical debate It offers boxes that showcase important recent case studies ranging from the development of adventure travel and eco tourism to the practice of trekking to the changing role of technology use in the wild Summaries of key points further readings Internet based resources short videos and discussion questions allow readers to grasp the importance of wilderness to wider social cultural political economic historical and everyday processes Wilderness is designed for courses and modules on the subject at both postgraduate and undergraduate levels The book will also assist professional geographers sociologists anthropologists environmental and cultural studies scholars to engage with recent and important literature on this elusive concept **Conservation Concepts** Kurt Jax, 2023-10-31 This book provides a review of the multitude of conservation concepts both from a scientific philosophical and social science perspective asking how we want to shape our relationships with nature as humans and providing guidance on which conservation approaches can help us to do this Nature conservation is a contested terrain and there is not only one idea about what constitutes

conservation but many different ones which sometimes are conflicting Employing a conceptual and historical analysis this book sorts and interprets the differing conservation concepts with a special emphasis on narrative analysis as a means for describing human nature relationships and for linking conservation science to practice and to society at large Case studies illustrate the philosophical issues and help to analyse major controversies in conservation biology While the main focus is on Western ideas of conservation the book also touches upon non Western including indigenous concepts The approach taken in this book emphasises the often implicit strategic and societal dimensions of conservation concepts including power relations In finding a path through the multitude of concepts the book showcases that it is necessary to maintain the plurality of approaches in order to successfully address different situations and societal choices Overall this book highlights the very tension which conservation biology must withstand between science and society between what is possible and what we want individually or as a society or even more what is desirable Bringing some order into this multitude will support more efficient conservation and conservation biology This book will be of great interest to students and scholars studying nature conservation from a variety of disciplines including biology ecology anthropology sociology geography and philosophy It will also be of use to professionals wanting to gain an understanding of the broad spectrum of conservation concepts and approaches and when to apply them

*An Analysis of Frederick Jackson Turner's The Significance of the Frontier in American History* Joanna Dee Das, Joseph Tendler, 2017-07-05 Frederick Jackson Turner's 1893 essay on the history of the United States remains one of the most famous and influential works in the American canon That is a testament to Turner's powers of creative synthesis in a few short pages he succeeded in redefining the way in which whole generations of Americans understood the manner in which their country was shaped and their own character moulded by the frontier experience It is largely thanks to Turner's influence that the idea of America as the home of a sturdily independent people one prepared ultimately to obtain justice for themselves if they could not find it elsewhere was born The impact of these ideas can still be felt today in many Americans suspicion of big government in their attachment to guns even in Star Trek's vision of space as the final frontier Turner's thesis may now be criticised as limited in its exclusion of women and over stated in its focus on the western frontier That it redefined an issue in a highly impactful way and that it did so exceptionally eloquently cannot be doubted

*Wild Romanticism* Markus Poetzsch,Cassandra Falke,2021-03-30 Wild Romanticism consolidates contemporary thinking about conceptions of the wild in British and European Romanticism clarifying the emergence of wilderness as a cultural symbolic and ecological idea This volume brings together the work of twelve scholars who examine representations of wildness in canonical texts such as Frankenstein Northanger Abbey Kubla Khan Expostulation and Reply and Childe Harold's Pilgrimage as well as lesser known works by Radcliffe Clare Hilderlin P B Shelley and Hogg Celebrating the wild provided Romantic period authors with a way of thinking about nature that resists instrumentalization and anthropocentrism but writing about wilderness also engaged them in debates about the sublime and picturesque as aesthetic categories about gender and the cultivation of independence as natural and about the ability of natural forces to resist categorical or literal enclosure This book will be of great interest to students and scholars of Romanticism environmental literature environmental history and the environmental humanities more broadly

**Landscape and Identity in North America's Southern Colonies from 1660 to 1745** Catherine Armstrong,2016-04-22 Through an analysis of textual representations of the American landscape this book looks at how North America appeared in books printed on both sides of the Atlantic between the years 1660 and 1745 A variety of literary genres are examined to discover how authors described the landscape climate flora and fauna of America particularly of the new southern colonies of Carolina and Georgia Chapters are arranged thematically each exploring how the relationship between English and American print changed over the 85 years under consideration Beginning in 1660 with the impact of the Restoration on the colonial relationship the book moves on to show how the expansion of British settlement in this period coincided with a dramatic increase in the production and consumption of the printed word and the further development of religious and scientific explanations of landscape change and climatic events This in turn led to multiple interpretations of the American landscape dependent on factors such as whether the writer had actually visited America or not differing purposes for writing growing imperial considerations and conflict with the French Spanish and Natives The book concludes by bringing together the three key themes how representations of landscape varied depending on the genre of literature in which they appeared that an author's perceived self definition as English resident American visitor or American resident determined his understanding of the American landscape and finally that the development of a unique American identity by the mid eighteenth century can be seen by the way American residents define the landscape and their relationship to it

*Nordic Literature* Steven P. Sondrup,Mark B. Sandberg,Thomas A. DuBois,Dan Ringgaard,2017-12-15 Nordic Literature A comparative history is a multi volume comparative analysis of the literature of the Nordic region Bringing together the literature of Finland continental Scandinavia Sweden Norway Denmark and S pmí and

the insular region Iceland Greenland and the Faroe Islands each volume of this three volume project adopts a new frame through which one can recognize and analyze significant clusters of literary practice This first volume Spatial nodes devotes its attention to the changing literary figurations of space by Nordic writers from medieval to contemporary times Organized around the depiction of various scapes and spatial practices at home and abroad this approach to Nordic literature stretches existing notions of temporally linear nationally centered literary history and allows questions of internal regional similarities and differences to emerge more strongly The productive historical contingency of the North as a literary space becomes clear in this close analysis of its literary texts and practices
