Wildland and Prescribed Fire Management Policy ,1998 **Strategic and Tactical Considerations on the Fireground Study Guide** James P. Smith,2011-10-19 This study guide is meant as an accompaniment to the book Strategic and Tactical Considerations on the Fireground Third Edition written by retired Deputy Chief James P Smith of the Philadelphia PA Fire Department and published by Brady Prentice Hall It is not meant to be an all inclusive text or to answer all encompassing questions it is meant to reinforce the text after it is read In many cases the questions are narrow in design and emphasize specific points made within the text Guide to Wildland Fire Origin and Cause Determination: (black & White) The National Wildfir Coordinating Group,2019-01-22 The National Wildfire Coordinating Group provides national leadership to enable interoperable wildland fire operations among federal state local tribal and territorial partners Primary objectives include Establish national interagency wildland fire operations standards Recognize that the decision to adopt standards is made independently by the NWCG members and communicated through their respective directives systems Establish wildland fire position standards qualifications requirements and performance support capabilities e g training courses job aids that enable implementation of NWCG standards Support the National Cohesive Wildland Fire Management Strategy goals to restore and maintain resilient landscapes create fire adapted communities and respond to wildfires safely and effectively Establish information technology IT capability requirements for wildland fire and Ensure that all NWCG activities contribute to safe effective and coordinated national interagency wildland fire operations The Guide to Wildland Fire Origin and Cause Determination is designed for use in the field as a guide for wildland fire investigators Accurate wildland fire origin and cause determination is an essential first step in a successful fire investigation Proper investigative procedures which occur during initial attack can more accurately pinpoint fire causes and preserve valuable evidence that might be destroyed by suppression activities If a fire is human caused the protective measures described in the guide can preserve evidence that may lead to effective and fair administrative civil or criminal actions The investigation should start at the time a fire is reported or discovered First responders play an important role in protecting evidence so it is important for the wildland fire investigator to help train first responders to identify and protect the General Origin Area of the fire Wildland

fire investigators should impress upon firefighters law enforcement officers and other first responders that the preliminary protection of the General origin area and any associated evidence on any wildfire is their responsibility and emphasize to them that they are the most important link in the subsequent origin and cause determination Not only is it important for the first responders to recognize the need for an accurate origin and cause determination it is important that they understand how their actions both during and following suppression can enable a qualified wildland fire investigator to accurately determine the origin and cause
