Managing Technology in Society Arie Rip, Thomas J. Misa, J. W. Schot, 1995 A fateful conceptual gap separates the policy makers and managers charged with promoting technology and the risk and technology assessors responsible for controlling it This hampers the effective use of many new technologies and prevents the development of others The strategy of constructive technology assessment CTA addresses this gap through facilitating societal learning processes and proposing a shared responsibility for the promotion and control of new technologies Combining analysis of both cases and concepts Managing Technology in Society confronts the underdevelopment of innovative potential for achieving goals of wealth sustainability and safety Factors that block change as well as conditions for successful learning are identified in a wide ranging selection of cases that encompass biotechnology clean technologies information and medical technologies The contributors build on the convergence of recent theories on technical change within economics sociology and the history of technology to offer suggestions for CTA action and so create a new paradigm of managing technology in society BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved
