Research Methods in Information Alison Jane Pickard,2013-01-23 The long awaited 2nd edition of this best selling research methods handbook is fully updated and includes brand new coverage of online research methods and techniques mixed methodology and qualitative analysis This edition includes two new contributed chapters Professor Julie McLeod Sue Childs and Elizabeth Lomas focus on research data management applying evidence from the recent JISC funded DATUM

project Dr Andrew Shenton examines strategies for analysing existing documents The first to focus entirely on the needs of the information and communications community this handbook guides the would be researcher through the variety of possibilities open to them under the heading research and provides students with the confidence to embark on their dissertations The focus here is on the doing and although the philosophy and theory of research is explored to provide context this is essentially a practical exploration of the whole research process with each chapter fully supported by examples and exercises tried and tested over a whole teaching career Readership Students of information and communications studies and archives and records management and practitioners beginning a piece of research

Qualitative Methods Dr. Salma Seth, Dr. N.K. Chadha, Dr. Harpreet Bhatia, 2022-05-16 This book aims to provide researchers who are new or relatively new to qualitative research with the methodological tools and conceptual maps they need to navigate their way through the process It describes the uncertainties surrounding qualitative research and the many dilemmas faced by researchers It illustrates these by drawing on the experiences of researchers with varying degrees of expertise in qualitative research It also provides readers with the necessary background knowledge and raises their awareness of the questions they will need to address to help them make informed decisions about how to deal with these uncertainties and dilemmas The contents of the book are organized in a way that reflects the three main objectives that the authors had in mind The first objective was to provide readers with the necessary background knowledge and an awareness of the questions they will need to address in order to make informed decisions about whether to conduct qualitative research and if they decide to follow a qualitative path which particular qualitative approaches would be suited to their research goals The second objective was to equip readers with the basic tools to carry out their analysis by providing detailed contextualized coverage of the practicalities of the qualitative methods approaches In addition the book includes accounts of an actual analysis of a specific data set in a step by step manner using the approaches The third objective was to provide the reader with guidance as to how to write up qualitative research in general and the ethical considerations of qualitative inquiry in the concluding chapter

Intermedial Theatre Mark Crossley, 2019-05-01 This rigorous yet accessible collection demystifies the principles of intermediality whilst examining its place in 21st century theatrical practice Bringing together chapters and case studies from top thinkers in the field this book clarifies the key theoretical ideas and practical impacts of intermediality while encouraging students to experiment with it in their own practical work Offering an engaging insight into one of the most dominant trends in contemporary theatre this is essential reading for students of theatre performance and media studies

From contextualization to universalization: Accelerating the knowledge production lifecycle for theoretical sciences in the twenty-first century Sujay Rao Mandavilli, 2025-11-23 A great deal of literature has indeed been published about the research lifecycle in modern and contemporary times particularly over the past couple of decades beginning from the 1980 s or so it also goes without saying that the quantum of such output has been greatly amplified since the dawn of the twenty first likewise a great deal has also been written about product development lifecycles and technology lifecycles and all these concepts have been approached from multiple points of view and from multiple perspectives However we consider all these to be highly inadequate and grossly deficient on two grounds because they do not cover the end to end process from contextualization of knowledge to communication and universalization or ubiquitization of knowledge but they are also innately and inherently biased towards commercializable products and practical technology not the knowledge creation process itself which is so essential to the escalation of scientific and cultural activity They must also be naturally be branded as Eurocentric given the fact that much of the knowledge production processes particularly in the social sciences have been centered around the western hemisphere with minimal to no tangible outputs from other parts of the world This is because the west has thus far ruled the roost in theoretical and conceptual knowledge in all facets of human knowledge but particularly in various fields of what people consider to be the social sciences It is there highly naturally and highly obvious that multiple data sets were not adequately considered or considered at all in the process of theorization or theory formulation and generation
