Wine And Climate Change Winemaking In A New World:

Wine and Climate Change L. J. Johnson-Bell, 2014-09-01 Climate change is changing the way winemakers make wine. Once temperate grape growing regions are growing hotter, challenging winemakers to produce high quality wines in unfamiliar ways. Many of the negative effects of climate change on the wine world are already apparent. European vineyards in the heart of traditional winemaking areas, for example, are suffering lower yields due to increasing temperatures. But new opportunities are also presenting themselves. Areas in Europe and the Americas that could not successfully produce *Vitis vinifera* grapes are becoming important players in the new world of wine. This book will explore climate change in a wine producing context, discussing why climate is important to grape growing and how climatic changes can affect grapes and wine. It will cover each major wine region in the world, analyzing the likely trends and their responses. And it will cover the ways wine producers are coping with this very quickly changing landscape. All this is central to the world of wine and centrally important to those who enjoy wine's complexity and variety. *The Routledge Handbook of Wine and Culture* Steve Charters, Marion Demossier, Jacqueline Dutton, Graham Harding, Jennifer Smith Maguire, Denton Marks, Tim Unwin, 2022-04-26 This title was a prize winner at the OIV International Organisation of Vine and Wine Awards 2023. The link between culture and wine reaches back into the earliest history of humanity. *The Routledge Handbook of Wine and Culture* brings together a newly comprehensive interdisciplinary overview of contemporary research and thinking on how wine fits into the cultural frameworks of production, intermediation, and consumption. Bringing together many leading researchers engaged in studying these phenomena, it explores the different ways in which wine is constructed as a social artefact and how its representation and use acquire symbolic meaning. Wine can be analysed in different ways by varying disciplines involved in exploring wine and culture: anthropology, economics, and business geography, history, and sociology, and as text. The Handbook uses these as lenses to consider how producers, intermediaries, and consumers use and create cultural significance. Specifically, the work addresses the following: how wine relates to place, belief systems, and accompanying rituals; how it may be used as a marker of the identity and mechanisms of civilising processes, often in conjunction with food and the arts; how its framing intersects with science and nature; the ideologies and power relations which arise around all these activities; and the relation of this to wine markets and public institutions. This is essential reading for researchers and students in education for the wine industry and in the humanities and social sciences engaged in understanding patterns of human ingenuity and interaction, such as sociology, anthropology, economics, health geography, business, tourism, cultural studies, food studies, and history. ICTR 2021 4th International Conference on Tourism Research Prof Cândida Silva, Prof Mónica Oliveira, Prof Susana Silva, 2021-05-20 Conference Proceedings of 4th International Conference on Tourism Research. *Wine Tourism and Landscapes* Helena Albuquerque, Isabel Freitas, Gregory A. Gardner, 2025-09-26 This book identifies opportunities and challenges for wine tourism and landscapes, illustrating how national and international tourism economics could support

regional national or international policy establishment and improve territorial sustainability It does not just focus on wine tourism and how it can contribute to sustainable economic development it also presents an analysis of the importance of wine landscapes and natural and cultural heritage associated to it Also it evaluates how the actual challenges and opportunities could impact on wine landscapes influencing positively and negatively tourism and also the development of local and regional areas The book discusses how wine tourism creates multiple opportunities for local and regional sustainable development It signals the numerous possibilities for the reduction of inequalities between territories of high and low density the economic involvement of the communities the creation of work and the increase in local employability as well as the promotion of visitor and resident well being On the other hand the book discusses the actual challenges including risks that could endanger the wine landscapes such as climate change industrialization loss of traditional practices globalization massification and gaps in territorial planning and management among others

Handbook of Research on Sustainability Challenges in the Wine Industry Marco-Lajara, Bartolomé, Gilinsky, Armand, Martínez-Falcó, Javier, Sánchez-García, Eduardo, 2023-04-18 In the wine industry sustainability is an extremely important issue for two main reasons Firstly the industry faces serious threats as a consequence of climate change as well as water and energy scarcity Secondly proper sustainable management of wineries can mean obtaining a competitive advantage by allowing them to increase market share and organizational innovation processes In this sense previous work has shown that customers tend to select wines that have been developed following sustainable practices despite not knowing what this means in practice The Handbook of Research on Sustainability Challenges in the Wine Industry serves as a guide for study reflection and critique to understand sustainability in the wine industry in its triple aspect economic social and environmental The book sheds light on the new trends and challenges of the wine industry making it a must read for academicians and managers who want to deepen their knowledge of the wine industry as well as its link with sustainability Covering key topics such as wine tourism green innovation and consumer behavior this major reference work is ideal for industry professionals business owners managers entrepreneurs researchers scholars academicians practitioners instructors and students
