aviation The feud between this nation's great air pioneers the Wright brothers and Glenn Curtiss was a collision of unyielding and profoundly American personalities On one side a pair of tenacious siblings who together had solved the centuries old riddle of powered heavier than air flight On the other an audacious motorcycle racer whose innovative aircraft became synonymous in the public mind with death defying stunts For more than a decade they battled each other in court at air shows and in the newspapers The outcome of this contest of wills would shape the course of aviation history and take a fearsome toll on the men involved Birdmen sets the engrossing story of the Wrights war with Curtiss against the thrilling backdrop of the early years of manned flight and is rich with period detail and larger than life personalities Thomas Scott Baldwin or Cap t Tom as he styled himself who invented the parachute and almost convinced the world that balloons were the future of aviation John Moisant the dapper daredevil who took to the skies after three failed attempts to overthrow the government of El Salvador then quickly emerged as a celebrity flyer and Harriet Quimby the statuesque silent film beauty who became the first woman to fly across the English Channel And then there is Lincoln Beachey perhaps the greatest aviator who ever lived who dazzled crowds with an array of trademark twists and dives and best embodied the romance with death that fueled so many of aviation's earliest heroes A dramatic story of unimaginable bravery in the air and brutal competition on the ground Birdmen is at once a thrill ride through flight's wild early years and a surprising look at the personal clash that fueled America's race to the skies Praise for Birdmen A meticulously researched account of the first few hectic tangled years of aviation and the curious characters who pursued it a worthy companion to Richard Holmes's marvelous history of ballooning Falling Upwards Time The daredevil scientists and engineers who forged the field of aeronautics spring vividly to life in Lawrence Goldstone's history Nature The history of the development of an integral part of the modern world and a fascinating portrayal of how a group of men and women achieved a dream that had captivated humanity for centuries The Christian Science Monitor Captivating and wonderfully presented a fine book about these rival pioneers The Wall Street Journal A vivid story of invention vendettas derring do media hype and patent fights with modern resonance Financial Times A powerful story that contrasts soaring hopes with the anchors of ego and courtroom Kirkus Reviews A riveting narrative about the pioneering era of aeronautics in America and beyond Goldstone raises questions of enduring importance regarding innovation and the indefinite exertion of control over ideas that go public Publishers Weekly starred review
