Wingshooting More Birds In Your Bag:

Wingshooting Peter F. Blakeley, 2012 Pete Blakeley's revolutionary unit lead system for learning to shoot well has put more birds in many a hunter's bag. His unique instruction helps simplify that elusive and key element of the successful bird hunter: forward allowance or lead. Successful shotgunning depends on creating accurate sight pictures of the birds. Wingshooting explores the three variables that determine each sight picture: the flight line of the bird, its speed, and the distance to the bird to help you decipher the correct lead for each bird. This is shooting advice from not only a fellow bird hunter but also a professional shooting coach who explains why you miss and what you can do about it. Pete Blakeley's approach emphasizes how to apply a specific lead to a specific target, and his colorful stories bring the hunt to life in these pages, whether it's doves in Muleshoe, Texas, or driven pheasants in Scotland. **Dust Jacket Flap** **Women & Guns**, 2006
