Modernizing Legal Services in Common Law Countries Laura Snyder, 2017-08-07 Most people understand that regulations have a direct bearing on their access to things such as clean air and water and safe working environments However in the United States few people make the connection between how legal services are regulated and how difficult it is for them to access legal services Indeed on the question of affordable and accessible civil justice the World Justice Project ranks the US 94th out of 113 countries behind Albania Belarus Myanmar and Russia For decades academics and others have debated whether the legal profession is self regulated and if it is whether it should be But is it the right debate Self regulation or not does not obviate the need for effective regulation Independent accountable and transparent regulatory bodies effective oversight of those bodies the genuine engagement of citizens in the regulatory process evidence based research to fully assess the impact of regulation and an approach to regulation that is proportionate and targeted to actual risks are essential for effective regulation Through the lens of the adoption of alternative structures this book explains how England Wales and Australia have by embracing these essential elements successfully modernized their regulatory environments for legal services and how Canada has taken firm steps down its own path to the same In contrast by rejecting these elements the United States remains paralyzed in an unproductive regulatory environment for legal services This book provides a blueprint for how the US can take inspiration from its common law sisters to breathe new life into its regulatory environment for legal services Ultimately modernization will require more and better regulation that is financed publicly through equitable progressive revenue sources

ambiguous role in corporate takeovers On the one hand once a bid is imminent they are significantly involved spending most of their time in responding to the bid and advising the shareholders whose interests the directors must primarily represent On the other hand they face various potential conflicts of interests as takeovers can have significant personal and professional implications on them This essay critically assesses the role of directors in relation to takeovers of public companies Their corporate powers are constrained by a range of rules in the Takeover Code However takeover regulation leaves significant room for board discretion which is therefore subject to common law and general company law As we will see the target directors only have an advisory role vis vis the shareholders with the latter taking the ultimate decision on acceptance of the takeover bid The essay is structured as follows Section 2 starts by introducing the context of takeovers of public companies followed by a brief summary of common motives for takeovers in section 3 Special emphasis is placed on the effects of the theory of the market for control on directors which at various points had an influence on the takeover regulation Section 4 then deals with the allocation of the acceptance decision on a takeover bid to the shareholders In order not to interfere with this right by taking defensive measures which could frustrate a takeover bid the Takeover Code has imposed a strict no frustration rule on target directors This is covered by section 5 Reference will also be made to the respective directors fiduciary duties under common law and company law Subsequently section 6 critically discusses the advisory role of the target directors when recommending a takeover offer to the shareholders the various conflicts of interest to which they are exposed and how the takeover regulations attempt to solve them Although the takeover regime mainly focuses on the role of target directors section 7 outlines some of the constraints which the directors of the bidder are subject to when launching a takeover bid Section 8 concludes
