Chen, 2012-12-06 The NATO Advanced Research Workshop on Signal Processing and Pattern Recognition in Nondestructive Evaluation NOE of Materials was held August 19 22 1987 at the Manoir St Castin Lac Beauport Quebec Canada Modern signal processing pattern recognition and artificial intelligence have been playing an increasingly important role in improving nondestructive evaluation and testing techniques The cross fertilization of the two major areas can lead to major advances in NOE as well as presenting a new research area in signal processing With this in mind the Workshop provided a good review of progress and comparison of potential techniques as well as constructive discussions and suggestions for effective use of modern signal processing to improve flaw detection classification and prediction as well as material characterization This Proceedings volume includes most presentations given at the Workshop This publication like the meeting itself is unique in the sense that it provides extensive interactions among the interrelated areas of NOE The book starts with research advances on inverse problems and then covers different aspects of digital waveform processing in NOE and eddy current signal analysis These are followed by four papers of pattern recognition and AI in NOE and five papers of image processing and reconstruction in NOE The last two papers deal with parameter estimation problems Though the list of papers is not extensive as the field of NOE signal processing is very new the book has an excellent collection of both tutorial and research papers in this exciting new field International Advances in Nondestructive Testing Warren J. McGonnagle, 1989 *Handbook Of Pattern Recognition And Computer Vision (2nd Edition)* Chi Hau Chen, Louis-francois Pau, Patrick S P Wang, 1999-03-12 The very significant advances in computer vision and pattern recognition and their applications in the last few years reflect the strong and growing interest in the field as well as the many opportunities and challenges it offers The second edition of this handbook represents both the latest progress and updated knowledge in this dynamic field The applications and technological issues are particularly emphasized in this edition to reflect the wide applicability of the field in many practical problems To keep the book in a single volume it is not possible to retain all chapters of the first edition However the chapters of both editions are well written for permanent reference This indispensable handbook will continue to serve as an authoritative and comprehensive guide in the field **Composite Materials** Charles E. Bakis, 2003 The 14th ASTM Symposium on Composite Materials Testing and Design was held March 11 12 2002 in Pittsburgh PA The Testing and Design symposia sponsored by Committee D30 on Composite Materials have been scheduled on a roughly bi yearly basis since 1969 to provide a forum for researchers and practitioners to meet and exchange their latest methods and findings related to the testing and design of composite materials and structures *Nondestructive*
