Love Troubles Federica Gregoratto, 2025-01-21 What does it mean to love Does love complete us giving us purpose and meaning Or does it tie us down and even harm us Is erotic desire complicit in oppression or could it deliver liberation Are our desires extricable from the wrongs of our societies And in today s world is love still worth the trouble This book develops a critical theory of sexual love and friendship offering profound new ways to understand the troublesome nature of eros Federica Gregoratto explores the ambivalence of erotic love which is at once intimately interwoven with heterosexism racism and neoliberal capitalism yet entices us with the tantalizing possibility of transformation Drawing on a rich array of sources from Frankfurt School critical theory to feminist thought and contemporary philosophies of emotions and affects as well as poetry novels films and music she argues that love provides unexpected resources for political agency resistance and emancipation Gregoratto makes a passionate defense of erotic freedom as an adventurous process through which we understand together with others who we

are and who we want to become both in our individual existences and in our social lives Wide ranging and daring Love Troubles invites us to reflect on our fraught amorous experiences showing why we should cherish and learn from them

The Secret Wound Marion Wells, 2007-01-03 This book offers a new reading of early modern romance in the light of historically contemporary accounts of mind and specifically the medical tradition of love melancholy The book argues that the medical profile of the melancholic lover provides an essential context for understanding the characteristic patterns of romance narrative deferral epistemological uncertainty and the endless quest for a quasi phantasmic beloved Unlike many recent studies of romance this book establishes a detailed historical basis for investigating the psychological structure of romance Wells begins by tracing the development of the medical disorder first known in the Latin west as amor hereos lovesickness from its earliest roots in Greek and Arabic medicine to its translation into the Latin medical tradition Drawing on this detailed historical material the book considers three important early modern romances Ariosto's Orlando Furioso Tasso's Gerusalemme Liberata and Spenser's The Faerie Queene concluding with a brief consideration of the significance of this literary and medical legacy for Romanticism Most broadly the interdisciplinary nature of this study allows the author to investigate the central critical problem of early modern subjectivity in substantially new ways

Dancing in the Dark Barbara Grier, Christine Cassidy, 1996 *Comparing Faithfully* Michelle Voss, 2016-09-01 Every generation of theologians must respond to its context by rearticulating the central tenets of the faith Interreligious comparison has been integral to this process from the start of the Christian tradition and is especially salient today The emerging field of comparative theology in which close study of another religious tradition yields new questions and categories for theological reflection in the scholar's home tradition embodies the ecumenical spirit of this moment This discipline has the potential to enrich systematic theology and by extension theological education at its foundations The essays in *Comparing Faithfully* demonstrate that engagement with religious diversity need not be an afterthought in the study of Christian systematic theology rather it can be a way into systematic theological thinking Each section invites students to test theological categories to consider Christian doctrine in relation to specific comparisons and to take up comparative study in their own contexts This resource for pastors and theology students reconsiders five central doctrines of the Christian faith in light of focused interreligious investigations The dialogical format of the book builds conversation about the doctrine of God theodicy humanity Christology and soteriology Its comparative essays span examples from Hindu Buddhist Jewish Muslim Jain and Confucian traditions as well as indigenous Aztec theology and contemporary spiritual but not religious thought to offer exciting new perspectives on Christian doctrine
