Understanding Ageing Developmental And Cell Biology Series:

Understanding Ageing Robin Holliday,1995-01-27 This book presents a completely novel approach to understanding aging it explains both why aging exists in animals and reviews our current understanding of it at the biological level Dr Holliday argues that much research needs to be done on the cellular and molecular aspects of aging if the origin of age related diseases is to be understood In making this argument the author draws on material from a wide range of disciplines including extensive biomedical information about age related disease in humans This thought provoking book will appeal to all students and researchers who are interested in aging whether they are working in the clinical or basic research sphere

Understanding Ageing Robin Holliday,1995-01-27 This book presents a completely novel approach to the understanding of ageing which many believe is an unsolved problem in biology It explains why ageing exists in animals and reviews our understanding of it at the biological level This includes a discussion of the origins and evolution of ageing The book is not a review of research on ageing but instead draws on material from a wide range of disciplines including the very extensive biomedical information about age related diseases in humans Understanding Ageing argues that much research needs to be done on the cellular and molecular aspects of ageing if the origins of these diseases are to be understood and their prevention made possible This thought provoking book will appeal to all students and researchers who are interested in ageing whether they are working in the clinical or basic research sphere Cytokinesis in Animal Cells R. Rappaport,1996-10-28 This book traces the history of the major ideas and gives an account of our current knowledge of cytokinesis **Limb Regeneration** Panagiotis A. Tsonis,1996-07-13 This is the first book that analyses the mechanisms of limb regeneration by incorporating the information obtained from older experiments with the many new recent advances in molecular and cellular biology **Fungal Morphogenesis** David Moore,1998 Fungal Morphogenesis brings together for the first time the full scope of fungal developmental biology **Gravity and the Behavior of Unicellular Organisms** Donat-Peter Häder,Ruth Hemmersbach,Michael Lebert,2005-01-17 Unicellular organisms use gravity as an environmental guide to reach and stay in regions optimal for their growth and reproduction These single cells play a significant role in food webs and these factors together make the effects of gravity on unicellular organisms a fascinating and important subject for scientific study In addition they present valuable model systems for studying the mechanisms of gravity perception a topic of increasing interest in these days of experimentation in space This book reveals how single cells achieve the same sensoric capacity as multicellular organisms like plants or animals It reviews the field discussing the historical background ecological significance and related physiology of unicellular organisms as well as various experimental techniques and models with which to study them Those working on the biology of unicellular organisms as well as in related areas of gravitational and space science will find this book of value **Hormones, Signals and Target Cells in Plant Development** Daphne J. Osborne,Michael T. McManus,2005-04-11 Meristematic cells in plants become the many different types of cells found in a

mature plant This is achieved by a selective response to chemical signals both from neighbouring cells and distant tissues It is these responses that shape the plant its time of flowering the sex of its flowers its length of survival or progress to senescence and death How do plants achieve this This treatise addresses this question using well chosen examples to illustrate the concept of target cells The authors discuss how each cell has the ability to discriminate between different chemical signals determining which it will respond to and which it will ignore The regulation of gene expression through signal perception and signal transduction is at the core of this selectivity and the Target Cell concept This volume will serve as a valuable reference for all researchers working in the field of plant developmental biology *Endocrine and Metabolic Late Effects in Cancer Survivors* Francesco , Felicett,Enrico, Brignardello,Hanneke M., van Santen,2021-11-01 This book analyzes in detail all aspects related to endocrine and metabolic late effects observed in patients treated for cancer both in childhood and adulthood The chapters focusing on the possible pathogenic mechanisms of late effects i e premature aging and chronic inflammation and on bone health in cancer survivors are particularly interesting and innovative The volume also deals with hypothalamic pituitary thyroid and gonadal disorders including infertility and how to prevent it Finally the relationship between metabolic alterations and cardiovascular diseases in cancer survivors is addressed Thanks to advances in cancer treatment and supportive care the five year survival rate of cancer patients is constantly increasing However this undisputable success of medicine has a flip side the late adverse effects of anticancer therapies Pediatric oncologists were the first to cope with late complications of treatments but today also adult oncologists and onco hematologists recognize the relevance of this issue Even though late effects observed in cancer survivors can affect any organ or system endocrine and metabolic dysfunctions are the most frequently reported Endocrine complications rarely influence life expectancy of cancer survivors but they can significantly impact morbidity and quality of life Among endocrine adverse effects severe hypothalamic damage may be considered the most harmful in survivors leading to morbid obesity propensity to metabolic syndrome and cardiovascular disease This book aims to disseminate the knowledge about endocrine and metabolic adverse effects of cancer therapies and about survivorship care Since the number of cancer survivors is steadily growing in the general population this publication is intended not only for endocrinologists but also for oncologists onco hematologists internists pediatric specialists in those areas and general practitioners with the aim to better counsel and monitor cancer survivors **The Neural Crest** Nicole Le Douarin,Chaya Kalcheim,1999-11-28 This 1999 edition of The Neural Crest contains comprehensive information about the neural crest a structure unique to the vertebrate embryo which has only a transient existence in early embryonic life The ontogeny of the neural crest embodies the most important issues in developmental biology as the neural crest is considered to have played a crucial role in evolution of the vertebrate phylum Data that analyse neural crest ontogeny in murine and zebrafish embryos have been included in this revision This revised edition also takes advantage of recent advances in our understanding of markers of neural crest cell subpopulations and a full chapter is now devoted to cell

lineage analysis The major research breakthrough since the first edition has been the introduction of molecular biology to neural crest research enabling an elucidation of many molecular mechanisms of neural crest development This book is essential reading for students and researchers in developmental biology cell biology and neuroscience Volvox David L. Kirk,1998 This book reviews Volvox development and biology and through this study sheds light on the origins of multicellularity **The Cumulative Book Index** ,1996 A world list of books in the English language *The Zoological Record* ,1997 *American Book Publishing Record* ,2006 **The British National Bibliography** Arthur James Wells,1995 Choice ,1995 **Subject Guide to Children's Books in Print 1997** Bowker Editorial Staff,R R Bowker Publishing,1996-09 Molecular Biology of the Cell ,2006 *Bulletin of the Medical Library Association* Medical Library Association,1999 Whitaker's Books in Print ,1998 *Proceedings* ,2000
