The British Problem c.1534-1707 Brendan Bradshaw, John Morrill, 1996-06-27 This pioneering book seeks to transcend the limitations of separate English Irish Scottish and Welsh histories by taking the archipelago made up of the islands of Britain and Ireland as a single unit of study There has been little attempt hitherto to study the history of the Atlantic archipelago as a coherent entity even for the period during which there was a single ruler of both Great Britain and Ireland This book begins with the onset of the intellectual religious political cultural and dynastic developments that were to bring the Scottish house of Stewart to the thrones of England incorporating the ancient principality of Wales Ireland a kingdom created in 1541 as a dependency of the English Crown and to full control of Scotland itself and of its islands This is then a story of the creation of a British state system if not a British state but the book is also a study of how the peoples of the archipelago interacted as a result of internal migration military conquest protestant and Tridentine Catholic evangelism and how they were changed as a result Ten distinguished historians representing the separate peoples of the islands of Britain and Ireland and teaching history in Britain Ireland and the USA offer provocative and challenging new approaches to how and why we need to develop the history of each component of the archipelago in the context of the whole and to make the British Problem central to that study

The British Clayworker, 1923. *A Very British Experience* Andrew Stewart, 2020-01-29. In terms of the Second World War and Britain's wartime strategy, three elements deserve close scrutiny: the paramount importance of defending the British mainland and its population; the challenges of building and maintaining coalitions and alliances; and the central role the African continent assumed in all British strategic planning. A concluding essay reflects upon the degree to which, in the face of an often uncertain and unconvincing approach, these critical themes underpinned the British experience of the conflict. Topics addressed include 1940 and the Defence of Britain; relations with the United States; the British Empire; Air Training Plan; General Boy Browning and Operation Market Garden; the recall of General Alan Cunningham from Libya in 1941; plans for defending the Royal Family; Exercise Genesis which turned west London into a battleground for a day in May 1942; and the role of the Eastern Fleet off Africa. Andrew Stewart provides a compelling chapter on the loss of the Tobruk garrison in June 1942, one of the worst military disasters suffered by the British Empire during the Second World War. The essay on Tobruk demonstrates how all three defining elements of wartime experience converged: the loss of public confidence about how the war was being conducted; its impact on the relationship with the Union of South Africa, a key partner in the Dominion wartime coalition; and the absolute necessity that existed for deep strategic planning on the African continent subsequently to be realised at the final battle at El Alamein.
