Bernier, 1997 This broad treatment of architecture throughout the region of the Himalaya mountains is the first book of its kind The author has based this study on many years of research in Nepal Sikkim Bhutan Assam and the Darjeeling area of northeast India northern Pakistan and Himachal Pradesh in India's northwest These areas make up an artistic and to some degree a cultural unit It is unique and definable for its design qualities as well as its use of materials Dramatic and lofty structures rise as towering palaces and as temples dedicated to Hindu and Buddhist ideals The impact of neighboring Tibet and India is often evident in the art but other influences are found as well The area has not been isolated as some studies suggest but was in fact always linked to the rest of Asia and to the West by means of the Silk Road at least since the second century B C This study progresses from east to west beginning in the foothills of India's Assam It is richly illustrated with photographs most of which are the author's or his wife's and many of the photographs are published here for the first time The archives of the Archaeological Survey of India and the Department of Archaeology of His Majesty's Government of Nepal are also used here      **British Art and the East India Company** Geoff Quilley, 2020 Examines the role of the East India Company in the production and development of British art demonstrating how art and related forms of culture were closely tied to commerce and the rise of the commercial state This book examines the role of the East India Company in the production and development of British art during the eighteenth and early nineteenth centuries when a new school of British art was in its formative stages with the foundation of exhibiting societies and the Royal Academy in 1768 It focuses on the Company's patronage promotion and uses of art both in Britain and in India and the Far East and how the Company and its trade with the East were represented visually through maritime imagery landscape genre painting and print making It also considers how for artists such as William Hodges and Arthur William Devis the East India Company and its provision of a wealthy market in British India provided opportunities for career advancement through alignment with Company commercial principles In this light the book's main concern is to address the conflicted and ambiguous nature of art produced in the service of a corporation that was the scandal of empire for most of its existence and how this has shaped and distorted our understanding of the history of British art in relation to the concomitant rise of Britain as a self-consciously commercial and maritime nation whose prosperity relied upon global expansion increasing colonialism and the development of mercantile organisations      *An Introduction to Traditional Architecture of Bhutan*, 1993      **Architectural Conservation in Asia** John H.
