Robin Pauc, 2011-12-31 At least one child in five experiences some form of learning difficulty but Learning difficulties as we understand them DO NOT exist They are not diseases just symptoms These symptoms never appear alone They are treatable and avoidable Dr Robin Pauc an expert in child neurology approaches learning difficulties including Dyslexia ADD OCD ADHD Dyspraxia and Tourette's syndrome of childhood from a truly ground breaking perspective All human babies are born prematurely and develop special new brain cells four months after birth Every human's development in the womb and particularly in these early stages of life can therefore be affected by development delay which can blight childhood and marginalize a child at school Since our brains continue to grow however the symptoms can also be treated Is That My Child Explains the background to human developmental delay and contains Advice on how to get the best assessment for your child and an explanation of what the examination must include The effects good and bad of certain foods on the brain Exercises and computer programs that you can use to expand your child's neural function Case histories of children on whom this plan has worked In the single biggest breakthrough in the history of learning difficulties Is That My Child explains the cause of Development Delay Syndromes uses simple easy to follow tips to show you how to greatly reduce the risk of your child suffering and gives advice on what can be done to treat those children that do In Fear of My Child K. S. Kallin-Nissen-Duame, 2005-08 A dramatic ten year Case Study of an innocent child caused to go awry due to the dire effects of etiology conditions and circumstances A vivid expose of the experiences and tragedy of one representative child from before six to after fourteen A graphically painted picture of the danger jeopardy and trauma affected to an aggrieved single mother The impacting realization of the caustic effects on an entire family and all others so involved whether directly or indirectly A

real and well warranted indictment of the entire American system both to the Public Private sectors for all the failures and fallacies that cause a major sector of our youth and future to be all but forgotten and LOST forever AND The evolution out of that which is now able to be realized and understood of a worthy and all encompassing ANSWER SOLUTION in the non profit charity organization called TIME OUT FOR KIDS INC **What's Wrong with My Child?** Sandra Surace, 2010 At least six million American children have difficulties that are diagnosed as serious mental disorders according to government surveys a number that has tripled since the early 1990s But there is little convincing evidence that the rates of illness have increased in the past few decades Rather many experts say it is the frequency of diagnosis that is going up in part because doctors are more willing to attribute behavior problems to mental illness and in part because the public is more aware of childhood mental disorders NY Times 2006 According to the US Attorney General Mental disorders are characterized by abnormalities in cognition emotion or mood or the highest integrative aspects of behavior such as social interactions or planning of future activities The process of diagnosing these disorders comes with a great deal of controversy Before a diagnosis is accepted the practitioner must be able to explain how the behaviors differ from normal developmental behaviors In Hope's case medical treatment would not be effective in reducing symptoms because her environment never changed The sexual abuse never stopped and Hope was merely medicated into submission Once the need for medications for such a young girl reached three the psychiatrist should have started asking other questions However since psychiatry categorizes the individual once labeled it stops questioning the diagnosis as being potentially false and thereby confines treatment to the social standard of normal

My Child, My Teacher Karen Sanford, 2020-09-14 My Child My Teacher is an account of a mother and daughter both grappling with the daughter's mental issues the exhaustion and frustration of navigating the often ineffective uncaring and mismanaged justice social and mental health systems and the indelible impact it is having on the relationship between mother and daughter The book assumes the perspective from a parent in this case a woman who through unforeseen circumstances of her own found herself having to navigate the bulk of this burden alone It chronicles the loving yet turbulent relationship between mother and daughter and positively chronicles their way to acceptance and understanding Her experiences reveal in sometimes painful but relief that life can present many challenges some unspeakable while others can be joyful beyond the imagination The book takes a look at how when the justice system social services and mental health mechanism converge sometimes the results can be disastrous as some of the examples show But the book also provides links to possible solutions to families in need As this whole situation is still a work in progress the relationship between mother and daughter is evolving as well
