Understanding China through Big Data Yunsong Chen, Guangye He, Fei Yan, 2021-07-14. Chen, He and Yan present a range of applications of multiple source big data to core areas of contemporary sociology, demonstrating how a theory-guided approach to macrosociology can help to understand social change in China, especially where traditional approaches are limited by constrained and biased data. In each chapter of the book, the authors highlight an application of theory-guided macrosociology that has the potential to reinvigorate an ambitious, open-minded and bold approach to sociological research. These include social stratification, social networks, medical care and online behaviours among many others. This research approach focuses on macro-level social process and phenomena by using quantitative models to statistically test for associations and causalities suggested by a clearly hypothesised social theory. By deploying theory-oriented macrosociology where it can best assure macro-level robustness and reliability, big data applications can be more relevant to and guided by social theory. An essential read for sociologists with an interest in quantitative and macro-scale research methods, which also provides fascinating insights into Chinese society as a demonstration of the utility of its methodology.

China and England Martin Powers,2018-09-24 This book examines egalitarian social ideals and institutions that arose in preindustrial China and England and in the process uncovers China s forgotten role in the history of

social justice debate and legislation during the eighteenth century Drawing on a wide range of visual and documentary evidence the author shows that many prominent individuals in both England and China adopted comparable strategies as a logical response to excesses of privilege and arbitrary power with educated but non noble persons taking advantage of print culture a more literate population an expanded art market public spaces and other familiar early modern developments to interrogate the system of inherited privilege and promote a more meritocratic society This shared experience created common ground for transformative exchange between the two great traditions during the eighteenth century By providing a more global account of what we call Western values the book shows that early modern China and England had far more in common than is normally supposed and thus challenges claims on the right and the left that the people of China lacked a concept of social justice and that China s cultural legacy should be treated as exceptional in regard to human rights

This volume explores Chinese identity through the lens of both the Chinese and English languages. Until the twentieth century, English was a language associated with capitalists and military aggressors in China. However, the massive progression of globalisation in China following the 1980s has transformed the language into an important tool for China's modernisation. Regardless of the role English plays in China, there has always been a fear that the spread of culture associated with English would lead to weakening of the Chinese identity. This fear resulted in the development of the *ti yong* principle: Chinese learning for essence, *ti*; Western learning for utility, *yong*. Fong's book aims to enhance understanding of the *ti yong* dichotomy in relation to people's sense of being Chinese in China, the penetration of English into non-English speaking societies, the resultant tensions in people's sense of personal and national identity and their place in the world. Using Q methodology, the book presents observations based on data collected from four participant groups: namely, high school and university students, teachers and parents in China, to investigate their perspectives on the status and roles of English as well as those of Chinese. Considering the growing international interest in China, this volume will appeal to readers interested in China's contemporary society in general, its language, culture and identity. It will be a useful resource for academics, researchers and students in the field of applied linguistics, language education and Chinese cultural studies and can also be adopted as a reference book for undergraduate courses relating to language identity and culture.

Behind the Silence Jing-Bao Nie, 2005. *Behind the Silence* is the first in-depth work in any language to explore the diverse perspectives of mainland Chinese regarding induced abortion and fetal life in the context of the world's most ambitious and intrusive family planning program. Through his investigation of public silence, official standpoints, forgotten controversies from the imperial era, popular opinions, women's personal stories, doctors' narratives and the problem of coerced abortion, Nie Jing Bao brings to light a surprising range of beliefs concerning fetal life and the morality of abortion, yet finds overall an acceptance of national population policies. China's internal plurality, the author argues, must be taken seriously if the West is to open a fruitful cross-cultural dialogue. Visit our website for sample chapters.

Understanding China's Real Estate Markets Bing

Wang, Tobias Just, 2021-06-07. China's economy has been transforming rapidly over the last 25 years. As a result, Chinese conurbations have changed remarkably, with cities expanding both vertically and horizontally and the physical environment acting as a medium for unprecedented urbanization. This has provided vast opportunities for investors, real estate developers and service companies but also presents huge challenges as traditional city spaces have been reconfigured, environmental risks and the volatility of real estate markets increased. However, as engagement with China is becoming strategically important for many, forming a synthesized lens through which to read China across the vicissitudes of its real estate sector bears historic significance. By offering an insightful framework and structure for understanding China's variegated real estate dynamics, players and markets, *Understanding China's Real Estate Markets* codifies the principles and practices of real estate development, finance and investment in China and builds foundations for future academic research and practical knowledge.
