History & Mathematics Jack A. Goldstone, Leonid E. Grinin, Andrey V. Korotayev, 2015-01-01 Among different important issues which are discussed in Political Demography the issue of global ageing becomes more and more pressing every year It is sufficient to take into account the point that within two forthcoming decades a rapid global increase in the number of retirement age persons will lead to its doubling within this fairly small historical period The concerns about population ageing apply to both developed and many developing countries and it has turned into a global issue In forthcoming decades the population ageing is likely to become one of the most important processes determining the future society characteristics and the direction of technological development The present volume of the Yearbook which is the fifth in the series is subtitled Political Demography II Facing Population Ageing We hope that this issue will be interesting and useful both for historians and mathematicians as well as for all those dealing with various social and natural sciences **State, Economy and the**

Great Divergence Peer Vries, 2015-02-26 State Economy and the Great Divergence provides a new analysis of what has become the central debate in global economic history the great divergence between European and Asian growth Focusing on early modern China and Western Europe in particular Great Britain this book offers a new level of detail on comparative state formation that has wide reaching implications for European Eurasian and global history Beginning with an overview of the historiography Peer Vries goes on to extend and develop the debate critically engaging with the huge volume of literature published on the topic to date Incorporating recent insights he offers a compelling alternative to the claims to East West equivalence or Asian superiority which have come to dominate discourse surrounding this issue This is a vital update to a key issue in global economic history and as such is essential reading for students and scholars interested in keeping up to speed with the on going debates **Created in China** Michael Keane, 2007-10-30 This book examines China s creative economy and how television animation advertising design publishing and digital games are reshaping traditional understanding of culture Since the 1950s China has endeavoured to catch up with advanced Western economies Made in China is one approach to global competitiveness But a focus on manufacturing and productivity is impeding innovation China imports creativity and worries about its cultural exports deficit In the cultural sector Chinese audiences are attracted to Korean Taiwanese and Japanese culture as well as Hollywood cinema This book provides a fresh look looks at China s move up the global value chain It argues that while government and most citizens would prefer to associate with the nationalistic but unrealized created in China brand widespread structural reforms are necessary to release creative potential Innovation policy in China has recently acknowledged these problems It considers how new ways of managing cultural assets can renovate largely non competitive Chinese cultural industries Together with a history of cultural commerce in China the book details developments in new creative industries and provides the international context for creative cluster policy in Beijing and Shanghai **The Local Impact of Globalization in South and Southeast Asia** Bart Lambregts, Niels

Beerepoot, Robert Kloosterman, 2015-08-27 In the past two decades several millions of IT enabled services jobs have been relocated or offshored from the US and Europe to in particular low cost economies around the world Most of these jobs so far have landed in South and South East Asia with India and the Philippines receiving the bulk of them This has caused profound changes in the international division of labour and has had correspondingly wide social and economic effects This book examines how this next wave in globalization affects people and places in South and South East Asia It brings together twelve case studies from India the Philippines China Hong Kong and Thailand and explores how and for whom services offshoring creates opportunities triggers local economic transformations and produces challenges This book in addition compares how different countries take part in this second global shift investigates service sector driven economic development from a historical perspective and engages with the question whether and to what extent services offer a new promising avenue of sustained economic growth for developing countries It argues that service led development in developing countries is not easy for all the workers involved or a guaranteed path to sustained economic development and prosperity This volume stands out from other books in the field in its exploration of the social and economic outcomes in the cities and countries where services have been located Based on cutting edge empirical research and original data the volume offers a state of the art contribution to this growing debate The book provides valuable insights for students scholars and professionals interested in services offshoring socio economic development and contemporary transformations in South and South East Asia

A Companion to Chinese History Michael Szonyi, 2017-02-06 A Companion to Chinese History presents a collection of essays offering a comprehensive overview of the latest intellectual developments in the study of China's history from the ancient past up until the present day Covers the major trends in the study of Chinese history from antiquity to the present day Considers the latest scholarship of historians working in China and around the world Explores a variety of long range questions and themes which serves to bridge the conventional divide between China's traditional and modern eras Addresses China's connections with other nations and regions and enables non specialists to make comparisons with their own fields Features discussion of traditional topics and chronological approaches as well as newer themes such as Chinese history in relation to sexuality national identity and the environment

Globalization and the Critique of Political Economy Lucia Pradella, 2014-11-27 The nature of the contemporary global political economy and the significance of the current crisis are a matter of wide ranging intellectual and political debate which has contributed to a revival of interest in Marx's critique of political economy This book interrogates such a critique within the broader framework of the history of political economy and offers a new appreciation of its contemporary relevance A distinctive feature of this study is its use of the new historical critical edition of the writings of Marx and Engels MEGA2 their partially unpublished notebooks in particular The sheer volume of this material forces a renewed encounter with Marx It demonstrates that the international sphere and non European societies had an increasing importance in his research which developed the scientific elements elaborated by Marx

s predecessors This book questions widespread assumptions that the nation state was the starting point for the analysis of development It explores the international foundations of political economy from mercantilism to Adam Smith and David Ricardo and to Hegel and investigates how the understanding of the international political economy informs the interpretations of history to which it gave rise The book then traces the developments of Marx s critique of political economy from the early 1840s to Capital Volume 1 and shows that his deepening understanding of the laws of capitalist uneven and combined development allowed him to recognise the growth of a world working class Marx s work thus offers the necessary categories to develop an alternative to methodological nationalism and Eurocentrism grounded in a critique of political economy This book is essential reading for anyone interested in the development of Marx s thought and in the foundations of International Political Economy **Spain, China, and Japan in Manila, 1571-1644** Birgit Tremml-Werner, 2025-10-01 Spain China and Japan in Manila 1571 1644 offers a new perspective on the connected histories of Spain China and Japan as they emerged and developed following Manila s foundation as the capital of the Spanish Philippines in 1571 Examining a wealth of multilingual primary sources Birgit Tremml Werner shows that crosscultural encounters not only shaped Manila s development as a Eurasian port city but also had profound political economic and social ramifications for the three premodern states Combining a systematic comparison with a focus on specific actors during this period this book addresses many long held misconceptions and offers a more balanced and multifaceted view of these nations histories *Capitalism* Geoffrey Ingham, 2013-04-24 Now with a substantial new postscript on the financial crisis This book provides a basic introduction to the nuts and bolts of capitalism It starts by examining the classic accounts of capitalism found in the works of Adam Smith Karl Marx Max Weber Joseph Schumpeter and John Maynard Keynes Each placed emphasis on different institutional elements of capitalism Smith on the market s invisible hand Marx on capital s exploitation of labour Weber on the foundations of economic rationality and Schumpeter and Keynes on the instability that results from capitalism s essentially monetary and financial character Drawing on these classic accounts Ingham then offers a succinct analysis of capitalism s basic institutions and their interconnections Market exchange the monetary system the enterprise capital and financial markets and the role of the state are dealt with in separate chapters which make use of contemporary material on the recent history of the capitalist system including the great inflation of the 1970s and the neo liberal backlash the dot com bubble of the late 1990s and the collapse of Enron and other US corporations This revised version includes a substantial new postscript on the financial crisis of 2007 8 and its aftermath The result is a concise masterly and up to date account of the world s most powerful economic system written in a way that is accessible to students and general readers alike *The Uniqueness of Western Civilization* Ricardo Duchesne, 2011-02-07 This extensively researched book argues that the development of a libertarian culture was an indispensable component of the rise of the West The roots of the West s superior intellectual and artistic creativity should be traced back to the aristocratic warlike culture of Indo European speakers Among

the many fascinating topics discussed are the ascendancy of multicultural historians and the degradation of European history China s ecological endowments and imperial windfalls military revolutions in Europe 1300 1800 the science and chivalry of Henry the Navigator Judaism and its contribution to Western rationalism the cultural richness of Max Weber versus the intellectual poverty of Pomeranz Wong Goldstone Goody and A G Frank change without progress in the East Hegel s Phenomenology of the Western Spirit Nietzsche and the education of the Homeric Greeks Kojève s master slave dialectic and the Western state of nature Christian virtues and German aristocratic expansionism *Pre-Modern European Economy* Paolo Malanima,2009 The book provides an overall reconstruction of the European economy in the global context from the High Middle Ages until the beginning of Modern Growth in the 19th century *World History* Eric Vanhaute,2013-07-24 World History An Introduction provides readers with the knowledge and tools necessary to understand the global historical perspective and how it can be used to shed light on both our past and our present A concise and original guide to the concepts methods debates and contents of world history it combines a thematic approach with a clear and ambitious focus Each chapter traces connections with the past and the present to explore major questions in world history How did humans evolve from an endangered species to the most successful of them all How has nature shaped human history How did agricultural societies push human history in a new direction How has humankind organized itself in ever more complex administrative systems How have we developed new religious and cultural patterns How have the paths of The West and The Rest diverged over the last five centuries How at the same time has the world become more interconnected and globalized How is this world characterized by growing gaps in wealth poverty and inequality Sharp and accessible Eric Vanhaute s introduction to this exciting field demonstrates that world history is more of a perspective than a single all encompassing narrative an instructive new way of seeing thinking and doing It is an essential resource for students of history in a global context The Rise of Market Society in England, 1066-1800 Christiane Eisenberg,2013-12-01 Focusing on England this study reconstructs the centuries long process of commercialization that gave birth to the modern market society It shows how certain types of markets e g those for real estate labor capital and culture came into being and how the social relations mediated by markets were formed The book deals with the creation of institutions like the Bank of England the Stock Exchange and Lloyd s of London as well as the way the English dealt with the uncertainty and the risks involved in market transactions Christiane Eisenberg shows that the creation of a market society and modern capitalism in England occurred under circumstances that were utterly different from those on the European continent In addition she demonstrates that as a process the commercialization of business society and culture in England did not lead directly to an industrial society as has previously been suggested but rather to a service economy *The Benefit of Broad Horizons* ,2010-10-25 More than perhaps anybody else in the world the Swedish political scientist and sociologist Björn Wittrock has contributed both on the intellectual and institutional level to making a truly global social science possible This volume contains contributions from

twenty six world renowned scholars who address different aspects of his ambitious research program as well as current trends in the institutionalization of the social and human sciences The essays in this volume focus on such topics as the role of the state the reintegration of history and the social sciences the importance of civilizational studies and the comparison of civilizations the interaction of cultural and social dynamics the analysis of trends in higher education and the institutionalization of social scientific research **Reorienting the 19th Century** Andre Gunder Frank, Robert A.

Denemark, 2015-10-23 Andre Gunder Frank was a path breaking scholar in several disciplines over an illustrious and contentious 50 year career First amongst his many important works is the book ReORIENT Global Economy in the Asian Age which sought to correct a Euro centric world view of the development of the global political economy Frank passed away in April 2005 while working on this new book a sequel to ReORIENT In this book Frank shows many of the myths of European industrialisation hegemony and capitalism which have hidden the fact that Asia remained a serious power not just into the 18th century as Frank himself argued in 1998 but well into the 19th century as well When Frank passed away his colleagues rallied to finish this book and it is presented here as his final major statement *The Industrial Revolution in World History*

Peter N Stearns, 2018-04-17 The industrial revolution was the single most important development in human history over the past three centuries and it continues to shape the contemporary world With new methods and organizations for producing goods industrialization altered where people live how they play and even how they define political issues By exploring the ways the industrial revolution reshaped world history this book offers a unique look into the international factors that started the industrial revolution and its global spread and impact In the fourth edition noted historian Peter N Stearns continues his global analysis of the industrial revolution with new discussions of industrialization outside of the West including the study of India the Middle East and China In addition an expanded conclusion contains an examination of the changing contexts of industrialization The Industrial Revolution in World History is essential for students of world history and economics as well as for those seeking to know more about the global implications of what is arguably the defining socioeconomic event of modern times *Varieties of Capitalism and New Institutional Deals* Wolfram Elsner, Gerhard Hanappi, 2008-11-28 In response to

global and technological challenges this text highlights the continuing diversity of national institutional reconfigurations and policy reforms from an institutional economics perspective **The Cambridge History of Capitalism: Volume 1, The**

Rise of Capitalism: From Ancient Origins to 1848 Larry Neal, Jeffrey G. Williamson, 2014-01-23 The first volume of The Cambridge History of Capitalism provides a comprehensive account of the evolution of capitalism from its earliest beginnings Starting with its distant origins in ancient Babylon successive chapters trace progression up to the Promised Land of capitalism in America Adopting a wide geographical coverage and comparative perspective the international team of authors discuss the contributions of Greek Roman and Asian civilizations to the development of capitalism as well as the Chinese Indian and Arab empires They determine what features of modern capitalism were present at each time and place and why

the various precursors of capitalism did not survive Looking at the eventual success of medieval Europe and the examples of city states in northern Italy and the Low Countries the authors address how British mercantilism led to European imitations and American successes and ultimately how capitalism became global

An East Asian Route of Industrialization? The Case of Japan, 1868-1937 Peer Vries,2022-08-01 In this book Peer Vries is the first scholar to provide an extensive test of the claim that industrialization in East Asia in particular in Japan between the Meiji Restoration and World War Two would have been much more labour intensive than industrialization in the West He does this by systematically comparing the role and importance of labour and capital in Japan and in a number of Western countries at a similar stage of their industrial development He uses macro economic data as well as specific observations by people at the time It turns out that there is no reason to distinguish a specific labour intensive Japanese route of industrialization His comparative analysis provides us with a better understanding of the logic of industrialization in both West and East
