International TRON Project Symposium The TRON Project was proposed by Dr Ken Sakamura of the University of Tokyo with

the aim of designing a new comprehensive computer architecture that is open to worldwide use Already more than six years

have passed since the project was put in motion The TRON Association is now made up of over 140 companies and

organizations including 25 overseas firms or their affiliates A basic goal of TRON Project activities is to offer the world a

human oriented computer culture that will lead to a richer and more fulfilling life for people throughout the world It is our

desire to bring to reality a new order in the world of computers based on design concepts that consider the needs of human

beings first of all and to enable people to enjoy the full benefits of these computers in their daily life Thanks to the efforts of

Association members in recent months a number of TRON specification 32 bit microprocessors have been made available

ITRON specification products are continuing to appear and we are now seeing commercial implementations of BTRON

specifications as well The CTRON subproject meanwhile is promoting standardization through validation testing and a

portability experiment and products are being marketed by several firms This is truly a year in which the TRON Project has
