Voices From The River:

A Voice from the River Dan Gerber, 2005-10-11 This novel is one of Dan Gerber's triumphs. From the author of *American Atlas*, *Out of Control*, and *Grass Fires*, Gerber's *A Voice From the River* followed *Grass Fires* to prominence on national bestseller lists. This novel once again affirms the Gerber's solid reputation for writing about the confrontation of the Spirit World and what some consider to be the Last of Days.

The Voice of the River Melanie Rae Thon, 2011-09-09 The search for a missing boy and his dog illuminates the inner lives of a multitude of individuals with charged needs and desires, a confession of faith, and a love song to the world.

Finding the Voice of the River Gary J. Brierley, 2019-09-27 This book addresses societal relationships to river systems, highlighting many unexplored possibilities in how we know and manage our rivers. Brierley contends that although we have good scientific understanding of rivers with remarkable prospect for profound improvements to river condition management applications, greatly under-delivered. He conceptualizes approaches to river repair in two very different ways: Medean competitive and Gaian cooperative. Rather than managing rivers to achieve particular anthropogenic goals, the former option this book adopts a more than human approach to living with living rivers; the latter option applying a river rights framework that conceptualizes rivers as sentient entities. Chapters build on significant experience across many parts of the world, emphasizing the diverse array of river attributes and relationships to be protected and the wide range of problems to be addressed. Although the book has an environmental focus, it is framed as an argument in popular philosophy contemplating the agency of rivers as place beings. It will be of great value to academics, students, and general readers interested in protecting river systems.

Bear River Craig Denton, 2007-05-01 Craig Denton notes: Water will be the primary political, social, and economic issue in the Intermountain West in the twenty-first century. Urban Utah thirsts for the Great Salt Lake principal source, the Bear River. Plans abound to divert it for a rapidly growing Wasatch Front as the last good option for future water. But is it? Who now uses the river and how? Who are its stakeholders? What does the Bear mean to them? What is left for further use? How do we measure the Bear's own interest? Give it a voice in decisions. Craig Denton's documentary takes on these questions. He tells the story of the river and the people of many sorts with diverse purposes who live and depend on it. Bear River begins in alpine snowfields, lakes, and creeks in the Uinta Mountains, flows north through Wyoming, loops south in Idaho, and enters the inland sea by way of the environmentally critical bird refuge. Along the way, it has many uses: habitat, farms, electricity, recreation, lawns, and homes. Denton researches the natural and human history of the river, photographed it, interviewed many stakeholders, and tried to capture the river perspective. His photographs, printed as crisp duotones, carry us downstream ultimately to big questions begging to be answered soon about what we should and can make of the Bear River. Denton writes: Gravity, my engine. Water, my soul. I am the teller of life and deep time. You would measure me. Sever me. Own me. In your name. Let me flow. In your imagination. That I may speak.

River of Mountains Peter Lourie,2023-11-15 Lourie completed his trip It took him three weeks and marked the first time anyone has traveled from the source of the Hudson to the mouth in a single vessel The Hudson proved to be a very changeable river It includes seven locks and nine power dams The northern half is a true river with strong current but the lower half is tidal a sunken river from the days of glaciers In its first 165 miles it drops more than 4 000 feet to Albany The second half falls no more than a foot Lourie s account of his trip is a fresh look at one of America s great and complex waterways one of the few in fact that still contains its historical and biological species of fish It is also the longest inland estuary in the world Henry Hudson called it the great river of the mountains Nowadays too often the Hudson is stereotyped as a ruined polluted industrial river Its glorious past is compared to its present neglect In *River of Mountains* Peter Lourie combines the Hudson s rich history and descriptions of some of the region s most impressive landscape with the residents of its mill towns the loggers commercial fishermen and barge pilots all of whom are proof that the river is still a

thriving vital waterway So come with Peter Lourie on his trip come explore with him from a canoe one of this country's great rivers join him in his wonderful adventure
