Rethinking Environmental Sociology John Hannigan, 2025-01-09 This unique and innovative book explores the sociology of environmental morality John Hannigan presents a unique framework by which we can understand the ongoing moralisation of environmental issues re interpreting the development of environmental sociology as a transition from moral learning to moral outrage

Fractured Communities Anthony E. Ladd, 2018-03-23 While environmental disputes and conflicts over fossil fuel extraction have grown in recent years few issues have been as contentious in the twenty first century as those surrounding the impacts of unconventional natural gas and oil development using hydraulic drilling and fracturing techniques more commonly known as fracking on local communities In *Fractured Communities* Anthony E Ladd and other leading environmental sociologists present a set of crucial case studies analyzing the differential risk perceptions socio environmental impacts and mobilization of citizen protest or quiescence surrounding unconventional energy development and hydraulic fracking in a number of key U S shale regions *Fractured Communities* reveals how this contested terrain is expanding pushing the issue of fracking into the mainstream of the American political arena

The Encyclopedia of Housing, Second Edition Andrew T. Carswell, 2012-06-13 The second edition of the *Encyclopedia of Housing* has been updated to reflect the significant changes in the market that make the landscape of the industry so different today and includes articles from a fresh set of scholars who have contributed to the field over the past twelve years

Hurricane Katrina and the Redefinition of Landscape DeMond Shondell Miller, Jason David Rivera, 2009-01-01 Miller and Rivera explore how the fundamental changes to the physical landscape after Hurricane Katrina

set the stage for dramatic changes to come for the city and region and how these changes altered the economic cultural and political lives of the survivors *The Environment and the People in American Cities, 1600s-1900s* Dorceta E.

Taylor,2009-11-23 This wide ranging study of urban environmental history draws our attention to environmental challenges faced by American cities over the past four centuries showing how understandings of race class and gender shape discourse on the environment **Elgar Encyclopedia of Environmental Sociology** Christine Overdevest,2024-04-12 The Elgar

Encyclopedia of Environmental Sociology serves as a repository of insight on the complex interactions challenges and potential solutions that characterize our shared ecological reality Presenting innovative thinking on a comprehensive range of topics expert scholars researchers and practitioners illuminate the nuances complexities and diverse perspectives that define the continually evolving field of environmental sociology Social conflict and the making of a globalized place at Roșia Montană Filip M. Alexandrescu,2020-06-01 The book provides a theoretically informed case study on the

transformation of the experience of place in the two decades old conflict over the Ro ia Montan mine in Romania First the case study is set within a political economy approach of mining places before and during globalization The second theoretical approach used to illuminate the transformations of place is anthropological and draws on Clifford Geertz s 1979 distinction between experience nearness and experience distance Both these theoretical strands are employed to explain transformations in the experience of place and the subsequent making of a globalized place In contrast to the majority of social scientific research on Ro ia Montan which has used this case to illustrate broader arguments in political ecology or environmental justice e g moral economies degrowth or transnationalism this book explores the shifting discourses and practices of various local and extra local actors and how these have shaped the meanings of this place Without claiming to be impartial the book offers a critical interpretation of both corporate and social movement discourses as they shape the experience of place The arguments are fleshed out using extensive empirical material 66 individual respondents being mentioned in the analysis and contextualized interpretations of their views The book concludes by arguing that Ro ia Montan can offer a contemporary version of what Doreen Massey 1991 has called a progressive notion of place one which will increasingly render extractive projects both in Romania and worldwide as critical nodes in a web of socio ecological struggles and open ended change Toxic and Intoxicating Oil Patricia Widener,2021-03-12 When oil and gas exploration was

expanding across Aotearoa New Zealand Patricia Widener was there interviewing affected residents and environmental and climate activists and attending community meetings and anti drilling rallies Exploration was occurring on an unprecedented scale when oil disasters dwelled in recent memory socioecological worries were high campaigns for climate action were becoming global and transitioning toward a low carbon society seemed possible Yet unlike other communities who have experienced either an oil spill or hydraulic fracturing or offshore exploration or climate fears or disputes over unresolved Indigenous claims New Zealanders were facing each one almost simultaneously Collectively these grievances created the

foundation for an organized civil society to construct and then magnify a comprehensive critical oil narrative in dialogue practice and aspiration Community advocates and socioecological activists mobilized for their health and well being for their neighborhoods and beaches for Planet Earth and Planet Ocean and for terrestrial and aquatic species and ecosystems They rallied against toxic climate altering pollution the extraction of fossil fuels a myriad of historic and contemporary inequities and for local just and sustainable communities ecologies economies and or energy sources In this allied ethnography quotes are used extensively to convey the tenor of some of the country s most passionate and committed people By analyzing the intersections of a social movement and the political economy of oil Widener reveals a nuanced story of oil resistance and promotion at a time when many anti drilling activists believed themselves to be on the front lines of the industry s inevitable decline

A Companion to the Anthropology of Environmental Health Merrill Singer, 2016-05-31 A Companion to the Anthropology of Environmental Health presents a collection of readings that utilize a medical anthropological approach to explore the interface of humans and the environment in the shaping of health and illness around the world Features the latest ethnographic research from around the world related to the multiple impacts of the environment on health and of societies on their environments Includes contributions from international medical anthropologists conservationists environmental experts public health professionals health clinicians and other social scientists Analyzes the conditions of cultural and social transformation that accompany environmental and ecological impacts in all areas of the world Offers critical perspectives on theoretical and methodological advancements in the anthropology of environmental health along with future directions in the field

From Workshop to Waste Magnet Diane Sicotte, 2016-09-21 Like many industrialized regions the Philadelphia metro area contains pockets of environmental degradation neighborhoods littered with abandoned waste sites polluting factories and smoke belching incinerators However other neighborhoods within and around the city are relatively pristine This eye opening book reveals that such environmental inequalities did not occur by chance but were instead the result of specific policy decisions that served to exacerbate endemic classism and racism From Workshop to Waste Magnet presents Philadelphia s environmental history as a bracing case study in mismanagement and injustice Sociologist Diane Sicotte digs deep into the city s past as a titan of American manufacturing to trace how only a few communities came to host nearly all of the area s polluting and waste disposal land uses By examining the complex interactions among economic decline federal regulations local politics and shifting ethnic demographics she not only dissects what went wrong in Philadelphia but also identifies lessons for environmental justice activism today Sicotte s research tallies both the environmental and social costs of industrial pollution exposing the devastation that occurs when mass quantities of society s wastes mix with toxic levels of systemic racism and economic inequality From Workshop to Waste Magnet is a compelling read for anyone concerned with the health of America s cities and the people who live in them

Superstorm Sandy Diane C. Bates, 2016-01-18 Sandy was the costliest hurricane in U S history after Katrina but the waters had barely

receded from the Jersey coast when massive efforts began to Restore the Shore Why do people build in areas open to repeated natural disasters And why do they return to these areas in the wake of major devastation Drawing on a variety of insights from environmental sociology Superstorm Sandy answers these questions as it looks at both the unique character of the Jersey Shore and the more universal ways that humans relate to their environment Diane C Bates offers a wide ranging look at the Jersey Shore both before and after Sandy examining the many factors such as cultural attachment tourism revenues and governmental regulation that combined to create a highly vulnerable coastal region She explains why the Shore is so important to New Jerseyans acting as a key cultural touchstone in a state that lacks a central city or even a sports team to build a shared identity among the state s residents She analyzes post Sandy narratives about the Jersey Shore that trumpeted the dominance of human ingenuity over nature such as the state s Stronger than the Storm advertising campaign or proclaimed a therapeutic community Jersey Strong narratives rooted in emotion and iconography waylaying any thought of the near certainty of future storms The book also examines local business owners politicians real estate developers and residents who have vested interests in the region explaining why the Shore was developed intensively prior to Sandy and why restoration became an imperative in the post storm period Engagingly written and insightful Superstorm Sandy highlights the elements that compounded the disaster on the Shore providing a framework for understanding such catastrophes and preventing them in the future

After the Disaster , **Risk and Social Theory in Environmental Management** Tom Measham, Stewart Lockie, 2012 Risk and Social Theory in Environmental Management marks a timely contribution given that environmental management is no longer just about protecting pristine ecosystems and endangered species from anthropogenic harm it is about calculating and managing the risks to human communities of rapid environmental and technological change First the book provides a solid foundation of the social theory underpinning the nature of risk then presents a rethinking of key concepts and methods in order to take more seriously the biophysical embeddedness of human society Second it presents a rich set of case studies from Australia and around the world drawing on the latest applied research conducted by leading research institutions In so doing the book identifies the tensions that arise from decision making over risk and uncertainty in a contested policy environment and provides crucial insights for addressing on the ground problems in an integrated way First volume to address environmental risk from a social science perspective Latest theoretical developments In depth case studies of contemporary issues e g climate change water shortages **Climate change and poverty** Fitzpatrick, Tony, 2014-09-25 Climate change is the main challenge facing developed countries in the 21st century To what extent does this agenda converge with issues of poverty and social exclusion Climate change and poverty offers a timely new perspective on the ecosocial understanding of the causes and symptoms of and solutions to poverty and applies this to recent developments across a number of areas including fuel poverty food poverty housing transport and air pollution Unlike any other publication the book therefore establishes a new agenda for both environmental

and social policies which has cross national relevance It will appeal to students in social policy public policy applied social studies and politics and will also be of interest to those studying international development economics and geography

Rural Criminology Joseph F Donnermeyer, Walter DeKeseredy, 2013-10-15 Rural crime is a fast growing area of interest among scholars in criminology From studies of agricultural crime in Australia to violence against women in Appalachia America to poaching in Uganda to land theft in Brazil the criminology community has come to recognize that crime manifests itself in rural localities in ways that both conform to and challenge conventional theory and research For the first time Rural Criminology brings together contemporary research and conceptual considerations to synthesize rural crime studies from a critical perspective This book dispels four rural crime myths challenging conventional criminological theories about crime in general It also examines both the historical development of rural crime scholarship recent research and conceptual developments The third chapter recreates the critical in the rural criminology literature through discussions of three important topics community characteristics and rural crime drug use production and trafficking in the rural context and agricultural crime Never before has rural crime been examined comprehensively using any kind of theoretical approach whether critical or otherwise Rural Criminology does both pulling together in one short volume the diverse array of empirical research under the theoretical umbrella of a critical perspective This book will be of interest to those studying or researching in the fields of rural crime critical criminology and sociology
