We Could Not Fail The First African Americans In The Space Program:

We Could Not Fail Richard Paul, Steven Moss, 2015-05-01 The Space Age began just as the struggle for civil rights forced Americans to confront the long and bitter legacy of slavery discrimination and violence against African Americans Presidents John F Kennedy and Lyndon Johnson utilized the space program as an agent for social change using federal equal employment opportunity laws to open workplaces at NASA and NASA contractors to African Americans while creating thousands of research and technology jobs in the Deep South to ameliorate poverty *We Could Not Fail* tells the inspiring largely unknown story of how shooting for the stars helped to overcome segregation on earth Richard Paul and Steven Moss profile ten pioneer African American space workers whose stories illustrate the role NASA and the space program played in promoting civil rights They recount how these technicians mathematicians engineers and an astronaut candidate surmounted barriers to move in some cases literally from the cotton fields to the launching pad The authors vividly describe what it was like to be the sole African American in a NASA work group and how these brave and determined men also helped to transform Southern society by integrating colleges patenting new inventions holding elective office and reviving and governing defunct towns Adding new names to the roster of civil rights heroes and a new chapter to the story of space exploration *We Could Not Fail* demonstrates how African Americans broke the color barrier by competing successfully at the highest level of American intellectual and technological achievement

NASA and the Long Civil Rights Movement

Brian C. Odom, Stephen P. Waring, 2022-04-12 Examining the ways in which NASA's goal of space exploration both conflicted and aligned with the cause of racial equality this volume provides new insights into the complex relationship between the space program and the civil rights movement in the Jim Crow South and abroad

Gender and the Race for Space Erinn McComb, 2025-06-10 The American astronaut image was informed by early Cold War ideals of masculinity that helped mold a distinctly American anti communist masculinity which appeared on the surface anyway to resolve not only an American crisis of masculinity but helped win the Cold War on an ideological and popular level This American image focused on strict gender binaries of man as the protector controlling technology and containing communism while woman was the passive actor with spaceflight technology left behind in the home waiting for the return of the astronaut husband Allowing women to fly into space would have represented a lack of individual control with spaceflight technology
