Manual of Digital Earth Huadong Guo,Michael F. Goodchild,Alessandro Annoni,2019-11-18 This open access book offers a summary of the development of Digital Earth over the past twenty years By reviewing the initial vision of Digital Earth the evolution of that vision the relevant key technologies and the role of Digital Earth in helping people respond to global challenges this publication reveals how and why Digital Earth is becoming vital for acquiring processing analysing and mining the rapidly growing volume of global data sets about the Earth The main aspects of Digital Earth covered here include Digital Earth platforms remote sensing and navigation satellites processing and visualizing geospatial information geospatial information infrastructures big data and cloud computing transformation and zooming artificial intelligence Internet of Things and social media Moreover the book covers in detail the multi layered multi faceted roles of Digital Earth in response to sustainable development goals climate changes and mitigating disasters the applications of Digital Earth such as digital city and digital heritage the citizen science in support of Digital Earth the economic value of Digital Earth and so on This book also reviews the regional and national development of Digital Earth around the world and discusses the role and effect of education and ethics Lastly it concludes with a summary of the challenges and forecasts the future trends of Digital Earth By sharing case studies and a broad range of general and scientific insights into the science and technology of Digital Earth this book offers an essential introduction for an ever growing international audience *Remote Sensing of Leaf Area Index (LAI) and Other Vegetation Parameters* Francisco Javier García-Haro,Hongliang Fang,Juan M. Lopez Sanchez,2019-09-16 Monitoring of vegetation structure and functioning is critical to modeling terrestrial ecosystems and energy cycles In particular leaf area index LAI is an important structural property of vegetation used in many land surface vegetation climate and crop production models Canopy structure LAI fCover plant height and biomass and biochemical parameters leaf

pigmentation and water content directly influence the radiative transfer process of sunlight in vegetation determining the amount of radiation measured by passive sensors in the visible and infrared portions of the electromagnetic spectrum Optical remote sensing RS methods build relationships exploiting in situ measurements and or as outputs of physical canopy radiative transfer models The increased availability of passive radar and LiDAR RS data has fostered their use in many applications for the analysis of land surface properties and processes thanks also to their insensitivity to weather conditions and the capability to exploit rich structural and textural information Data fusion and multi sensor integration techniques are pressing topics to fully exploit the information conveyed by both optical and microwave bands

Tropical Cyclone Modeling and Prediction: Advances in Model Development and Its Applications Xuejin Zhang, Robert Rogers, Krishna K. Osuri, Vijay Tallapragada, Zhan Zhang, 2025-06-02 Tropical cyclones TCs can cause billions of dollars in property damage and up to thousands of life losses globally every year In order to mitigate these socioeconomic impacts scientists have strived in developing sophisticated numerical modeling systems to provide better tools for research and forecast communities especially in those coastal countries and regions that are impacted substantially by TCs in the past several decades Recently several accelerated efforts were made by several research and operational centers after tremendous property and life losses by landfall TCs in the North Atlantic the Western North Pacific and the North Indian Ocean basins The modeling systems in regional forecast centers are planning to upgrade to the next generation or make significant advances through those accelerations In this Research Topic the goal is to document the latest developments physics improvements data assimilation holistic forecast systems and their applications Themes include the significant model new features high resolution physics for TC applications data assimilation methodology and observational data impacts forecast experiments model verification and validation Studies on the role of physical processes associated with the boundary layer convection and microphysics radiation land surface processes air sea wave processes are encouraged The model evaluations including quantitative precipitation forecasts and tools and products for TC research and forecasts are welcome as well Novel studies and latest model developments having a research to operation R2O transition possibility will be considered for publication The ultimate goal is to exchange research ideas advances and understanding across the global TC communities We welcome Original Research and Review Articles from development observational numerical modeling and forecasting perspectives on TCs Articles can include but are not limited to the following topics Model development TC vortex initialization algorithm High resolution physics for TC Air sea wave interactions Model tracking and intensity verification Data assimilation methods Observational data impacts Model evaluation tools Model evaluation comparison products for research and forecasts and Novel studies based on new findings and methodology

Greene's Infectious Diseases of the Dog and Cat - E-Book Jane E. Sykes, 2022-06-24 Selected for Doody's Core Titles 2024 with Essential Purchase designation in Veterinary Medicine Greene's Infectious Diseases of the Dog and Cat 5th Edition provides a comprehensive clinically useful reference on the management

of infectious diseases caused by viruses bacteria including rickettsiae chlamydiae mycoplasmas and spirochetes fungi algae protozoa parasites and other atypical agents Each section guides the reader through diagnostic testing for specific infectious diseases from specimen collection to laboratory submission to interpretation of results to appropriate treatment measures Full color illustrations and hundreds of tables provide convenient access to diagnostic and therapeutic recommendations along with the appropriate drug dosages for effective treatment and prevention A fully searchable enhanced eBook version is included with print purchase allowing access to all of the text and figures on a variety of digital devices More than 150 internationally recognized experts contribute chapters on topics in their field of specialty Clear and logical organization of chapters provides a solid basis for an approach to diseases caused by specific pathogens with the first part of the book including sections on diagnostic approaches treatments including recommended antimicrobial drug doses and prevention Specific pathogens are addressed in the second part of the book using a structured approach that includes etiology epidemiology relevance to wildlife animal hosts role of the environment clinical and laboratory findings treatment prevention and public health implications Case examples illustrate principles and highlight how the material can be applied More than 800 clinical images maps life cycles and photomicrographs assist with accurate understanding of epidemiology pathogenesis diagnosis of disease and disease prevention Visually appealing maps and life cycle drawings enhance your comprehension and retention of the material Convenient drug dosage tables in each chapter provide complete prescribing information chapters on antimicrobial drugs in the first part of the book summarize pharmacokinetics indications contraindications handling and administration guidelines and dosage recommendations are made for antivirals antibacterials antifungals antiprotozoals and antiparasitic drugs The book emphasizes approaches to optimize antimicrobial stewardship Clinical Problems section helps you understand what infectious diseases should be considered in animals seen with clinical signs relating to different organ systems Suggested readings and references are listed in each chapter facilitating further research and study Fully searchable enhanced eBook version is included with print purchase allowing access to all of the text and figures on a variety of digital devices Scientific and Technical Aerospace Reports ,1994 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database

Cinematic Tourist Mobilities and the Plight of Development Rodanthi Tzanelli,2018-11-09 It is said that movies have encroached upon social realities creating tourism enclaves based on distortions of history and heritage or simulations that disregard both What localities and nation states value are discarded suppressed or modified beyond recognition in neoliberal markets thus flattening out human experience destroying natural habitats in the name of development and putting the future of whole ecosystems at risk Without disregarding such developmental risks Cinematic Tourist Mobilities and the Plight of Development explores how en route to any beneficial or eco destructive development film tourist industries co produce atmospheres of place and culture with

tourists film fans local activists and nation states Drawing on international examples of cinematically induced tourism and tourismophobic activism Tzanelli demonstrates how the allegedly unilateral industry driven design of location stands at a crossroads between political structures systems of capitalist development and resurgent localised agency With an interdisciplinary methodological and epistemological portfolio connected to the new mobilities paradigm this volume will appeal to scholars students and practitioners interested in tourism migration and urban studies in sociology anthropology geography and international relations

The Internet of Things for Smart Urban Ecosystems Franco Cicirelli, Antonio Guerrieri, Carlo Mastroianni, Giandomenico Spezzano, Andrea Vinci, 2018-08-10 The main objective of this book is to provide a multidisciplinary overview of methodological approaches architectures platforms and algorithms for the realization of an Internet of Things IoT based Smart Urban Ecosystem SUE Moreover the book details a set of real world applications and case studies related to specific smart infrastructures and smart cities including structural health monitoring smart urban drainage networks smart grids power efficiency healthcare city security and emergency management A Smart Urban Ecosystem SUE is a people centric system of systems that involves smart city environments applications and infrastructures SUEs require the close integration of cyber and physical components for monitoring understanding and controlling the urban environment In this context the Internet of Things IoT offers a valuable enabling technology as it bridges the gap between physical things and software components and empowers cooperation between distributed pervasive and heterogeneous entities

Principles of Occupational Health and Hygiene Sue Reed, 2024-11-29 Now in its fourth edition this book allows for early career occupational hygienists and occupational health and safety professionals or students to develop their basic skills and knowledge to anticipate recognize evaluate and control workplace hazards that can result in injury illness impairment or affect the well being of workers and members of the community Principles of Occupational Health and Hygiene An Introduction Fourth Edition offers a comprehensive overview of occupational health risks and hazardous environments encountered in a range of industries and organizational settings This new edition offers information on the current techniques and equipment used in assessing workplace hazards Methods of assessment are developing at a rapid rate due to the new technologies now available Featuring new chapters on occupational hygiene statistics and psychosocial hazards and fully updated throughout leading industry professionals and educators explain how to identify key workplace hazards including chemical agents such as dusts metals and gases physical agents such as noise radiation and extremes of heat and cold and microbiological agents The book highlights assessment procedures and processes for identifying exposure levels and explains how to evaluate risk and follow safety guidelines to control and manage these hazards effectively Highly illustrated up to date with current Workplace Health and Safety legislation and written in a jargon free manner this book will be a bible to any student or professional Principles of Occupational Health and Hygiene An Introduction Fourth Edition is an essential reference for students early career Occupational Hygienists professionals and anyone in an Occupational Health

and Safety role **Physical Modelling in Geotechnics, Volume 1** Andrew McNamara, Sam Divall, Richard Goodey, Neil Taylor, Sarah Stallebrass, Jignasha Panchal, 2018-07-11 Physical Modelling in Geotechnics collects more than 1500 pages of peer reviewed papers written by researchers from over 30 countries and presented at the 9th International Conference on Physical Modelling in Geotechnics 2018 City University of London UK 17-20 July 2018 The ICPMG series has grown such that two volumes of proceedings were required to publish all contributions The books represent a substantial body of work in four years Physical Modelling in Geotechnics contains 230 papers including eight keynote and themed lectures representing the state of the art in physical modelling research in aspects as diverse as fundamental modelling including sensors imaging modelling techniques and scaling onshore and offshore foundations dams and embankments retaining walls and deep excavations ground improvement and environmental engineering tunnels and geohazards including significant contributions in the area of seismic engineering ISSMGE TC104 have identified areas for special attention including education in physical modelling and the promotion of physical modelling to industry With this in mind there is a special themed paper on education focusing on both undergraduate and postgraduate teaching as well as practicing geotechnical engineers Physical modelling has entered a new era with the advent of exciting work on real time interfaces between physical and numerical modelling and the growth of facilities and expertise that enable development of so called megafuges of 1000gtonne capacity or more capable of modelling the largest and most complex of geotechnical challenges Physical Modelling in Geotechnics will be of interest to professionals engineers and academics interested or involved in geotechnics geotechnical engineering and related areas The 9th International Conference on Physical Modelling in Geotechnics was organised by the Multi Scale Geotechnical Engineering Research Centre at City University of London under the auspices of Technical Committee 104 of the International Society for Soil Mechanics and Geotechnical Engineering ISSMGE City University of London are pleased to host the prestigious international conference for the first time having initiated and hosted the first regional conference Eurofuge ten years ago in 2008 Quadrennial regional conferences in both Europe and Asia are now well established events giving doctoral researchers in particular the opportunity to attend an international conference in this rapidly evolving specialist area This is volume 1 of a 2 volume set *Remote Sensing of Water-Related Hazards* Ke Zhang, Yang Hong, Amir AghaKouchak, 2022-03-18 Applications of remote sensing technology for monitoring and predicting water related hazards Water related hazards such as floods and droughts have serious impacts on society Their incidence has increased in recent decades a trend set to continue with ongoing climate change Adaptation and mitigation measures require accurate detection monitoring and forecasting much of which comes from remote sensing technologies Remote Sensing of Water Related Hazards takes an interdisciplinary approach presenting recent advances in the available data sensors models and indicators developed for monitoring and prediction Volume highlights include Progress in remote sensing of precipitation storms and tornados Different techniques for flood mapping forecasting and early warning Integrated approach for predicting flood and

landslide cascading hazards Satellite monitoring of water cycle variation water scarcity and drought conditions Multi indicator and multi sensor approaches for quantifying drought impacts The American Geophysical Union promotes discovery in Earth and space science for the benefit of humanity Its publications disseminate scientific knowledge and provide resources for researchers students and professionals

Application of the Systems Approach to the Management of Complex Water Systems Slobodan P. Simonovic, 2020-12-23 During the past five decades we have witnessed a tremendous evolution in water resource system management Three characteristics of this evolution are of particular note First the application of the systems approach to complex water management problems has been established as one of the most important advances in the field of water resource management Second the past five decades have brought a remarkable transformation of attitude in the water resource management community towards environmental concerns and action to address these concerns Third applying the principles of sustainability to water resource decision making requires major changes in the objectives on which decisions are based and an understanding of the complicated inter relationships between existing ecological economic and social factors The Special Issue includes 15 contributions that offer insights into contemporary problems approaches and issues related to the management of complex water resources systems It will be presumptuous to say that these 15 contributions characterize the success or failure of the systems approach to support water resources decision making However these contributions offer interesting lessons from current experiences and highlight possible future work

Environmental Protection and Disaster Risks Nina Dobrinkova, Orlin Nikolov, 2023-02-28 This book presents topics that are challenging fields that scientific world is trying to address as much as it can Earthquakes floods fires droughts blizzards dust storms natural releases of toxic gases and liquids diseases and other environmental variations affect hundreds of millions of people each year Many disaster events are triggered by human activities Dealing with these problems will require systems thinking and integrating multidisciplinary science Actions in these directions are taken more and more in the recent years by political bodies NGOs and scientific groups trying to find sustainable solutions for the future generations Every point of view matters when it comes to our global home The Planet Earth The book presents research findings and conclusions that have been developed as algorithms or new methods solving problems in the fields of disaster management natural hazards risk reduction and building resilience climate change challenges and security implications air pollution and health water resources and management and informatics remote sensing GIS and high performance computing The 2nd International Conference on Environmental Protection and Disaster Risks in combination with the 10th Annual CMDR COE Conference on Crisis Management and Disaster Response brought together in the period June 06 09 2022 in Sofia Bulgaria scientists who presented their findings in the fast developing environmental management and disaster risk reduction field

The Wildlife Techniques Manual Nova J. Silvy, 2020-07-28 The 1 selling wildlife management book for 40 years now updated for the next generation of professionals and students Since its original publication in 1960 The Wildlife

Techniques Manual has remained the cornerstone text for the professional wildlife biologist. Now fully revised and updated, this eighth edition promises to be the most comprehensive resource on wildlife biology, conservation, and management for years to come. Superbly edited by Nova J. Silvy and published in association with The Wildlife Society, the 50 authoritative chapters included in this work provide a full synthesis of methods used in the field and laboratory. Chapter authors, all leading wildlife professionals, explain and critique traditional and new methodologies and offer thorough discussions of a wide range of relevant topics. To effectively incorporate the explosion of new information in the wildlife profession, this latest edition is logically organized into a 2-volume set. Volume 1 is devoted to research techniques, and Volume 2 focuses on pragmatic management methodologies. Volume 1 describes research design and proper analytic methods prior to conducting research, as well as methods and considerations for capturing and handling wild animals and information on identification and marking of captured animals. It also includes new chapters on nutritional research and field sign identification and on emerging topics including structured decision making. Finally, Volume 1 addresses measurements of wildlife abundance and habitat and research on individual animals. Volume 2 begins with a section on the relationship between research and management, including public outreach described in a context that encourages engagement prior to initiation of management. An adaptive management approach is described as a cornerstone of natural resource management, followed by a section on managing landscapes and wildlife populations. The volume also includes new chapters on ethics in wildlife science and conservation, conflict resolution and management, and land reclamation. A standard text in a variety of courses, the Techniques Manual, as it is commonly called, covers every aspect of modern wildlife management and provides practical information for applying the hundreds of methods described in its pages. This deft and thorough update ensures that The Wildlife Techniques Manual will remain an indispensable resource, one that professionals and students in wildlife biology, conservation, and management simply cannot do without.

Biomimicry for Materials, Design and Habitats Marjan Eggermont, Vikram Shyam, Aloysius F. Hepp, 2022-02-21. *Biomimicry for Materials, Design and Habitats: Innovations and Applications* is a survey of the recent work of recognized experts in a variety of fields who employ biomimicry and related paradigms to solve key problems of interest within design, science, technology, and society. Topics covered include innovations from biomimicry in materials, product design, architecture, and biological sciences. The book is a useful resource for educators, designers, researchers, engineers, and materials scientists, taking them from the theory behind biomimicry to real-world applications. Living systems have evolved innovative solutions to challenges that humans face on a daily basis. Nonlinear, multifunctional systems that have a symbiotic relationship with their environment are the domain of nature. Morphological solutions for buildings inspired by nature can be used for skins, surfaces, and structures to facilitate environmental adaptation of buildings to increase occupant comfort and reduce energy demands. Birds can teach us to produce novel structures. 3D printing can be informed by oysters and mussels, and mycelium may show us the way to fabricate new biocomposites in architecture. Therefore, it is in

nature that we seek inspiration for the solutions to tomorrow's challenges Presents new directions in education and the various applications of biomimicry within industry including bio-inspired entrepreneurship Discusses the role of biomimicry in education innovation and product design Covers applications in systems engineering and design novel materials with applications in 3D printing and bio-inspired architecture Includes perspectives on sustainability detailing the role that bio inspiration or biomimicry plays in sustainability

Water-Related Natural Disasters in Mountainous Area, volume II

Jia-wen Zhou, Jie Dou, Xiekang Wang, Xudong Fu, Qihua Ran, Biswajeet Pradhan, 2024-03-13 In mountainous areas due to the unique geological and topographical conditions and along with the impact of global climate change extreme rainfall events often occur and induce natural disasters such as flash floods debris flows landslides dammed lakes and others These water related natural disasters WRNDs frequently occur around the world such as the July 29th 1998 debris flow and landslide dam at Capricorn Creek in Mount Meager Volcanic Complex southern Canada the flash flood of 20th August 2018 in Raganello Gorge southern Italy and the 2007 summer floods in the United Kingdom WRNDs are more serious in Southeast Asia particularly in Southwest China where many places suffer from such disasters in the flood season every year such as the May 20th 2012 flash flood debris flow among the hit area of Wenchuan earthquake the June 24th 2017 Xinmo Catastrophic landslide in Mao county and in 2018 the two sequential landslide dammed lake events at Jinsha River These WRNDs not only cause heavy casualties and property losses but also destroy the ecological environment These WRNDs are not only the concern of government managers and engineers but also deserve more in depth study from researchers Formation and evolution mechanisms of WRNDs are very complicated and influenced by several aspects such as geological and topographical conditions hydrometeorological conditions geomaterial properties rainfall history and flow condition and others Field and laboratory tests can help us to better understand the related mechanism behind the disasters Theoretical and empirical models modeling and numerical methods can provide more reasonable evaluation and forecasting results of WRNDs but a more in depth understanding is needed Furthermore for the risk control and hazard prevention and mitigation new equipment and technologies have been developed and have achieved some progress in recent years but the fast and effective emergency treatments for WRNDs need more attention

Recent Advances in Systems, Control and Information Technology Roman Szewczyk, Małgorzata Kaliczyńska, 2016-11-29 This book presents the proceedings of the International Conference on Systems Control and Information Technologies 2016 It includes research findings from leading experts in the fields connected with INDUSTRY 4.0 and its implementation especially intelligent systems advanced control information technologies industrial automation robotics intelligent sensors metrology and new materials Each chapter offers an analysis of a specific technical problem followed by a numerical analysis and simulation as well as the implementation for the solution of a real world problem

HSMV 2020 E. Begovic, 2020-11-03 This book presents the proceedings of the 12th International Symposium on High Speed Marine Vehicles held virtually as an e conference for the first time on 15 and 16 October 2020

High Speed Marine Vehicles Conference has almost 30 year history since the first Conference held in Naples in 1991 Since then it has been an opportunity to present and discuss developments in the design construction and operation of High Speed Marine Vessels More than 40 abstracts were submitted for this edition of the conference and following a rigorous review process 26 papers were selected for inclusion in this book These have been divided into 7 sections CFD EFD sea trials hydrofoils multi hull hydrodynamics planing hull hydrodynamics propulsion and ship machinery second generation intact stability criteria and structures loads strength and materials Topics covered include updated aspects of and developments in ship design numerical and experimental hydrodynamics seakeeping and maneuvering and marine structures and machinery This publication will be of interest to researchers from academia industry government agencies and certifying authorities as well as designers and operators of high speed vessels

Unveiling the Power of Verbal Art: An Mental Sojourn through **Weather Studies Investigations Manual 2015 7b**

In a world inundated with screens and the cacophony of instantaneous connection, the profound power and psychological resonance of verbal beauty frequently fade into obscurity, eclipsed by the regular onslaught of sound and distractions. However, located within the lyrical pages of **Weather Studies Investigations Manual 2015 7b**, a captivating function of literary beauty that impulses with natural emotions, lies an unforgettable trip waiting to be embarked upon. Written by a virtuoso wordsmith, this magical opus courses visitors on a mental odyssey, softly revealing the latent possible and profound impact embedded within the elaborate internet of language. Within the heart-wrenching expanse with this evocative evaluation, we can embark upon an introspective exploration of the book is central themes, dissect their captivating writing type, and immerse ourselves in the indelible effect it leaves upon the depths of readers souls.
