

SERVICE

REPLACING THE LINE

- Disconnect unit from the power source.
- Remove the spool by firmly pulling on the tap button.
- Clean entire surface of hub and spool.
- Replace with a pre-wound spool, or cut a length of 30 feet of 0.065 diameter Weed Eater® brand line. Use of heavier line could overload and damage the unit. Never use wire, rope, string, etc., which can break off and become a dangerous missile.
- Insert one end of the line about 1/2 inch (1 cm) into the small slot inside the spool.

- Wind the line evenly and tightly onto the spool. Wind in the direction of the arrow found on the spool.
- Push the line into the notch, leaving 3 to 5 inches (7 - 12 cm) unwound.
- Insert the line into the exit hole in the hub as shown in the illustration.

- Align the notch with the line exit hole.
- Push the spool into the hub until it snaps into place, while keeping light tension on the end of the line.
- Pull on the line extending outside of the hub to release it from the notch; otherwise, the unit will not function properly.

STORAGE

WARNING: Perform the following steps after each use.

- Stop the unit and disconnect the power source when not in use.
- Carry the unit with motor stopped.
- Store the unit so the line limiter blade cannot cause injury.
- Store unit and extension cord indoors in a high, dry place out of the reach of children. Store unit unplugged.
- Store unit with all guards in place. Position unit so that any sharp object cannot accidentally cause injury.
