Thuesen, 2020 One of the earliest sources of humanity's religious impulse was severe weather which ancient peoples attributed to the wrath of storm gods Enlightenment thinkers derided such beliefs as superstition but in America scientific and theological hubris came face to face with the tornado nature's most violent windstorm In this groundbreaking history Peter J Thuesen traces the primal connections between weather and religion in the United States He shows that tornadoes and other storms have repeatedly drawn Americans into the profoundest of religious mysteries and confronted them with the question of their own destiny how much is self determined and how much is beyond human understanding or control Scanning the Skies Marlene Bradford, 2001 Tornadoes nature's most violent and unpredictable storms descend from the clouds nearly one thousand times yearly and have claimed eighteen thousand American lives since 1880 However the U S Weather Bureau fearing public panic and believing tornadoes were too fleeting for meteorologists to predict forbade the use of the word tornado in forecasts until 1938 *Scanning the Skies* traces the history of today's tornado warning system a unique program that integrates federal state

and local governments privately controlled broadcast media and individuals Bradford examines the ways in which the tornado warning system has grown from meager beginnings into a program that protects millions of Americans each year Although no tornado forecasting program existed before WWII the needs of the military prompted the development of a severe weather warning system in tornado prone areas Bradford traces the post war creation of the Air Force centralized tornado forecasting program and its civilian counterpart at the Weather Bureau Improvements in communication especially the increasing popularity of television allowed the Bureau to expand its warning system further This book highlights the modern tornado watch system and explains how advancements during the latter half of the twentieth century such as computerized data collection and processing systems Doppler radar state of the art television weather centers and an extensive public education program have resulted in the drastic reduction of tornado fatalities **The Handy Weather Answer Book** Walter Andrew Lyons,2004 *Forthcoming Books* Rose Arny,1996-06 **The Publishers Weekly** ,1997
