Heritage of Giotto's Geometry Samuel Y. Edgerton,1991 This ambitious book explores the relationship between the
Western scientific revolution that began with Galileo in the early seventeenth century and the Renaissance artistic revolution
inaugurated by Giotto three hundred years earlier The fruit of many years of thought and research it demonstrates the
crucial role that Italian Renaissance painting sculpture and architecture played in what we call modern science Samuel Y
Edgerton Jr shows that rather than being symptomatic in nature the arts served as a catalyst for the transformation in
perception which occurred in the West in the fourteenth century According to Edgerton the new way in which reality was
represented through the use of the unique Renaissance tools of perspective and chiaroscuro set the stage for modern
