Polypropylene J. Karger-Kocsis, 2012-12-06 My heart sank when I was approached by Dr Hastings and by Professor Briggs Senior Editor of Materials Science and Technology and Series Editor of Polymer Science and Technology Series at Chapman Hall respectively to edit a book with the provisional title Handbook of Poly propylene My reluctance was due to the fact that my former book 1 along with that of Moore 2 issued in the meantime seemed to cover the information demand on polypropylene and related systems Encouraged however by some colleagues the new generation of scientists and engineers needs a good reference book with easy information retrieval and the development with metallocene catalysts deserves a new update I started on this venture Having some experience with polypropylene systems and being aware of the current literature it was easy to settle the titles for the book chapters and also to select and approach the most suitable potential contributors Fortunately many of my first choice authors accepted the invitation to contribute Like all editors of multi author volumes I recognize that obtaining contributors follows an S type curve of asymptotic saturation when the number of willing contributors is plotted as a function of time The saturation point is however never reached and as a consequence Dear Reader you will also find some topics of some relevance which are not explicitly treated in this book but believe me I have considered them
