Tourism and Inclusive Growth in Small Island Developing States. M.P. Hampton, J. Jeyacheya. Commonwealth Secretariat, London (2013). Price £22.49, 104 pp. (paperback), ISBN: 978-1-84929-307-1

Small island developing states (SIDS) are often viewed as being vulnerable to economic shocks since these islands may possess limited resources to sustain economic growth. Thus, consideration of inclusive growth strategies is welcomed. This book is written by Hampton and Jeyacheya (2013) and is a report supported by the Commonwealth Secretariat and the World Bank. The authors suggested that the tourism sector plays a 'catalytic role' in small island developing states. Developing the tourism sector however, comes with certain challenges which make it a limited growth strategy for SIDS, and therefore the authors sought to report on these challenges by providing numerous pieces of evidence from four SIDS, Jamaica, Maldives, Mauritius and Seychelles. The book comprises five (5) chapters and several pages were assigned to appendices with data from the SIDS cases. Broadly, the peculiarity of many SIDS is that these are placed in vast oceans and seas. This adds to their beauty and tourism potential on one side and limits their accessibility on the other. If there can be no tourism without travel, then to begin with, these states are disadvantaged unless these islands can build bridges to improve accessibility and this is the reason why the accessibility dimension would have added to the contribution of this work.

Chapter 1 entitled 'challenges and contributions: tourism development in SIDS' pertains to the economic transformative power of tourism activity. There are definite advantages with SIDS providing greater diversity but at the same time tourism development has emerged into a form of economic dependence or a cycle which cannot be broken to create the inclusive growth the authors refer to. The point is made that inclusive growth requires innovation. Consideration of the kinds of innovations which create inclusive growth would have improved the contribution of the report and perhaps this would have involved research into the tourism policies and plans of SIDS. For instance, the idea that tourism should be people-centred as a long term intention of the Trinidad and Tobago Tourism Master Plan seemed flawed particularly since tourism in Tobago has been stymied as a result of the dual governor arrangement for tourism development (McLeod & Airey, 2007). In addition, the direct economic benefits of tourism are well known, what is not well known is the volume of tourism activity that is required to sustain tourism in SIDS. This is somewhat related to the data constraints of SIDS and this is a point mentioned by the authors throughout the report. Certainly the formula will be different based on an island's geographic, demographic and political characteristics but a framework is needed to guide tourism development in SIDS. The cycle of being small and having limited resources and remaining small because these resources are underutilised need to

be broken for sustained tourism development. Croes (2011) draws reference to this 'cycle of smallness' in the book entitled 'The Small Island Paradox: tourism specialization as a potential solution'. There is also a suggestion that tourism can reduce poverty in SIDS (Scheyvens & Momsen, 2008). Hence the importance of understanding the issue of inclusive growth, however, while this issue may be relevant for some SIDS it may not be critical for others. It would have been useful if the authors considered successful SIDS in terms of their tourism development and growth. The factors which bring about the fortunes of successful tourism in SIDS need to be considered to give a rounded perspective of tourism development in small island states.

Chapter 2 considers the linkage and leakage issues in relation to tourism in SIDS. This is the core consideration of this book and the authors choose to utilise the supply chain as the basis for understanding inclusive growth. It is agreed that research is needed into supply chain management in the local tourism and hospitality industries and in particular an understanding of the links between the island's external and internal distribution systems are needed for chain co-ordination. This is an important point of the work. The common notion is that there are barriers to local suppliers to enter this supply chain by virtue of meeting the standards of a buyer-led chain. The question is, why is the chain buyer-led? If tourists are motivated to travel from the mundane and immerse into new experiences, then, what are the causes of this buyer-led chain? Perhaps the issue relates to the marketing images which convert a tourist destination experience into products and expectations. The issue is compounded by the power of international brands and therefore chain management may be a function of brand protection. In such a context, local suppliers cannot compete with international suppliers for the same products and services. Also, the authors suggested that the resourcing of SIDS makes the supply chain dysfunctional and several times mention was made of cold storage units and trucks in Seychelles and Jamaica. This seems to be an issue that could be easily solved. Perhaps the authors needed to take a marketing related rather than an operations related focus on this issue of linkages versus leakages in the tourism sector of SIDS. This would have added new knowledge and broaden the perspective about supply chain management.

Chapter 3 makes a contribution to understanding the impact of the cruise ship industry on SIDS. An important question however is whether small island tourist destinations can develop without this industry. The argument that is often used to justify cruise tourism is the hope that those excursionists can be converted into stay-over visitors. The authors made the point that these vessels stay a short time at port. Then, if the longer the stay the greater the expenditure, cruise tourism seems to be an unattractive product of the destination mix of a successful tourism destination. The really attractive option is the home port where there is at least one over-night. SIDS as home ports can also benefit from the provisioning of

Political Ecology and Tourism Sanjay Nepal, Jarkko Saarinen, 2016-02-26 Political ecology explicitly addresses the relations between the social and the natural arguing that social and environmental conditions are deeply and inextricably linked Its emphasis on the material state of nature as the outcome of political processes as well as the construction and understanding of nature itself as political is greatly relevant to tourism Very few tourism scholars have used political ecology

as a lens to examine tourism centric natural resource management issues This book brings together experts in the field with a foreword from Piers Blaikie to provide a global exploration of the application of political ecology to tourism It addresses the underlying issues of power ownership and policies that determine the ways in which tourism development decisions are made and implemented Furthermore contributions document the complex array of relationships between tourism stakeholders including indigenous communities and multiple scales of potential conflicts and compromises This groundbreaking book covers 15 contributions organized around four cross cutting themes of communities and livelihoods class representation and power dispossession and displacement and environmental justice and community empowerment This book will be of great interest to students and scholars in tourism geography anthropology sociology environmental studies and natural resources management

Tourism in Pacific Islands Stephen Pratt, David Harrison, 2015-02-20 Pacific Island Countries have been shown to be especially vulnerable to such external influences as natural disasters political unrest and downturns in the global economy and their tourism industries have been notably affected In particular they typically have a narrow resource base and a fragile and often vulnerable natural environment While there is some research on islands and small states there is a dearth of information on the South Pacific and very little research is being undertaken in the region compared to other geographical regions in the world This volume brings together current work in Pacific Island tourism In this collection three main themes arise Images of the South Pacific Socio economic Impacts of Tourism and Pacific Island Countries and the Outside World The first focus is on the question of image namely stereotypes of a destination held by tourists and potential tourists the extent to which residents for their part really welcome visitors and the role tourism might play in changing pre established images The second theme is tourism s impacts notably the economic and socio cultural effects of international tourism s intrusion in the region which though often hotly debated have attracted relatively little empirical research The third focus is on the challenges of how PICs articulate with their external geo political and physical environment These involve existing relations with formal colonial centres geographical isolation the need for greater air access to the outside world and for more tourists and the continuing threat to several PICs of global warming which increased air travel will inevitably exacerbate This text will be of interest to tourism students researchers and academics in the fields of tourism development studies and cultural studies

COVID-19: Paving the Way for a More Sustainable World Walter Leal Filho, 2021-05-25 This book gathers and disseminates opinions viewpoints studies forecasts and practical projects which illustrate the various pathways sustainability research and practice may follow in the future as the world recovers from the COVID 19 pandemic and prepares itself to the possibilities of having to cope with similar crisis a product of the Inter University Sustainable Development Research Programme IUSDRP <https://www.haw-hamburg.de/en/ftz/nk/programmes/iusdrp.html> and the European School of Sustainability Science and Research ESSSR <https://esssr.eu> The COVID 19 pandemic has led to severe human suffering and to substantial damages to economies around the globe affecting both rich countries and

developing ones The aftermath of the epidemic is also expected to be felt for sometime This will also include a wide range of impacts in the ways sustainable development is perceived and how the principles of sustainability are practised There is now a pressing need to generate new literature on the connections between COVID 19 and sustainability This is so for two main reasons Firstly the world crisis triggered by COVID 19 has severely damaged the world economy worsening poverty causing hardships and endangering livelihoods Together these impacts may negatively influence the implementation of sustainable development as a whole and of the UN Sustainable Development Goals in particular These potential and expected impacts need to be better understood and quantified hence providing a support basis for future recovery efforts Secondly the shutdown caused by COVID 19 has also been having a severe impact on teaching and research especially but not only on matters related to sustainability This may also open new opportunities e g less travel more Internet based learning which should be explored further especially in the case of future pandemics a scenario which cannot be excluded The book meets these perceived needs

Tourism, Change and the Global South Jarkko Saarinen, Jayne M. Rogerson, 2021-06-16 This significant volume is the first to focus on both the

changing nature of tourism and the capacity of tourism to effect change especially in the Global South Geographically this changing nature of tourism is based on the transforming relationships between demand supply and location While this is nothing new in tourism recent decades have intensified the changing characteristics of global tourism From another perspective tourism represents a change and nowadays many localities and regions aim to use tourism as a tool for positive change i e development However this has turned out to be a challenging task in practice especially in the Global South context where the relationship between tourism growth and local development has often been controversial This book looks at a host of critical concepts in one volume such as growth and development adaptation and resilience sustainability and responsibility governance and planning and heritage and destination management strategies By understanding the drivers of change this book sheds new insight into the promise and role of sustainability and responsibility in tourism development This book will be of great interest to all upper level students academics and researchers in the fields of Tourism Geography and Cultural and Heritage studies

Republic of Palau International Monetary Fund. Asia and Pacific Dept,2014-05-06 This Selected Issues paper describes Palau s fiscal challenges and policy options to achieve long term fiscal sustainability Palau relies heavily on compact grants and without continued fiscal consolidation over the medium term the fiscal position will become unsustainable after these grants expire in FY2024 The fiscal sustainability analysis uses an intertemporal budget constraint model to show that reducing the current deficit excluding grants by about 8 percentage points of GDP during FY2014 19 would ensure Palau s long term fiscal sustainability The paper also discusses the role of tourism in Palau and identifies policy priorities to further promote this sector and sustain growth
