Crime Derek Dalton, 2014-11-20 Dark tourism has become widespread and diverse It has passed into popular culture vernacular deployed in guide books as a short hand descriptor for sites that are associated with death suffering and trauma However whilst books have been devoted to dark tourism as a general topic no single text has sought to explore dark tourism in spaces where crime mass murder genocide State sanctioned torture and violence has occurred as an organising theme Dark Tourism and Crime explores the socio cultural contours of this unique type of tourism and explains why spaces places where crime has occurred fascinate and attract tourists The book is marked by an ethics of respect for the suffering a place has experienced and an imperative to learn something tangible about the history and legacy of that suffering Based on empirical ethnographic research it takes the reader from the remnants of Auschwitz concentration camp to the tranquil Australian island of Tasmania to explore precisely what things a dark tourist might encounter architecture art installations

gardens memorials physical traces of crime and how these things invoke and evoke past crimes This volume furthers understanding of dark tourism and will be of interest to students researchers and academics of criminology tourism and cultural studies The Cultural Moment in Tourism Laurajane Smith, Emma Waterton, Steve Watson, 2012-07-26 This book is a response to the burgeoning interest in cultural tourism and the associated need for a coherently theorized approach for understanding the practices that such an interest creates Cultural tourism has become an important and popular aspect of contemporary tourism studies as well as providing a rich seam of upscale product development opportunities in the industry as a whole Much of the related literature however focuses upon describing and categorizing cultural tourism from a supply side perspective This has prompted the taxonomizing of cultural tourists on the basis of their level of involvement and interest in cultural tourism products and or their economic worth as a sought after market segment There have been few recent attempts at a rigorous re theorization of the issues beyond conventional representational theories this book aims to fill that void This groundbreaking volume provides a theoretical and empirical account of what it means to be a cultural or heritage tourist It achieves this by exploring the interactions of people with places spaces intangible heritage and ways of life not as linear alignments but as seductive moments of encounter engagement performance and meaning making which are constitutive of cultural experience in its broadest sense The book further explores encounters in cultural tourism as events that capture and constitute important social relations involving power and authority self consciousness and social position gender and space history and the present It also explores the consequences these insights have for our understanding of culture and heritage and its management in the context of tourist activity In capturing the cultural moment this book provides a better understanding of the motivations on site activities meaning constructions and other cultural work done by both tourists and tourist operators The volume confronts and explores the cultural political and economical interrelations between culture heritage and the tourism industry In so doing it also investigates how this co mingling of identity representation and social life may be better apprehended with the wider shift in critical thought towards notions of affect and performativity The book is a fundamental and influential contribution to research in this field It will be of significant value to students academics and researchers interested in this broad topic area *Destination Marketing* Metin Kozak, Nazmi Kozak, 2015-10-23 This book advances the current literature on destination marketing by using innovative up to date case studies from a wide geographical representation The contributors examine new methods and marketing approaches used within the field through a combination of theoretical and practical approaches With discussions of topics including image branding attractions and competitiveness the chapters in this volume offer new insight into contemporary developments such as medical tourism Islamic tourism and film induced tourism Presenting detailed findings and a range of methodologies ranging from surveys to travel writings and ethnography this book will be of interest to students scholars and practitioners in the fields of tourism and marketing Tourism Art and Souvenirs David Hume, 2013-10-01 This book examines the

relationship between art and tourism through the study of the material culture of tourism tourist art and souvenirs It thoroughly examines how to categorise the material culture of tourism within the discourses of contemporary art and cultural anthropology and demonstrates that tourist art is a unique expression of place and genuine artistic style The first investigation to consider the activity of souvenirs from both indigenous and settler tourist sites it brings a unique addition to the existing dated research in the area Working initially from Graburn s definition of tourist art as the art of one culture made specifically for the consumption of another Tourism Art and Souvenirs sheds light on important aspects of the souvenir that have not been widely discussed The most recent research is used to consider how the souvenir is designed and consumed consumer expectations and influence on the character of the souvenir how the souvenir maker is consumed by the tradition of heritage and how products become successful as souvenirs The title also investigates the language involved in the representation of place and the recording of experience through the souvenir developing a method that expresses the descriptive data of individual souvenir artefacts graphically so the patterns of language may be analysed Enhancing the understanding of material culture in tourism and therefore adding to future tourism development this volume will be of interest to upper level students researchers and academics in tourism culture heritage and sustainability Co - Creation in Tourist Experiences Nina K Prebensen, Joseph S Chen, Muzaffer S Uysal, 2017-04-21 The tourist experience is multi faceted and dynamic as tourists engage with its formation and creation The tourists then become vital in creating value for themselves together with the service provider Experience value cannot be pre produced but is co created between host and guest s in the servicescape The tourist managers can therefore only plan for and facilitate for value co creation to take place This book responds to the need for a critical review of how firms can facilitate and dramatize for enhanced experience value for tourists As the roles of participants and providers are changing rapidly new knowledge in terms of how value creation and value co creation can transpire needs to be generated The aim of this book is therefore to accentuate the role and importance of the core elements in value creation processes namely the customer s the setting in which co creation would take place and the provider Bringing together scholars from diverse areas to address the nature of how the actors co create values through interaction in different experience settings the book also serves as a guide to the best practice of co creation of tourist experiences It will therefore appeal practically as well as theoretically to scholars and students of tourism marketing leisure hospitality and services management Information and Communication Technologies for Sustainable Tourism Alisha Ali, Andrew Frew, 2013-05-07 Sustainable development is a highly topical issue and is of critical importance to tourism as the environment is of utmost importance for the continued development and prosperity of the industry There have been numerous texts written on sustainable tourism and the measures to mitigate and manage this but none which acknowledges Information and Communication Technologies ICT as a mechanism of doing so despite being an emerging area of research ICT in this context refers to innovative tools which form an integrated system of software and networked equipment that

facilitates data processing information sharing communication and the ability to search and select from an existing range of products and services for an organisation's benefits. Despite the symbiotic relationship which exists between ICT and sustainable tourism, there has been little research which has considered how the use of such technology can be used to make sustainable tourism development a more workable reality. This opportune book is the first to provide a focus on the interrelationship of these two important topics, demonstrating their synergies and providing insight into a new and innovative approach to managing sustainable tourism development. It considers the use of technology to reduce the negative impacts of tourism from both the demand and supply side perspectives. A critical review of a range of cutting edge technologies used by tourists and businesses to assess their usefulness in managing sustainable tourism development from the macro to the micro level is also discussed. It further integrates examples and practical applications to show how ICT can be an invaluable mechanism in the management of sustainable tourism development. This cutting edge volume provides a wealth of information on an important yet neglected subject. This book will be invaluable reading for students, researchers, academics and members of the tourism industry looking for new and innovative ways of fostering a more sustainable tourism industry.

Knowledge Networks and Tourism Michelle McLeod, Roger Vaughan, 2014-11-20. The receipt of knowledge is a key ingredient by which the tourism sector can adjust and adapt to its dynamic environment. However, although its importance has long been recognised, the fragmentation within the sector, largely as a result of it being comprised of small and medium sized businesses, makes understanding knowledge management challenging. This book applies knowledge management and social network theories to the business of tourism to shed light on successful operations of tourism knowledge networks. It contributes specifically to understanding a network perspective of the tourism sector, the information needs of tourism businesses, social network dynamics of tourism business operation, knowledge flows within the tourism sector and the transformation of the tourism sector through knowledge networks. Social Network Analysis is applied to fully explore the growth and maintenance of tourism knowledge networks and the relationships between tourism sector stakeholders in relation to their knowledge requirements. *Knowledge Networks and Tourism* will be valuable reading for all those interested in successful operations of tourism knowledge networks.

Wellness Tourism Cornelia Voigt, Christof Pforr, 2013-11-20. Core values of society, health and wellbeing impact today on all aspects of our lives and have also increasingly influenced patterns of tourism consumption and production. In this context, wellness has developed into a significant dimension of tourism in a number of new and long established destinations. However, although it is consistently referred to as one of the most rapidly growing forms of tourism worldwide, there still remains a dearth of academic literature on this topic. This book uniquely focuses on the supply side of wellness tourism from a destination perspective in terms of the generation and delivery of products and services for tourists who seek to maintain and improve their health. This approach provides a better understanding of how wellness tourism destinations develop and explores the specific drivers of that growth in a destination.

context and how destinations successfully compete against each other in globalised market place A range of wellness destination development and management issues are examined including the importance of authenticity an appropriate policy framework delivery of high quality goods and services participation of a broad range of stakeholders and the development of networks and clusters as well as collaborative strategies essential for a successful development and management of a wellness tourism destination International case studies and examples from established and new wellness tourism destinations are integrated throughout This timely volume written by leaders in this sector will be of interest to tourism and hospitality students and academics internationally *Strategic Marketing in Tourism Services* Rodoula H.
