Complementary Medicine in Australia and New Zealand Hans Baer,2015-07-17 In the late nineteenth century on the eve of the formation of Australia as a nation state in 1902 the Australian medical system could be best described as a pluralistic one in the sense that while regular medicine constituted the predominant medical system it was not clearly the dominant one in that regular physicians faced competition from a wide array of alternative practitioners As regular medicine increasingly assumed the guise of being scientific it evolved into biomedicine and developed a link with corporate and state interests in the early twentieth century in Australia as in other capitalist developed societies Relying upon state support Australian biomedicine has achieved dominance over alternative medical system such as homeopathy herbal medicine osteopathy chiropractic and naturopathy Various social forces particularly the development of the holistic health movement have served

to challenge biomedical dominance in Australia like elsewhere What started out as a popular health movement in the early 1970s has evolved into the professionalized entity that is generally referred to as complementary medicine in Australia as opposed to complementary and alternative medicine in the US and UK Complementary medicine in Australia encompasses many medical systems and therapies Since the 1980s certain heterodox medical systems particularly chiropractic osteopathy acupuncture and Chinese medicine naturopathy Western herbalism and homeopathy have achieved considerable recognition from the Australian state either at the federal level or at the state and territorial levels Indeed the Australian state appears to have gone further than any other Anglophone country in terms of providing public funding for complementary medicine education Conversely it has committed a limited amount of funding for complementary medicine research compared to the United States

Medicine Ruth Barcan, 2020-05-26 Alternative therapies once the province of the hippie counterculture are now a mainstream phenomenon But they are more than a medical and economic sensation At once spiritual and bodily medical and recreational they are an enormously popular cultural practice bound up with the pleasure seeking drive of consumer culture as well as with spiritual and neo liberal values Complementary and Alternative Medicine critically examines this phenomenon which some denounce as the triumph of superstition over reason by asking practitioners themselves what makes these therapies so appealing Drawing on a wealth of interviews with Complementary and Alternative Medicine CAM practitioners as well as on the author's longstanding participation in CAM culture the book provides a much needed look from both the inside and the outside of the CAM phenomenon This book is essential reading for students and scholars of cultural studies anthropology sensory studies and sociology

Mixing Medicines Tatiana Chudakova, 2021-06-01 A graceful ethnographic account that speaks to broad concerns within medical anthropology a remarkable contribution to Tibetan Studies Sienna R Craig author of *Healing Elements* Traditional medicine enjoys widespread appeal in today's Russia an appeal that has often been framed either as a holdover from pre Soviet times or as the symptom of capitalist growing pains and vanishing Soviet modes of life *Mixing Medicines* seeks to reconsider these logics of emptiness and replenishment Set in Buryatia a semi autonomous indigenous republic in Southeastern Siberia the book offers an ethnography of the institutionalization of Tibetan medicine a botanically based therapeutic practice framed as at once foreign international and local to Russia's Buddhist regions By highlighting the cosmopolitan nature of Tibetan medicine and the culturally specific origins of biomedicine the book shows how people in Buryatia trouble entrenched center periphery models complicating narratives about isolation and political marginality Chudakova argues that a therapeutic life mediated through the practices of traditional medicines is not a last resort response to sociopolitical abandonment but depends on a densely collective mingling of human and non human worlds that produces new senses of rootedness while reshaping regional and national conversations about care history and belonging In this insightful and well written ethnography Tatiana Chudakova shows the elusiveness of Tibetan medicine as Siberia's Buryat minority seeks to maintain the practice's integrity and their status as a unique group while also striving to be a part of the Russian nation Carefully researched and meticulously argued *Mixing Medicines* offers a nuanced case for the intimate ties between today's Russia and Inner Asia Manduhai Buyandelger author of *Tragic Spirit*
