conceit and the logic of opportunism may develop into a equilibrium state The State of State His work moves classic political economy into the world of political sociology A normative contractual model is presented and the relative desirability of the state markets and communities is discussed A major conclusion is that it is a choice between imperfect alternatives involving decisions about more or less rather than absolute judgments of an either or variety It is nevertheless suggested that society ought to be radically depoliticized and that constitutional constraints should be introduced in the universe of policy making
