Four Histories about Early Dutch Football, 1910-1920 Nicholas Piercey, 2016-10-06 What is the purpose of history today and how can sporting research help us understand the world around us In this stimulating book Nicholas Piercey constructs four new histories of early Dutch football exploring urban change club members the media and the diaries of Cornelis Johannes Karel van Aalst a stadium director to propose practical examples of how history can become an important democratic tool for the 21st century Using early Dutch football

as a field for experimental thinking about the past the four histories offer new insights into the lives interests and passions of those connected to the sport in the 1910s and the cities they lived in How did the First World War impact on Dutch football Were new stadia a form of social control Is the spread of the beautiful game really a good thing And why was one of the sport s most prominent figures more concerned with potatoes These stories of early Dutch football suggest how vital sport and history can be in shaping our lives perceptions and actions and why we need to challenge the influence they have today

A Modern History of European Cities Rosemary Wakeman,2020-01-23 Rosemary Wakeman s original survey text comprehensively explores modern European urban history from 1815 to the present day It provides a journey to cities and towns across the continent in search of the patterns of development that have shaped the urban landscape as indelibly European The focus is on the built environment the social and cultural transformations that mark the patterns of continuity and change and the transition to modern urban society Including over 60 images that serve to illuminate the analysis the book examines whether there is a European city and if so what are its characteristics Wakeman offers an interdisciplinary approach that incorporates concepts from cultural and postcolonial studies as well as urban geography and provides full coverage of urban society not only in western Europe but also in eastern and southern Europe using various cities and city types to inform the discussion The book provides detailed coverage of the often neglected urbanization post 1945 which allows us to more clearly understand the modernizing arc Europe has followed over the last two centuries

*Paradise Planned* Robert A.M. Stern,David Fishman,Jacob Tilove,2013-12-03 *Paradise Planned* is the definitive history of the development of the garden suburb a phenomenon that originated in England in the late eighteenth century was quickly adopted in the United State and northern Europe and gradually proliferated throughout the world These bucolic settings offered an ideal lifestyle typically outside the city but accessible by streetcar train and automobile Today the principles of the garden city movement are once again in play as retrofitting the suburbs has become a central issue in planning Strategies are emerging that reflect the goals of garden suburbs in creating metropolitan communities that embrace both the intensity of the city and the tranquility of nature *Paradise Planned* is the comprehensive encyclopedic record of this movement a vital contribution to architectural and planning history and an essential recourse for guiding the repair of the American townscape

**Planting New Towns in Europe in the Interwar Years** Helen Meller,Heleni Porfyriou,2016-06-22 The key theme of the papers in this book concerns the prospects of building new urban environments and creating new societies in Europe during the interwar years The contributions do not focus on the system of government communist fascist or democratic but rather on what actually got built by whom and why and how the international communication of ideas was filtered through the prism of local concerns and culture As such the volume serves to tease out connections between urban form and social aspirations and between the moral basis of social planning and how it was interpreted Did the new towns of the interwar years actually create a planned society where visions met realities aided by the design of new urban forms This is one of the

principal questions investigated by the contributors here in all the different political contexts of their chosen new towns

Industrial Location and Site Planning Hans Mertens, 2025-05-02 This book looks at the complexity of the topic of industrial site planning Levels and actors are understood and discussed in terms of their mutual interaction There is no stable end state in any industrial sector At best these are states of balance in motion The aim is therefore to show paths and phases of development that help to overcome stagnation thresholds and to explore the triggering moments for new dynamics Technological justifications such as AI Industry 4.0 decarbonization are only one dimension Industrial policy cooperation models intercommunal for example in the case between market participants and producers as well as integrative planning activities both have socio economic and ecological dimensions Based on various regional examples from central Germany and certain international comparisons this volume helps illustrate industrial location developments in the context of ongoing regional structural changes The author's architect and member of relevant specialist organizations MBA in Switzerland and the USA involvement with a wide variety of projects monuments university and industrial buildings residential construction etc over almost 40 years is based on design and construction practice Furthermore 7 technical experts have reflected on the diverse dimension of the subject presented in this volume Additionally deindustrialization scenarios are contrasted with the necessity and path to neo industrialization

**The Palgrave Handbook of Bottom-Up Urbanism** Mahyar Arefi, Conrad Kickert, 2018-06-27 Who shapes our cities In an age of increasing urban pluralism globalization and immigration decreasing public budgets and an ongoing crisis of authority among designers and planners the urban environment is shaped by a number of non traditional stakeholders The book surveys the kaleidoscope of views on the agency of urbanism providing an overview of the various scholarly debates and territories that pertain to bottom up efforts such as everyday urbanism DIY urbanism guerilla urbanism tactical urbanism and lean urbanism Uniquely this book seeks connections between the various movements by curating a range of views on the past present and future of bottom up urbanism The contributors also connect the recent trend of bottom up efforts in the West with urban informality in the Global South drawing parallels and finding contrast between social and institutional structures across the globe The book appeals to urbanists in the widest sense of the word those who shape study and improve our urban spaces

Urban Visions Carmen Díez Medina, Javier Monclús, 2018-06-23 This book is a useful reference in the field of urbanism It explains how the contemporary city and landscape have been shaped by certain twentieth century

visions that have carried over into the twenty first century Aimed at both students and professionals this collection of essays on diverse subjects and cases does not attempt to establish universal interpretations it rather highlights some outstanding episodes that help us understand why the planning culture has given way to other forms of urbanism from urban design to strategic urbanism or landscape urbanism Compared with global interpretations of urbanism based on socioeconomic history or architectural historiography *Urban Visions From Planning Culture to Landscape Urbanism* aims to present the discipline couched in international contemporary debate and adopt a historic and comparative perspective The book s contents pertain equally to other related disciplines such as architecture urban history urban design landscape architecture and geography Foreword by Rafael Moneo *The Routledge Handbook of Planning Theory* Michael Gunder, Ali Madanipour, Vanessa Watson, 2017-08-23 *The Routledge Handbook of Planning Theory* presents key contemporary themes in planning theory through the views of some of the most innovative thinkers in planning They introduce and explore their own specialized areas of planning theory to conceptualize their contemporary positions and to speculate how these positions are likely to evolve and change as new challenges emerge In a changing and often unpredictable globalized world planning theory is core to understanding how planning and its practices both function and evolve As illustrated in this book planning and its many roles have changed profoundly over the recent decades so have the theories both critical and explanatory about its practices values and knowledges In the context of these changes and to contribute to the development of planning research this handbook identifies and introduces the cutting edge and the new emerging trajectories of contemporary planning theory The aim is to provide the reader with key insights into not just contemporary planning thought but potential future directions of both planning theory and planning as a whole This book is written for an international readership and includes planning theories that address or have emerged from both the global North and parts of the world beyond *Making it Modern* Aaron Betsky, 2016-12-15 At its root modernism is that fundamental It is a question of having something to represent that is of the moment In the most radical interpretation modernism always comes too late The modern is that which is always new which is to say always changing and already old by the time it has appeared Modernism is always a retrospective act one of documenting or trying to catch what has already appeared an attempt to fix life as it is being lived Modernity is just the very fact that we as human beings are continually remaking the world around us through our actions and are doing so consciously Modernism is a monument to or memory of that act which in its own making tries to remake the world it is pretending to represent *Los Angeles* Anton Wagner, 2022-07-12 For the first time Anton Wagner s groundbreaking 1935 book that launched the study of Los Angeles as an urban metropolis is available in English No book on the emergence of Los Angeles today a metropolis of more than four million people has been more influential or elusive than this volume by Anton Wagner Originally published in German in 1935 as *Los Angeles Werden Leben und Gestalt der Zweimillionenstadt in S dkalifornien* it is one of the earliest geographical investigations of a city understood as a series of layered landscapes Wagner demonstrated

that despite its geographical disadvantages Los Angeles grew rapidly into a dominant urban region bolstered by agriculture real estate development transportation infrastructure tourism the oil and automobile industries and the film business Although widely reviewed upon its initial publication his book was largely forgotten until reintroduced by architectural historian Reyner Banham in his 1971 classic *Los Angeles The Architecture of Four Ecologies* This definitive translation is annotated by Edward Dimendberg and preceded by his substantial introduction which traces Wagner's biography and intellectual formation in 1930s Germany and contextualizes his work among that of other geographers It is an essential work for students scholars and curious readers interested in urban geography and the rise of Los Angeles as a global metropolis This fine new translation by Timothy Grundy of Anton Wagner's *Los Angeles* with Edward Dimendberg's lucidly probing introduction constitutes a major contribution to urban history and our understanding of one of the world's most enigmatic and significant cities Thomas S Hines Research Professor of History and Architecture and Urban Design UCLA Edward Dimendberg has done a remarkable job bringing Anton Wagner's classic study of Los Angeles to a wider readership This landmark publication will enable many strands of urban scholarship to enter into dialogue for the first time Matthew Gandy Professor of Geography University of Cambridge and author of *Natura Urbana Ecological Constellations in Urban Space* 2022 Anton Wagner was a prescient and troubling historical figure Nearly a century ago with his camera in hand he walked Los Angeles in fervent exploration of metropolitan growth This beautiful and expert book takes Wagner every bit as seriously as he took Los Angeles William Deverell Director Huntington USC Institute on California and the West Anton Wagner's geographic and ethnographic history of the urbanization of Los Angeles has long been unavailable to English speaking readers This early study accompanied by Edward Dimendberg's comprehensive introduction will be of interest to all who like Reyner Banham admire its impressive scholarship and firsthand account of a city and ecology already in the throes of dynamic transformation Joan Ockman Vincent Scully Visiting Professor of Architectural History Yale School of Architecture Encompassing copious photographs insightful commentary and thorough reconstruction of Wagner's life and times this new translation of Anton Wagner's *Los Angeles* provides the missing link in scholarship about the metropolis during the early twentieth century Its continuing relevance and controversial edge will appeal to urban researchers and college students beyond Southern California Michael Dear Professor Emeritus of City Regional Planning University of California Berkeley Scholars of Los Angeles or any city must rejoice at this first proper English language publication of Wagner's brilliant if problematic urban studies masterpiece The edition is made accessible and relevant by Edward Dimendberg's indispensable prefatory material and contextualization Roger Keil Professor of Environmental and Urban Change York University Finally translating this fascinating book into English fills an important gap in our historical knowledge of Los Angeles and its interpretation Edward Dimendberg's invaluable introduction situates Anton Wagner in a comprehensive intellectual context Of more than merely historical interest this in depth picture of Los Angeles in 1933 is essential reading for anyone interested

in cities Margaret Crawford Professor of Architecture University of California Berkeley This key text from 1935 for understanding Los Angeles urbanism is finally available in an excellent English translation by Timothy Grundy Revelatory introductory essays by Anthony Vidler and Edward Dimendberg explain how German geographer and later Nazi Party member Anton Wagner was able to map and conceptualize the radical originality of this archetypal American metropolis in ways that deeply influenced Reyner Banham and so many subsequent writers on the city Robert Fishman Taubman College of Architecture and Planning University of Michigan Expertly annotated by Edward Dimendberg Anton Wagner's book on the growth of Los Angeles which first appeared in German in 1935 is a landmark study in the history of urbanization At the same time it can be read as an example of transnational and comparative history in which an observer from one country commented on developments in another This volume will interest historians of the modern city both in America and in Germany Andrew Lees Distinguished Professor of History Emeritus Rutgers University Blending his wide knowledge and his acute wit Edward Dimendberg has meticulously reconstructed the genesis of a forgotten doctoral thesis which had remained unread for more than eighty years despite its acknowledgement by Reyner Banham This pioneering scholarly study of the Southern Californian metropolis is now available for the first time in English inscribed with subtlety in both its German and its American contexts on the basis of thorough investigations Jean Louis Cohen Sheldon H Solow Professor in the History of Architecture Institute of Fine Arts New York University This is the odyssey of a book written and published in 1930s Nazi Germany forgotten after the war and rediscovered by Reyner Banham in the 70s Los Angeles is a seminal text of modern architectural history and confronts readers in the present with the paradox of an unknown classic Wolfgang Schivelbusch author of *The Railway Journey* Finally a translation of Anton Wagner's *Los Angeles* with extensive notes and a superb and deeply researched introduction by Edward Dimendberg has arrived It turns out that it was worth the wait This volume is not only an important historic document but a still unrivaled portrait of a great city Robert Bruegmann Distinguished Professor Emeritus of Art History Architecture and Urban Planning at the University of Illinois at Chicago and author of *Sprawl A Compact History* Scholars of Los Angeles can rejoice that Anton Wagner's legendary study of early 1930s Los Angeles is at last available in a masterful translation with a luminous introduction by Edward Dimendberg that captures Wagner's analytical brilliance as well as his troubling politics and racial views An essential addition to any library of Southern California Louis S Warren W Turrentine Jackson Professor of Western U S History University of California Davis Anton Wagner's study provides an invaluable and frequently perceptive window into the evolution of Los Angeles during the early twentieth century showing how human agency transformed regional resources into a booming major city The translation is immensely enhanced by Edward Dimendberg's skillful provision of context including fascinating intellectual history Stephen Bell Professor of Geography and History UCLA Los Angeles *The Development Life and Structure of the City of Two Million* in Southern California has always had an elusive presence in the conversation about the explosive growth of the Southern

California metropolis at the beginning of the twentieth century an arcane text known to exist but only accessible to very few This expert first translation in English almost ninety years after it originally appeared in German is prefaced by a complex and engaging introduction by Edward Dimendberg that situates the original study in a multidisciplinary conversation It elucidates the many ways this landmark essay on Los Angeles s urban geography was not only filtered into subsequent scholarship on the city Reyner Banham s iconic Los Angeles The Architecture of Four Ecologies in particular but also how it resonates with contemporary debates about cities as complex social organisms This book will be essential reading not only for historians of Los Angeles but for those interested in the theorization of the modern metropolis more broadly That the volume editor addresses Wagner s problematic views on race and territorial conquest front and center within their historic context only adds to the significance of this undertaking Martino Stierli The Philip Johnson Chief Curator of Architecture and Design The Museum of Modern Art New York **Re-Humanizing Architecture** Ákos Moravánszky, Judith

Hopfengärtner, 2016-12-19 After the Second World War a divided Europe was much affected by a period of reconstruction This was influenced by the different political systems in the socialist East and in the capitalist West the focus was on cohesion in society and its cultural and architectural expression In parallel to the rapidly progressing industrialization of the building industry debates on the humanization of the built environment were led on both sides with great intensity The volume shows how on the back of existentialism new monumentality and socialist realism quite similar concepts and strategies were developed in order to find answers to questions relating to adequate structures for new forms of community and identity *Urban Transport XXVI* S. Syngellakis, 2020-11-24 A continuous requirement for better urban transport systems and the need for a healthier environment has resulted in an increasing demand for new solutions Innovative systems new approaches and original ideas need to be thoroughly tested and critically evaluated before they can be implemented in practice Moreover there is a growing need for integration with telecommunications systems and IT applications in order to improve safety security and efficiency This volume also addresses the need to solve important pollution problems associated with urban transport in order to achieve a healthier environment The variety of topics covered by the included research works which were presented at the 26th International Conference on Urban Transport and the Environment reflect the complex interaction of urban transport systems with their environment and the need to establish integrated strategies The goal is to arrive at optimal socio economic solutions while reducing the negative environmental impacts of current transportation systems Interurban Knowledge Exchange in Southern and Eastern Europe, 1870-1950 Eszter

Gantner, Heidi Hein-Kircher, Oliver Hochadel, 2020-10-22 Around 1900 cities in Southern and Eastern Europe were persistently labeled backward and delayed Allegedly they had no alternative but to follow the role model of the metropolises of London Paris or Vienna This edited volume fundamentally questions this assumption It shows that cities as diverse as Barcelona Berdyansk Budapest Lviv Milan Moscow Prague Warsaw and Zagreb pursued their own agendas of modernization

In order to solve their pressing problems with respect to urban planning and public health they searched for best practices abroad. The solutions they gleaned from other cities were eclectic to fit the specific needs of a given urban space and were thus often innovative. This applied urban knowledge was generated through interurban networks and multi-directional exchanges. Yet in the period around 1900 this transnational municipalism often clashed with the forging of urban and national identities highlighting the tensions between the universal and the local. This interurban perspective helps to overcome nationalist perspectives in historiography as well as outdated notions of center and periphery. This volume will appeal to scholars from a large number of disciplines including urban historians, historians of Eastern and Southern Europe, historians of science and medicine and scholars interested in transnational connections.

Street-Level Architecture Conrad Kickert, Hans Karssen, 2022-08-04. This book provides the tools to maintain and rebuild the interaction between architecture and public space. Despite the best intentions of designers and planners, interactive frontages have dwindled over the past century in Europe and North America. This book demonstrates why even our best intentions for interactive frontages are currently unable to turn a swelling tide of economic and technological evolution, land consolidation, introversion, stratification and contagious decline. It uses these lessons to offer concrete locational programming design and management strategies to maximize street-level interaction and trust between street-level architecture, its inhabitants and the city. This book demonstrates that designers, developers, planners and managers ultimately have to create the right preconditions for inhabitants and passersby to bring frontages to life. These preconditions connect architecture to its urban, social, economical and technological context. Only the right frontage in the right context with the right design, the right inhabitation and the right attitude to the city will become part of the ecosystem of trust and interaction that supports public life. This book empowers the many participants in this ecosystem to build, inhabit and enjoy truly urbane architecture.

*Spatial Planning Systems and Practices in Europe* Mario Reimer, Panagiotis Getimis, Hans Blotevogel, 2014-02-05. Ideal for students and practitioners working in spatial planning, the Europeanization of planning agendas and regional policy in general. *Spatial Planning Systems and Practices in Europe* develops a systematic methodological framework to analyze changes in planning systems throughout Europe. The main aim of the book is to delineate the coexistence of continuity and change and of convergence and divergence with regard to planning practices across Europe. Based on the work of experts on spatial planning from twelve European countries, the authors underline the specific and context-dependent variety and disparateness of planning transformation, focusing on the main objectives of the changes, the driving forces behind them and the main phases and turning points, the main agenda-setting actors and the different planning modes and tools reflected in the different policy and planning styles. Along with a methodological framework, the book includes twelve country case studies and the comparative conclusions covering a variety of planning systems of EU member states. According to the four ideal types of planning systems identified in the EU Compendium, at least two countries have been selected from each of the four
